ONE plank in the Kansas Repubcan platform should commend itself forcibly to Repuclicans in Nebraska. It reads as follows :

Resolved, That the peril of the government lies not so much in high ambitions as in low dishonesties, and the pressing duty of the day is to secure honesty and purity in the public service. We commend the courage of the Republican party in instituting investigation of corruntions in office, sparing tion of corruptions in office, sparing neither friends nor foes, and we deneither friends nor foes, and we de-mand such legislation as will bring to certain punishment any officer who, being intrusted with the charge of public funds, appropriates the same to his own use, or fails to properly account for them. Em-bezziement is theft, and ought to be punished as such."

ACCORDING to Redfield's postal organ there are not a half a dozen be fit, nor to have the characpublicans in Omaha that believe in Postmaster Yost's guilt. This position. Dr. Renner has long ago forfeited his claim on the German would simply imply that the Republicans of Douglas County are sition as editor of a German paper, either all knaves or all idiots, and to use the vote of the Germans to our intimate acquaintance with promote his own personal political schemes. Has he a claim on the Seenator Hitchcock has his backing?

KANSAS Republicans, in their platform, pronounce most emphatically against a third term for Presidents. Nebraska Republicans will doubtless follow their example.

THE impending political campaign in Nebraska is destined to become very interesting and diversified. Already we have had calls for State Conventions from four political organizations, and the cry is still they come. A fifth political party has just taken the field and promulgated its call. A People's

State Convention is to be held at Lincoln, on the 7th of September. Inasmuch as we are not familiar with the aims of the leaders of this latest departure, it would be imposto prognosticate its effect upon the political chess-board. It is very gratifying, however, that the dear people will have such a variety of tickets to choose from.

THE apologists and strikers of the postal ring are resorting to every possible subterfuge to prevent an honest expression of sentiment on the part of the Republicans at the coming county convention. Their chief argument is that it is not within the province of political conventions to give expression of their views touching the mismanagement of public officers. Now we claim that it is not only the E. ROSEWATER, Publisher province, but the duty conventions to approve and condemn the acts of public men who have in any man-

ner disgraced the party. Such has been universally the practice all over the Union. In the city of Toledo a Republican convention, not more than six weeks ago, passed resolutions denouncing the conduct of Congressman Sherwood in appointing an odious and corrupt person as postmaster, and those resolutions were carried to the Congressional Convention, and Congressman Sherwood was defeated for renomination. Now it is not proposed to carry the Omaha postal case to the state Convention, but it is emin-Republicans express their disapproval of postal whitewashing and 5 the removal of honest officials for

THE good people of Cheyenne County will doubtless be surprised to learn that they are indebted for their political preponderance in the various State Conventions to a printer's bull. On the 10th day of June, when the BEE published the official copy of the State census of 1874, a printer's bull was made by the typo printer's bull was made by the typo in crediting Cheyenne County with found ourselves at Gallatin City at 1449 inhabitants instead of 449 as shown in Secretary Gosper's certified copy. The mistake was discov-.. 6 ered and corrected in the next issue of our daily, but this did not prevent the Omaha Republican and all other State papers from embodying the original bull in their census column.

It is evident that the cairman and secretary of the Republican State Central Committe who were charged with making the estimates of representation for each county according to the basis agreed upon by the committe, made their calulations upon the erroneous figures in the printed census reports. Thus SENATOR ALLEN G. THURMAN three delegates to the State convention, when m fact they are only

entitled to one delegate. The same error has been propa gated through all the calls issued by the various political parties; and Thurman has always favored early | Cheyenne county is thus indebted to some careless printer in the BEE

[Communicated.] LINCOLN, August 28.

The Omaha Herald of yesterday contained a communication dated. Lincoln, August 25, in which I find the following sentence:

State, or they are going to secede from the party. They have sent forth their proclamation to this Hon. Bruno Tzehuck, of Sarpy, a tor is backed by a strong combination, and will not only make a close cast a bigger vote in the State than any other man they can nominate, for he is well and favorably known

throughout the State. I don't know if the Germans are going to recede from the party; this depends upon the actions of the next Republican State Convention upon a sound, just, and liberal plat-form; and the nominations of houest and able men. If the Couvention will not or cannot fulfil these you may be sure they will leave the

thing more, and that is, if Dr. Fr. Renner is nominated as secretary of state, it will materially help the Democrats to elect their candidate for this office, for the Doctor is well known throughout the State, not to ter to vote. Correspondence of the BEE. BOZEMAN, M. T., Aug. 14. EDITOR OMAHA BEE:

we took a conveyance for the Mammoth Springs in the geyser country. For the first 15 miles we passed through a mountainous country, over low passes and then reach the Yellowstone valley and pass up the valley to the Mammoth Springs, here words would fail to convey the idea of the scenery that meets the eye. In looking towards the mountains we see mountains of steam ascending from the springs that reach from the valley to near the summit of the muntains. Near by we see what is called the specimen mountain; here we find all kinds of beautiful crystals and petrifications and lime formations that would be an ornament to any cabinet. If people in the States knew what grand scenery and curiosities were to be found here, and so easily reached, it seems to me that hundreds would avail themselves of the opportunity and see the greatest wonders of the world. These springs are distant from Bozeman some thirty mlles, and a good road all the way. The geyser country lays some forty-five miles distant from here and will be accessible with wagons by another year. We

noble red man, our party seemed to weaken on going to the Geysers, although many were on their way there and assured us that there was no danger whatever from Indians, as they seem to have great fears of that part of the country, and think this is the abode of the evil spirit. On the morning of the 13th of August we retraced our steps and made our way towards Bozeman, arriving there in the evening. Bozeman is a beautiful village of some 600 inhabitants, situated between two mountains and near the head of the Gallatin river, or where ently proper that Douglas county the river passes through the mountains. We found snow visible on the mountains on either side of the village, and the weather was rather the removal of honest officials for their fidelity to the public service. Here at Bozeman we met two Omaha men, viz: S. R. Johnson, of the firm of Steele & Jonhson, and C. C. Housel, of the firm of O. C. Housel & Co., who are looking over the country and seem to be well pleased with Montana. On the morning of August 14th we took seats in the coach of P. B. Leaving the Jefferson valley we pass over low foot hills and mountainous country, reaching Radersburg for dinner, some 54 miles from Bozeman. This place is in Crow Creek valley, and is surrounded by placer mines and some excellent quartz mines, one of which is be-ing worked very successfully by Messrs. Talk about your big potato patches in the States, as much as you please, but after all few of them can beat one little patch a few miles from Denver. .The owner is popularly known as "Potato Clark," but who's correct cognomen is Rufus Clark. He has one hundred and fifty acres of potatoes, which will produce from 25,000 to 80,000 bushels. Mr. Clark has expended over \$2,000 to prevent the ravages of the potato bug this year.

During the snow storm on Pike's Peak last Thursday, a man by the name of Morrison, who was making the descent, lost his way, and in his wanderings fell into a chasm twenty-five feet deep. In the fall he berocks that it was impossible for him to extricate him self, and in this terrible and painful condition he reremained until Saturday night, when he was found and brought to Manitou. Fortunately his pockets contained two slices of bread and meat, which was his only food during the period mentioned.

A band of Sjoux about ten days ago committed an outrage near the eastern line of the territory, that has rarely been equalled in barbarity. They caught four unfortonate laboring men that were going from town to town in search of work on the Atchison, Topeka and Santa Fe railroad, and, after butchering them, scalped and otherwise mutilated two, and burned the hearts out of the others. They then burned the

railroad bridge near Aubrey station. The bodies of seven, a few days afterwards, were brought into Dodge City, supposed to have been mur-dered by the same band. A block of gold ore, three feet wide, seven feet long, weighing twelve thousand pounds, and worth several bundred dollars per ton. was thrown out by a blast, Friday, in the far-famed Gregory mine, which, it is assumed, is the strongest and richest gold lode in the country. Efforts were made by the miners,

says the Central Register, to raise the enormous block to the surface intact, but even after it had undergone a good deal of trimming, it was found too large to admit of being raised through the shaft, and too heavy to be safely entrusted to the hoisting apparatus. The mass was so shattered as to destroy its value as a specimen.
