of great interest. Dr. Hastings has spared no pains to make it a grand success. All students should plan to attend.

Illustrated Lecture and Electrical Display.

The Electrical Engineers are making great preparation for their lecture, reception and display. They have been fortunate in obtaining Mr. Isham Randolph, chief engineer of the sanitary district of Chicago, to deliver an illustrated lecture on "The Chicago Drainage Canal," in the University chapel, Monday evening Feb. 14th, 7:30.

From the fact that the construction of this immense cannal is one of the greatest engineering feats of its kind, with an estimated cost of nearly \$30,000,000.00, makes it of interest to everyone. Mr. Randolph who is chief engineer is well qualified to lecture on the construction of this canal.

Immediately after the lecture, there will be a special electrical display, during the reception to Mr. Randolph, in the Armory. The display will include a complete collection of electric cooking and heating appliances, such as electric stoves, pans, coffee pots, shafing dishes, etc. The armory will be brilliantly lighted with an electric flag and designs. A portion will be devoted to a model electric kitchen. Light refreshments and hot chocolate, made on the electric heater, will be served by several of the popular University girls. Admission will be by ticket to be obtained at the University office or any E. E. student for 25c. Crowds of five couple or more may have seats reserved by seeing any of the committee on arrangements—C. W. Weeks, E. B. Sawyer, H. B. Noyes, M. A. Hyde. The boys are all hard at work running the wires for the search light on the main building and the lighting and power circuits in the armory. All are striving to make the exhibition a grand success.

Miss Jennie Pentzer succeeds Miss Ida Lewis as Gymnasium assistant.

Cora Elmore, who was obliged to leave school on account of poor health, is reported to be much better. She will take charge of music classes at Sterling, Talmage and other points.
