

tile. But he is at fault when he says that at no time are there more than six students in attendance on the Agricultural Dep't of the University as the last Catalogue shows. It is only the lack of funds which prevents the management of this department from filling all available space at the farm with students, eager and anxious to secure the advantages which the department offers.

—On Saturday Nov. 16, Com. A. of the University Cadets met in the armory at 8 o'clock in the morning and receiving their amunition for target practice marched merrily to the battle-field north of the University about two miles. Covering one of the hills more or less with canvass, they took their stand, first at 100 and then at 200 yards distant, to try their skill. Those who were so fortunate as to hit the hill will be found in the table below.

Another trial will take place Saturday, 23rd. The company is divided into platoons and the contest is exciting.

—Some aspirant for college contumely succeeded in gaining an entrance into the columns of the STUDENT and inserting

a local about a certain light haired prep's conduct in Chicago during the session of the N. A. P. A. As Clem Chase was the only student from this school there, of course it reflected on him. Wherever Clem is known this little fiction would pass for its full value—a squib; but to those who know him not, we would say that nothing is more foreign to his character than the conduct ascribed to him in that article, and that we regret exceedingly that the columns of the STUDENT should have been prostituted for the furtherance of such a scheme as injuring the feelings of any student, and hope they will all remember the lines of that old song.—

You must not mind me, what I say,
I hope I don't offend, sir,
I only sling to make you gay,
Its nothing but a joke, sir.

PERSONALIA.

Miss Sadie Harris is studying in Boston, and Miss Armista Wilson in White Water, Wis.

We find on our table cards of Miss Minnie Williams and Miss Codding. We regret our absence. Call again.

Miss Adah Seaman is back again, and the boys are juggling in shoe blacking and hair oil in a way that adds luster to the grocer's eyes.

The STUDENT was favored with a pleasant call from Miss Helen Judkins and Miss May Tebbets, a former student of the college at Des Moines, Iowa.

Miss Eudora May Stone one of the new students took the "Companion" prize for the best poem on "Home." The young lady has made several similar "hits" in a somewhat extended literary circle.

Willie Garber is back again to school after spending a year with relatives in Iowa and indulging in a broken leg and other exciting diversions. He says he is glad to get back again but misses that charming *mista* appearance that used to be around the building and was so attractive.
