## Frazier's Great Remedy

The people of the United States have been humbugged with all kin to of Patent M-dicines, quacks and imposters for the past lew years, in a most shameful manner. The writer of the following is one of the victims, and wishes to following is one of the victims, and wishes to present a very plain case.

Believing that by cleansing the blood was the only true way of benishing disease, and being a great suffere, from weak longs and a scrofulous affection, and after trying many kinds of Patent Medicines and the most eminent Physicians, I commenced doctoring myself, and at last d scovered a Blood Scarcher, or Root Bitters, which not only gave me immediate relet, but after a few weeks effected a radical cure. The cough left me, my lungs became strong and sound, my appetite good, and the se ofulous disease had disappeared. Feeling confident that my Discovery possessed wonderful healing virtues, I gave it to others affliceed, and found it effected the most miraculous cures in thousands of cases, not alone curing Coughs, Consumption, Ashima, Catarrh, Scrotula and Weak Lungs, but all diseases caused from humors in the blood. The demand from my friends and others hearing about these Bitters Becoming very great, I commenced putting them up for sale, calling hem FRAZILE's Bitters becoming very great, I commenced put-ting them up for sale, calling bem FRAZIŁE'S ROOT BITTERS. I was at first backward in presenting either myself or medicine to the public not being a Patent Medicine Man, but I am getting bravely o er that. I have sold thousands of bottles of my koot Bitters, and it is my deeire and determination to place the same within the reach of every suffering man,

globe.

The grand principle that operates in these Root Bitters is the power they possess in cleansing the turgid blood and banishing the vile homors from the system. Root Bitters are strictly a Medicinal Preparation, compounded from roots combined with herbs and plants, many of which were used in the good oid days of our forefathers, when people were cured by some simple root or herb, and when Calomel and other poissus of the mineral kingdom polsens of the mineral kingdom

some simple root or herb, and when Calomel and other poisons of the mineral kingdom were unknown.

They open all the natural passages of the body, cast out disease, take away all sickness and build up the system with pure blood, hence they must reach all diseases by purification and nourishment.

No person can take Root Bitters and remain long answell. Victory upon victory they have gained over disease and death in all stations and conditions in life. They are constantly effecting cures of the utmost importance. For Consumption, Astima, Serofulus, Serofulus Eruptions, Catarrh, Weak Lungs, i ost Vitatity and Broken-down Constitutions, these Root Bitters are unive saily admitted to be the most wonderful Medical Discovery known to the world. Their pectoral healing properties penetrate every portion of the human frame, soothing the Lungs, strengthening the Stomach, Kidneys and Liver, cleansing the blood from every kind of humor. No other medicine will cure Chronic Rheumatism, Neurolgia, Heart Disease, Fits, Dizzia ss, Headache Dyspepala, Fever and Ague, Costiveness, Piles, Urinary Diseases, Kidney Bleese, and Liver Complaint, so quickly as this Root Bitters. All such diseases are caused from a bad stomach and a poisonous condition of the blood. For weakly, nervous young men, sufering from loss of memory, loss of energy, etc., caused from abuses in early life, and to delicate females, these strengthening Root Bitters are especially recommended. ## American CYCLOPAÆDIA New Revised Edition.

Entirely rewritten by the ablest writers on every subject. Printed from new type, and illustrated with Several Thousand Engravings and Maps.

THE WORK ORIGINALLY PUBLISHED UNDER THE NEW ANKHICAN CYCLOPARDIA Was completed in 1868, since which time the wide circulation which it has strained in all parts of the United States, and the signal developments which have taken place in every branch of cience, literature, and art, have induced the editors and publishers to submit it to an exact and thorough revision, and to issue a new dition entitled, The AMERICAN CYCLOPAL-Within the last ten years the progress of dis-covery in every department of knowledge has made a new work of reference an imperative

made a new work of reference an imperative want.

The movement of political affairs has kept pace with the discoveries of science, and their ruitful application to the industrial and useful erts said the convenience and refinement of socii lills. Great wars and consequent revolutions nave occurred, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily been ended, and a new conrae of commercial and industrial activity has been commenced.

Large accessions to our geographical knowedge have been under by the indefatigable explorers of Africa. After Mrs. Morton had been gone about a month, I had a visit from Mr. Ayscough. He was a pale and interesting young man, very refined and educated, evidently much influenced by his sorrow. He talked incessantly about his wife, and was interested in my admiration of her portrait he took me in to show me some of the contents of the trunks. To my horror I found that some very valuable jewelry and silver comprised part of that mysterious luggage never been unpacked. "But Mr. Ayscough," I exclaimed, "you are not going to leave these valuable things here in this

edge have been made by the indefitigable explorers of A frica.

The great political revolutions of the last decade, with the natural result of the lapse of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars. Great battics have been fought and important sleges maintained, of which the details are as yet preserved only in the newspapers or in the transient publications of the day, but which ought now to take their place in permanent and authentic history. In preparing the present edition for the press, thas accordingly been the aim of the editors to bring down the information to the latest possible dates, and to furnish an accurate account of the most recent discoveries in science, of every fresh production in literature, and of the newest invention in the practical arts, as well as to give a succinct and original record of the progress of political and historial event.

The work has been begun after long and careful preliminary labor, and with the most ample argument the cricinal atterent pulses have

resources for carrying it on to a successful termination.

None of the original stereotype plates have been asad, but every page has been printed on new (ype, forming in fact a new Cyclopædia, with the same plan and compass as its praceessor, but with a far greater pseuniary expenditure, and with such improvements in its composition as have been suggested by longer experience and enlarged knowledge.

The illustrations which are introduced for the first time in the present edition have been added not for the sake of pictoris' effect, but to give greater lucidity and force to the explanations in the text. They embrace all branches of science and natural history, and depict the most amous and remarkable features of scenery architecture, and art, as we'l as the various processes of mechanics and manufactures. Although intended for instruction rather than embellishment, no pains have been spared to insure their artistic excellence: the cost of their execution is enormous, and it is believed they will find a welcome reception as an ad-
