... Fay Patent Saw Edge Machine

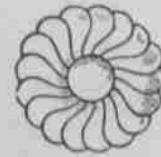

IT finishes the edges of COLLARS and CUFFS in an elegant manner. Cuffs, which have become rough on the edge, and Collars which saw your neck and make you miserable, are given a full smooth edge, making them look fine and dressy and feel as easy and comfortable as new ones. It takes off nothing from the body of the Collar—on the contrary, it preserves the normal thickness and prevents fraying out of the edges. Its practical effect is to increase the service of Collars and Cuffs far beyond what is known without it. It leaves a full smooth finished edge as long as there is any body on which to work. They look like new ones long after they are old. It will interest you as a triumph in mechanics. Your trade respectfully solicited. We have the only machine of this patent in Nebraska.

THE ANNUAL THANKSGIVING SALE.

OF LINENS, CHINAWARE, COOKING UTENSILS AND GROCERIES began here Thursday, Nov. 17, and continues until Wednesday, Nov. 23. This event always creates the liveliest interest among discriminating people. The season's choicest productions are offered at Special Sale prices, while they are yet new and fresh and while assortments are most complete. See daily papers for further particulars.

WITH THE DRESS GOODS—The present season has been by far the greatest we have ever known, the output has far exceeded that of any previous year and the brisk and rapid selling has surpassed our greatest expectations. No more satisfactory proof of the fact that we offer the right goods at the right prices is necessary.

SHOES—We show more distinct and different lines of LADIES' FINE DRESS and STREET SHOES than can be found elsewhere in this locality; and guarantee to save you from 50 cents to \$1.00 on every pair.

Herpolsheimer Co

The University of Minnesota, College of Medicine and Surgery
