FIVE CENTS.

KANSAS DEBATERS BEATEN

Nebraska Team Gets a Unanimous Decision over Southern Opponents Thursday Evening.

The last great intercollegiate debate was held in the university chapel Thursday of last week. This was one of the most satisfactory contests of the season. It was a clear victory for Nebraska, though Kansas did good work.

The question discussed was whether the growth of large corporations was a menace to democratic institutions, and the subject was handled with ability. The debaters were well prepared and touched the real substance of the issue. Nebraska had the affirmative and was represented by A. L. Deal, Miss An-

F. E. EDGERTON, President of '00.

stine, and Guy Talbot, who debated with ease, logic, and force.

Kansas made a fatal mistake by not accepting her position as negative and simply combat the arguments of the affirmative. She started out by stating that they purposed to substantiate her position by affirmative proof. This was an attempt to evade the position taken by the affirmative, but the effort from the standpoint of a debate was an absolute failure. Nebraska forced her to abandon the attempt to set up affirmative argument. The third speaker left his planned course and tried to save the day by rebuttal argument, and as a result his speech was dry and uninteresting.

Kansas was driven back at every stage and her presentation was upon a doctrine. Nebraska adhered to her first propositions, argued them with force and logic. As she saw her opponents recede she advanced with acceleration and at the close was clearly the victor.

The audience was appreciative and courteous and gave the contestants equal applause. All who heard the contest seemed very much pleased with the able manner in which the difficult question was handled.

BASE BALL SCORES.

The base ball team has been having equal success the past week. Last Tuesday the boys played at Purdue with the team still in a crippled condition. The game was interesting despite the one-sided score. Purdue succeeded in bunching her hits, while those made by Nebraska were not timely. Purdue has been in charge of Walt Friel, the old Nebraska catcher. Score:

Nebraska 0 0 0 0 0 0 1 — 1
Purdue 1 0 2 1 0 1 0 1 1 — 7

Hits—Off Bliss 8, off McKensie 5.

Errors—Nebraska 3, Purdue 2.

Struck out—By Bliss 3, by McKensie 8.

Bases on balls—Off Bliss 9, McKensie 2.

Batteries—Bliss and Rhodes, McKensie and Smith.

The following day the game was with the University of Indiana at Bloomington. It took ten innings to decide the game.

Gordon pitched in good form, allowing but four hits. Score:

Nebraska 0 0 4 0 1 0 0 1 0 3 — 9

Indiana 0 1 0 0 1 1 3 0 0 1 — 7

Hits—Nebraska 10, Indiana 4.

Errors—Nebraska 10, Indiana 6.

Bases on balls—Off Gordon 3, Bracken 2.

Batteries—Gordon and Rhodes, Bracken and Merrill.

Saturday the team played the University of Missouri team at Columbia, winning by a score of 10 to 8. The game was played on a muddy field, and the errors made were excusable. The feature of the game was the home run made by Bliss when the bases were full. Score by innings:

Nebraska 0 2 1 0 2 3 2 0 0 — 10

Missouri 0 0 0 4 1 3 0 0 0 — 8

Hits—Nebraska 13, Missouri 8.

Bases on balls—Off Mason 12, Bliss 1.

Struck out—By Mason 11, Bliss 10.
Errors—Nebraska 5, Missouri 3.
Passed balls—Ringer 2, Washer 2.

Batteries—Bliss and Ringer, Mason and Washer.

The game Monday was with Missouri Wesleyan, at Cameron. The game was a slugging match, Nebraska having slightly the best of it, winning by a score of 16 to 13. Score:

Nebraska 0 2 2 0 2 1 3 2 4 — 16

Missouri Wesleyan 0 0 0 0 1 3 2 4 3 — 13

Bases on balls—Off Olden 5, off Bliss 4.

Struck out—By Olden 9, by Bliss 5.
Batteries—Nebraska, Bliss and Ringer; Missouri Wesleyan, Olden and Kuhn.

Hit—Nebraska 18, Wesleyan 11.
Errors—Nebraska 8, Wesleyan 8.

The team will be home tomorrow. A howling reception should be given them at the depot. Kansas will play here Memorial day.

LAURA STRATTON, Historian of '00.

The Knox-Beloit debate was won by Knox this year. The Round Table says: "Her victory was not easy, but it was earned, and Beloit is glad to admit that as the three former victories have been achieved by Beloit, so Knox won the fourth debate fairly and honestly."

Harvard is soon to acquire a very unique library of some 15,000 volumes, relating to crusades, and the Latin East. These books are a part of the collection of the late Count Paul Riant, the noted scholar and founder of the "Societe de L'Orient Latin," in Europe.

FACTS ABOUT SENIORS.

Few Statistics Concerning Future

Occupation of the Present

Graduating Class.

Below are given a few facts about the senior class, which were not contained in the class book. Owing to the shortness of time for preparing such work, it has been almost impossible to obtain results that are in any way satisfactory. It has also been found impossible to reach all the members of the class.

As in former years, a large majority of the class will teach in the schools of the state. A still larger majority is uncertain not only as to address but also as to occupation. Considering

JESSIE MACFARLAND, Secretary of '00.

these facts, and also the fact that the Nebraskan-Hesperian board was practically disbanded after last week's issue, and the work has devolved upon a very few, we submit the matter obtained.

Robert Andeson has decided to remain in Lincoln and engage in business. Austin Collett will probably be engaged with the Union Pacific railroad in or about Omaha. Louis Kormeyer will probably remain in Lincoln. Dan Gutleben will either return to the university to engage in graduate work or will go on a surveying party in Colorado.

Paul Weeks will go to Massachusetts where he will continue his studies. Charles Root, Reuben Sampson, J. C. Welch, Arthur Pearse, Fred Williams, and Frank Waterman will study medicine. As yet the exact schools have not been chosen by all but a majority will be found either in Omaha or Chicago. John Herman will be assayer for a Colorado company.

Frank Osborn and George Spear will do post graduate work, the former here and the latter at Chicago. Nettie Henry will teach in the Geneva high school. Charlotte Hullhorn will probably be found at her home in Lincoln, although her plans may be changed. Winifred Hyde will also remain at home in Lincoln. Nona Johnston expects to teach some where in the state, but has not as yet been exactly located in a position. Rose Long and Mamie Mills will both be at their homes, the former in Hebron and the latter in Wahoo. Eleanor Miller will take post graduate work at the University of Nebraska. Birdie Pollock will become assistant principal of the schools at Huntington, Neb. Clara Mulliken says she does not know what she will do or where she will be. Inez Rosa will teach in the eighth grade at Rapid City, S. D., and Katherine Woods will teach the classics to the young Americans in and about Plattsmouth.

Jessie Macfarland is willing to do most anything but does not know what it will be. Anna Vore, Grace Cook, Olive Stratton, Lucinda Burrows, Gertrude Bomgardner, Barbara Burt, Cora O'Connell, Grace Wheeler, Josephine Abbott, Mattie Allen, Mary Ferrand, Maude Ferris, Bertha Wolvoord, Eugenia Mackin, Mary Sherzer say they are going to teach if they can get school boards to elect them at big enough salaries.

Fred Ryons will remain in Cuba for the present where he is doing engineering work for the United States government. In order to get as far away from Ryons as possible, Charles S. Allen will go to Hong Kong, China as a missionary. Alberta Spurck says she can not go as far as Hong Kong, but will do the best she can and still remain in the United States. She will spend her summer teaching at Chautauqua, N. Y., and next fall she will go to the state of Washington where she has a position as physical director. Adelloyd Whiting of Washington also become a physical director but as yet is not certain where she will locate. She will be east during the summer, engaged in this work.

Josephine Abbott will visit at Boulder, Colorado, during the summer. Next winter she will probably teach. Her home address is 1212 K street. Miss Annette Abbott will visit in Minnesota during the summer and attempt to keep cool, but will be at her home in this city next winter. Rena Alderman will also join the teaching force. Her address will be Hurley, S. D.

Elva Dempster thinks she will spend the summer visiting in Beatrice, after which she will come back to her old stamping ground, the university and take post-graduate work. Harriet Dinsmore will be at her home in Hebron. Madge Wiggins will be employed after graduation by the Cereal medicine company of Worcester, Mass., as lecture demonstrator in the interests of hygienic cookery and dietetics. Her office address will be 1300 Union avenue, Kansas City. Harriet Packard will teach the sciences in the Plattsmouth high school. Albert Garringer thinks

JOHN L. LEDWITH, Treasurer of '00.

he will be able to come across something in his electrical engineering line. Margaret Fossler will probably teach in Lincoln. James Boyle will give up library work and go to teaching on condition he can find something that will pay him. Bill Mansfield will go up home on the farm and milk cows by the latest chemical method. John Ledwith will come back to the university to post a little and boss athletics.

Charles Hagenow, another electrical engineer will also be hunting a job. Selma Wiggenhorn will go back to Ashland from whence she came, to avoid
