IF our cable advices from Paris, touching the final formation of McMahon's new Cabinet, may be relied on, the prospects of royalism and imperialism, are just now at a very low ebb. Nothing indicates the growing strength of the Republicans, more clearly than the fact that both the Bonapartists and legitimists have been completely locked by the new administration. The predictions of the BEE touching the probable early dissolution of the French Assembly, are now in a fair way of realization. The monarchist factions will be compelled to assent to a dissolution, by the irreconcilable divisions in their ranks, and the Republicans and Conservatives will cheerfully consent to the dissolution, having faith in their ability to return into the next Assembly with more decided majorities.

ACCORDING to the special telegraphic correspondent of the Chicago Tribune "there are 560 applications on file at the White House for appointment to six new paymasters' positions in the army, which are provided for in a Senate bill now pending in the House. The President stated recently, however, that he would appoint, if the bill passed, three from the array and three from civil life, and that ne would select his personal friends. From this umns in length defending himself it would appear that he has against the censures of the recent convention of colored voters. To tell the truth, says the Greeley Tribune, "it is an up hill business to grow fruit in Colorado. The losses of trees, especially of apples, have been frightful." Taking the great loss of fruit trees into consideration, the past year or two, it may appear an "up hill business," but fruit rais-ing has not as yet been fully tested in Colorado. Fruit trees need, and must have protection from forest trees, or otherwise.

San Juan miners are happy over the confirmation of the Ute treaty. The Indians in that section are friendly and peaceable. Of the country ceded by the treaty the Prospector says that it has an area of many thousand square miles. "It is mostly a mountainous region, chiefly valuable for mining purposes, but in it are many fertile valleys and parks which contain thousands of acres of good agricultural and pastoral land.
