

Mr. L. H. Stoughton has prepared a thesis upon "The Origin of the Pelvis in Amphiuma and Amblystoma." From these studies the theory that the vertebrate pelvis arose as a paired structure receives additional confirmation. The material for the work was furnished by Dr. Kingsley, who has the only lot of amphiuma embryos ever collected.

Scene on pond at Cushman park. Captains Marsland and Peterson realizing the dignity of their rank, undertook to teach the grand army men and cadets how to row a boat as the Indians do. They were not successful, for the boat overturned and they were compelled to swim to shore. We understand the captains have since confessed that they know nothing about rowing boats.

COMMENCEMENT COMES BUT ONCE A YEAR.

The girls are humming, the boys are humming, the exams, they say, are almost here. The birds are singing, the bells are ringing—commencement comes but once a year. The preps are cramming, their tutors —, the Seniors, it seems, have nothing to fear. The Freshies are passing, the Juniors are "mashing"—commencement comes but once a year. Prohibition is winning, the barbs have an inning, the frats, of course, are beginning to fear. The chancellor is scheming, the registrar is beaming—commencement comes but once a year. The co-eds are weeping, their loved ones are sleeping in the gaard tent at Hastings, so we hear. The lieutenant is missing, the captains are fishing—encampment comes but once a year.
