

J. W. Bates, a former student in the electrical engineering department spent a few days last week at the University. Mr. Bates has been working for the government in South Dakota. He returned to Omaha where he will finish some maps of newly surveyed country.

The Electrical Engineering Society has appointed a committee to meet with similar committees from the Civil and Mechanical Engineering Societies. They will complete arrangements for the formation of a new organization to be known as the University of Nebraska Engineering Society.

Professor Burnett went to Omaha Thursday, October 25, to make arrangements for the Farmers Institute to be held at the university, January 15 and 16. The meeting will be under the auspices of the State Board of Agriculture, the Nebraska Stock Breeders Association and the Farmers Institute.

Music and Picture Department.
H. HERPOLSHIMER CO.

The Palladian debating club met last Saturday evening, with a good crowd. The question for discussion was "Resolved, that the triumph of Democracy would be better for the American people than the continued supremacy of the Republican party." Gordon and Wessel took the affirmative and Johnson and Leightner the negative. Much spirit was shown during the discussion.

The Zoological Club met last Thursday evening in Dr. Ward's office. The program consisted of reports of laboratory investigations during the year. The following papers were read: New North American Hydrachnidae, R. H. Wolcott; The Cladocera of Nebraska, Chas. Fordyce; A New Avian Cestode, by B. H. Ransom; H. W. Graybill; Lunnobiology, r'auktion Measurements and Ticks, Dr. H. B. Ward.

Prof. Lawrence Bruner, who, a few years ago, was sent to Argentine Republic to find a means for the extermination of the locusts there, brought back a large number of reptiles including snakes, lizards and vatraceans. They are now being mounted by Mr. Hunter, and will be placed on exhibition in the museum. The collection which is a rare one will fill between seventy and one hundred glass jars.

Ira D. Kellogg who drew upon his experiences in the Phillipine islands for the material for a novel, has had his manuscript accepted by an eastern publishing house. His book will be called "Under the Palms" and will tell of the customs and habits of the Phillipinos, as well as include a strong plot. Mr. Kellogg can now take his place with the many other university men and women who have produced literary matter of worth.

The Nebraska Oratorical Association has received a communication from the secretary of the Minnesota Debating and Oratorical Association, which is of interest to all students. Minnesota looks very favorably on the plan of having a contest with Nebraska this year, about the 15th of March. Then if everything is favorable a league will be formed and other universities invited to participate. Col-

orado and Kansas are interested and are beginning to agitate the question. Minnesota is very enthusiastic over the idea and gives the assurance of a good financial backing for the first contest. A. C. Lee, secretary of the Oratorical Association is working hard to perfect the arrangements and a contest with Minnesota will soon be definitely decided upon.

The boys of the U. B. D. C. have completed arrangements for a debate with Doane College of Crete. The debate is to be held on the 24th, the question being "Resolved that the U. S. should own and control the Nicaragua Canal." Arrangements were completed for holding the club preliminary and judges were selected. The following question was then debated: "Resolved that the republic would be in greater danger from the election of Bryan than from the election of McKinley."

The librarian has been informed by the census director that the university library has been placed on the mailing list of the census bureau. The bulletins will be mailed from time to time as they are issued. The library has also been placed upon the mailing list of Yale University and from this time on will receive the University Bulletin and Alumni Weekly. These issues are sent to all colleges and schools whose graduates are represented in that institution, so that the frequent request for some means of keeping in touch with the life of the university may be at least partially met.

A University of Nebraska Engineering club is to be organized in Cuba. Several graduates and former students of the University are now situated in the Department of Havana, under the employ of the United States government. They are working in the engineering department on the extensive improvements in progress in that country. Those interested in the club are Col. Dudley, formerly commandant of cadets, J. A. Sergeant, and Mrs. Sergeant, A. E. Karter, Fred Ryons, W. O. Ayer, and J. W. Lytle, '00. Mr. Dudley and Mr. Sergeant are both assistant engineers.

The Debating Associations' new constitution provides for the holding of the first preliminaries by the various debating clubs. Each will select its representatives before December 1. Every man who expects to compete in the finals for a position must come through the clubs. The twenty men from the four clubs will be divided into two divisions. Twelve of these will be selected nine of whom are regular and three alternates. The time for the second contest has not been decided upon. Colorado Missouri and Kansas are the states with which debates will be held.

Dr. Hastings lectured to the Omaha High School last Tuesday, on "Growth and Development of Nebraska Children." Dr. Hastings made some examinations of children between the ages of fifteen and twenty, to get the types. The object in making these examinations is to find out whether school children are normal in this growth. Teachers and parents will know how much work these children can do, and whether they are doing too much work in school. Dr. Hastings has prepared a chart for this work, and it is his desire to have every high school in the state, examine the children in the school, and keep a record of it. More than 1,400 measurements will be sent in from the Omaha high school in the next three weeks.

The University of Minnesota

College of Medicine and Surgery.....

The thirteenth Annual Course of Lectures will commence on the 19th day of September, 1900, and will continue eight and one-half months. The course is graded and covers a period of four years. Medical Hall, the Laboratory of Medical Science, the Laboratory of Medical Chemistry, and the Laboratory of Anatomy are situated upon the Campus. The clinical opportunities afforded by the hospitals and dispensaries of Minneapolis and St. Paul are at the command of the College. For outdoor clinical service a new clinical building has been built in a central location.
