

You run no risk when you buy shoes at the Foot Form Store 1213 O st. They always have the latest styles. Their prices are reasonable. Their shoes fit and wear well.

A Difficult Problem—Can You Solve It.
 DEAR TEACHERS:—When I was a lad of sixteen, I found in Adam's Arithmetic the following problem which I offer you for solution:

EXAMPLE.

Where should a pole 120 feet high be broken that the top may rest on the ground 40 feet from the base?

Answer:—53½ feet.

Until 1894 I was unable to solve this example, believing it was not a true arithmetical question, but at that time I was placed in a position where I must prove it or acknowledge in public a defeat. I solved it and finally evolved a simple explanation. I now offer it to you. It is not algebraical in any manner. If you desire any instruction write enclosing stamp. It will be good practice to try even if you fail to get satisfaction by your own efforts. Give it to your advanced pupils and if any of them obtain a satisfactory explanation send it to me.

Very Respectfully,

A. H. CRAIG, Mukwonago, Wis.

When you write

To your friends

who are coming west to visit you just add a postscript like this: "Be sure to take the Burlington Route. It's much the best."

You are quite safe in doing this because our service from Chicago, Peoria, St. Louis and Kansas City, in fact all eastern, southeastern and southern cities is just as good as our service to those points. And that, as everyone who is acquainted with it will testify, is the best there is.

Tickets and time tables on application at B. & M. depot or city office corner 10th and O streets.
