

Urban Meanderings.

Large stock new books at FAWELL'S.

Novelties in fine stationery at FAWELL'S.

225 feet front; solid brick going up on 11th street.

Sold, what? Boots and shoes at O. W. Webster's.

Speech by Hon. J. Sterling Morton, Monday night.

KELLEY & Co., are making the finest Photo's in town.

University books and student supplies at FOX & STRUVE'S.

KELLEY & Co., the leading Artists, make a special reduction to students.

Wait till election day, young men. 'Twere, perhaps, not so easy to face the suffragists then.

Say that you are a student when you buy boots and shoes at Goodrich Bros. and you will get them at ten per cent. discount.

Let it be on Record. We mean to say that Mr. C. S. Record has very ably assisted the compositor in getting out this copy of the STUDENT, and is a genuine double-leaded nonpareil (sticker.)

A great many literary societies are being organized throughout the state. This is a good evidence of growth. The value of a well conducted literary society to the young people of any community can hardly be over estimated.

Special meeting of Palladian; irrepressible Junior: "Now Mr. President, every one knows that all these matters are arranged by the boys in caucus. Now we held a caucus down in my room; opposing Junior interrupting: "Who were at that caucus?" Irrepressible; (indignant) "Why, there was Mr. Clark and I and, and—no I guess Mr. Dryden was'nt there." Tableau.

This fellow must be taking the Scientific Course. Listen to the outpouring of his soul:

"O, come where the cyanides silently flow,
And the carbonates droop o'er the oxydes below;
Where the rays of potassium lie white on the hill,
And the song of the silicate never is still.
Come, oh, come!
Peroxide of soda and uranium.

While alcohol's liquid at thirty degrees,
And no chemical change can effect manganese
While alkalies flourish and acids are free,
Thy heart shall be constant, sweet Science, to thee!
Yes, to thee!

Zinc, borax and bismuth, O plus H and C

"O! (K) night with hue so black," says Pyramus in *Midsummer Night's Dream*. Pyramus didn't know it, but he referred to our accomplished and erudite business manager after his adventure with a wheelbarrow of type the other day.

"The wheelbarrow tipped,
And the type had a fall;
While the Bus. Man. declared
He couldn't help it at all.

And did the patient, unwearied compositor cuss and rave at the unfortunate Bus. Man., and comb his hair with the shooting stick after the manner of all ancient and approved comps? Ah no, not this one,—while a glow of forgiveness irradiated his benevolent features, he seized the business manager's hand and told him—to hire a man to distribute it.

THE LIBRARY.

Many valuable additions have been made to the library since the close of last year, especially in the department of History and Mathematics. In the purchase of works on history it has been the object to place the sources of information before the students in order to give them an opportunity for original research. With this object in view, the following volumes, some of which were obtained with great difficulty and at a high price, have been added to the list:

On the Puritan Revolution—Gardiner's Spanish Marriage, 2 vols., Gardiner's Prince Charles and Duke of Buckingham, 2 vols., Noble's Life of Cromwell and Clarendon's Cromwell.

On the French Revolution—Travels through France in 1788—9, by Arthur Young; Von Sybel's French Revolution, 4 vols., Van Laun's History of French Revolution, 2 vols.; Genli's Memoirs.

On the Renaissance—Growel and Cavalaselte's History of Painting in Northern Italy, 2 vols., Vasari's Lives of the Painters' 5 vols., Dieppa and Quatremere's Raphael and Michael Angelo, 1 vol., Napier's History of Florence, 6 vols., Mrs. Dobson's Life of Petrarch, 2 vols., Foscolo's Essays on Petrarch; Drummond's Life of Erasmus, 2 vols., Symond's Renaissance in Italy, 3 vols., Pater's Studies in the Renaissance and Mrs. Oliphant's Makers of Florence.

On Constitutional History:—Kemble's Saxons in England, Sharon Turner's History of the Anglo Saxons, Palgrave's Saxon Period, and his House of Commons.

Miscellaneous Historical Works:—History of the Jesuits by Cartwright, also by Stein Metz, 2 vols., Mitchell's Life of Wallenstein, Mosheim's History of the Church, 4 vols., Knight's England, Michard's History of the Crusades, Translation of Herodotus, Bohn edition, 1 vol., of Thucydides, 2 vols., Philip DeCommines, 2 vols.

In the department of Greek Literature:—Stebben's Thesaurus, 5 vols., and the Transactions of Cambridge Philological Society have been added.

The Department of Mathematics has been enriched by a large number of superior works by the highest authorities on this subject. The following will be of great interest and value to the students of Mathematics: Salmon's Higher Plane Curves, Burlew on Theory of Numbers, Gregory's Differential Integral Calculus, Boole's Laws of Thought, etc., Boole's Differential Equations, Morgan's Calculus, Arithmetical Books, On Probabilities, Todhunter's History of the Theory of Equation, Todhunter's Figures on Earth, Caley's Elementary Treatise on Elliptical Functions, Vega's Table of Logarithms, Everett's Units and Physical Constants, Cliffords Elements of Dynamics, Clausius' Theory of Heat.

The privileges of the library have been extended so that a student may now obtain three books at once instead of two as formerly, and an instructor may on his own responsibility furnish any student of his class with not exceeding three books. Periodicals, also, may now be drawn. These privileges will be heartily appreciated by all the students. The addition of the reading room and rules in regard to department are an excellent improvement on the old system. Formerly the library was crowded with social groups, who, by their conversation prevented study; now, all are quiet and industrious.

All the students buy their books of FOX & STRUVE.
