

Exchange Brie-a-Brac.

We're mashed on the exchange editor of the *Rockford Seminary Magazine*.

We join with our editors-in-chief, in asking that the STUDENT have a managing editor.

The *Wittenburger* arrived for the first time on Dec. 26. It is the same old sheet.

One of our exchanges mentions the publication place of the *Literary Notes*, and spells it "Create."

Number 1, Volume 1, of *College Chips*, a very neat exchange, comes to us from Luther College, Decorah, Iowa. It is got up in good style and English—all except quotation marks.

The *William Jewell Student* shouldn't worry over the contributed department of the HESPERIAN STUDENT. We have such a brilliant corps of writers that we need no help from contributors.

The lady editors of the *Hamilton College Monthly* but voice the sentiment of bygone days. The idea that young ladies and young gentlemen should be separated, until matrimonial overtures are made, is dying out, we are pleased to note. The criticisms of the *Monthly* are extremely antiquated.

The "Table" man on the *Ariel* rather throws light on the mechanical part of the various college journals. In our opinion, if it were not for the clean make-up and style of many "school boy" papers, there would be nothing worthy of commendation. Anyway, let them work on that part which they can do best.

The *Courier* thinks the people of Lawrence are not so good as they might be. It complains of a lack of boarding houses, and especially of the better class; also of a superabundance of price. The state of Kansas should know better than to establish so great an institution in the country, when there are two or three cities lying around loose.

The question going the rounds of the college press is as to whether humorous items taken from other than college papers should be published in college journals. We would be pleased to see the "funny" part of the college papers stopped. It is bad enough to be obliged to listen to the daily jokes of the students without having them rehashed, inflated by addition from such ordinary humorous papers as the *Hawkeye*, *Free Press*, etc., and spread before our tired eyes once in two weeks. Oh, give us a rest!

MARRIED—At Grand Haven, Dec. 20th, '83, Allan W. Field and Miss May B. Fairfield, of Lincoln, Neb.

The wedding ceremony was performed at the home of Prof. and Mrs. Burritt Fairfield by Ex-Pres. Fairfield, the father of the bride, and Rev. Minor W. Fairfield of Muskegon. The wedding was quiet, only the most intimate friends of the family being present. The bride is well known in Hillsdale and has an unusually large circle of friends here who will join in wishing her unbounded happiness. Mr. Field is a popular lawyer and politician of Lincoln, Neb. Both parties are graduates of the Nebraska State University. After a sumptuous wedding dinner at the Cutler house, Mr. and Mrs. Field left on the evening train for their new home.—*Hillsdale Herald*.

Medical Minglings.

We welcome another medical student, Dr. Pierce.

During vacation Prof. Paine gave a series of lectures on bandaging.

Let us hope for the time when all physicians will be sober, conscientious, and christian.

Prof. Latta will resume his discoveries on "Bacteria: the German theory of Disease" on the 7th inst.

Dr. Dinsmore of Omaha is expected to deliver a course of lectures, in the Homeopathic department, on electric therapeutics.

Prof. I. VanCamp will meet his class for the first time after Christmas holidays on the 9th inst. the subject being. The Profs. of the Regular department lecture as before.

Prof. Woodward will likewise meet his class for the first time after vacation on the 8th inst. and will speak of the 'Sympathetic Nervous System in its relationship to materia medica and therapeutics.'

The girl who received tenotomy as previously announced has since been further treated by resection of plantar fascia. She now uses two straight feet in stead of one foot as heretofore, but it will take a year to give usual strength.

Notwithstanding the bitter cold, the reception at the Y. M. C. A. rooms New Years day was quite a success. The well filled rooms were the scene of the best good cheer and in all particulars the ladies quit themselves like women. The medical fraternity was well represented.

Prof. A. J. Shaw resumed his course of lectures on Gynecology on the 3rd inst and was warmly greeted by the entire class. The Professor possesses the happy gift of conveying sound practical instruction, leaving noted points to be read up and adopted in post-graduate days.

Prof. Lowry, during vacation delivered a course of lectures to the students remaining in town Histology or Microscopical Anatomy including instructions in the manipulation of the microscope. Without such a knowledge of the normal tissues no one can become a practical pathologist.

The Professor also exhibited an interesting clinic during vacation

Rum did it:

At Lincoln, Dec. 3rd a fine intellectual looking young stranger intoxicated was precipitated from the platform of a car smashing in half the skull and scattering all his brain. On his person were found his name, W. O'Brien, a ticket from Kearney to Atchison, some money, an express package and a broken bottle. Boys will you drink?

The Y.M.C.A. in the University of Michigan is now regularly sustaining a meeting on Sunday morning and one every evening of the week. The attendance at their Sunday morning meeting is so large that they are compelled to hold it in the University chapel as their room is not half large enough. To avoid this inconvenience and to advance the Christian work in college, they have purchased the most desirable lot in the city, and are now preparing to erect an Association building. Their membership has been increased more this year than for a long time before, a large part of this increase coming from the Medical Department.—*Wa chman*.
