> J. W. McCrosky. 91, who is now chief electrician for the Buenos Ayres tramway company in Argentina, is on his way to visit his old home at Tecumseh. He will be at Lincoln and will probably deliver a lecture to the electrical students.

## WORK IN PHYSICS

Three hundred and fifty students have registered for work in the physics department. The class is so large that it was found necessary to divide it into two sections. Six research papers have been published this year by the physics department. Dr. Brace has published in the London Philosophical Review an article entitled "A New spectropho tometer," describing a new and impor tant instrument for scientific and tech nical use. This contribntion also ap peared in the Astro-Physical Journal with some important additions. Another paper has appeared in the Philosophical magazine, contribguted by B. V. Hill, former fellow in physics in this university. Two papers are now in the press of the Astro-Physical Jourual written by graduate students. Papers by Professors Moore and More are also with the publishers of the mhysical Review and the Philosophical magazine, respectively.
Seventeen invoices of new apparatus have been imported this year for the department.

## (3)(4)(4)(2) (a)  Herpolshilimer \& Co. <br> is like the selling of all other seasons at this store. It is always full of interest to the discriminating purchasers because there are so many attractive offerings, so many values that appeal to economy lovers and never anything but the most reliable, dependable and desirable grades in all lines. The moderate weather of the fall and winter season prevented the sale of the usual quantity of heavy goods, leaving us with a larger stock than we generally have at this time. The annual inventory is only a few days off and stocks must be reduced to the minimum for that event. Sacrifices of prices and profit are the order everywhere throughout the store. <br> Ierpolshcimer 9.0. <br> LINCOLN, NEB. <br> 

## (1) be University of MBinnesota

College of Medicine and Surgery.
The Twelfth Annual Course of Lectures will commence on the 19th day of September, 1899, and will continue eight and one-half months. The course is graded and covers a period of four years.
