PRESIDENT GRANT evidently made a mistake in selecting General Bristow as his Secretary of the Treasury. If Kentucky was entitled to that appointment he ought by all means to have conferred it upon Governor Bramlette.

Nobody in or out of Kentucky is better qualified to handle and disburse the national blessing in disguise. His capacity for creating noble charity syndicates is simply immense, and puts the famou "Pattee" clear in the shade. A fair sample of his unbounded

THE COMING STRUGGLE The voters of our nation,

cane'r was known before,

Are rising from Pacific's straid

To Atlantic's rocey shore.

Why is this mighty change?

What can the meaning be?

The rising of the manual

From northern take to southern sea.

The spirit of old seventy-six
From out our heroes' graves
Forbids a nation drenched in patriots' blood,
Should sink to that of slaves;
The motto which our coins once hore,
Though obsolete long since,
Remain as ever true: not one cent for tribute,
But millions for defense.

Party ties and party laws
are but as ropes of and.
The sights of man to be a man
Should govern Freedom's land.
Then shall our Fing more proudly float
O'er land as well as see,
And nations yet unborn shall gladly great
The emblem of the free.

In tende we'll try to deal,
As man should deal with man,
And while we seek to live ourneves,
We'll sell as cheap as any hody can,

The following is an explanation

of the delay on the trip of the cable steamer Faraday: The Faraday left Portsmouth, N. H., on the 16th of June, and went to Halifax to coal and thence to Forbay to make preparations for landing the shore end for the Nova Scotia and Newfoundland section of the new At-lantic cable. While at Forbay it was found that there was a slight irregularity in the electrical tests indicating the existence of a small flaw in the cable laid to New Hampshire, and it was decided to remove the defect before returning to Portsmouth. The cable was grappled and successfully recovered from a depth of 600 fathoms at a place about 250 nautical miles from Forbay. The piece of cable, containing the flaw, was then taken on board, and, after the removal of this, the electrical tests proved the cable to be perfect. It was then joined together and consigned to the bottom of the ocean. The defect proved to be a small injury to the Centre Possible coil and coursed to the Chicago, July 11. the Gutta Percha coil, and caused by some pointed instrument which had penetrated the cable from the outside.
