GOVERNOR VANCE, of North Carolina, is the subject of more or less criticism pecause of his indulgence in a little harmiess levity. The dignified Governor of Virginia asked permission to pass through North Carolina with a company of soldiers who proposed to arsist at the calebration of Washington's birthday in Charleston. Vance replied, "Permission granted. - Be virtuous and you will be happy-but you won't have much fun." The Virginian was shocked; the reply was given to the papers, and now Vance is catching it all around.

not long since the New York Tribune spoke of the matter as follows: A graduating essay may be made as useful as a matrimonial advertisement, if a country editor will only be good enough to publish it. A young lady in Biddeford, Me. wrote a beautiful one last summer; took great pains in copying it, so as to give every "g" and every "y" a long loop; linked the pages with delleste blue ribbon, and then read it with such charming grace that an editor published it in the paper. and Herbal Juice, Anti-Billons Granules. THP "LITTLE GIANT" CATRARTIC, or Multam in Parve

The novelty of modern Medical, Chemical, and Pharmaceutical Science. No use of any longer taking the largo, repulsive, and naccous pills, composed of cheap, crude, and bukey ingredients, when we can, by a careful application of chemical science, extract all the calhartic and other medicinal properties from the most valuable roots and berbs, and concentrate them into en ustard seed, that can be readily swallowed by those of the most sensitive stomachs and fas-lidious fastes. Each little Purgartive Pelles represents, in a most concentrated form, as much calcurate power as is embodied in any of the large pills found for sale in drug-shops. From their wonderful cathartie power, in comparison to their size, people who have not tried them are ant to suppose that they are harsh or drastic in effect; but such is not at all the case, the different \$500 Reward is seriely offered by the pro-prietor of these Policis, to any chemist who, upon analysis, will find in them any caloned or other forms of mercury, mineral poison, or in-jurious drug.

Being entirely vegetable, no particular sie without disturbance to the constitution, diet, or occupation.
