

A CRAFTY COMMANDER

The Peruvians fill the Enemy With Pruit and Blow Them To Atoms.

A Provision Boat Loaded With Dynamite Demolished the Chilean Transport.

Terrific Force of the Explosion One Hundred and Fifty Lives Lost.

PANAMA, July 24.—The latest advice, brought by the steamer from the south Pacific, give intelligence of the destruction of the Chilean transport "Loa," in the Amazon as was previously announced. The demolition was attended with terrific results, the vessel having got foul of a torpedo which was blown by one of the provision boats in the bay of Callao. The steamer may be assumed to be as follows: From the time the Chilean fleet has been on the coast of Peru it has been noticed that the officers and men were particularly partial to fruits and vegetables, and being always careful to distinguish between the market boat of a natural merchant vessel and the coasting boat of a Peruvian officer. At last the Peruvian commander hit on a plan to turn it to some practical account. Procuring a suitable launch, he put a false bottom raising springs placed a top of the weight of the cargo. When it was loaded with a very choice assortment of fruits, vegetables, etc., and towing it out into the bay, he ordered it to be towed to the launch. The launch floated about the Chilean fleet, but to the notice of the officers and men in the evening, a boat was sent out to bring it in. The "Loa" was doing duty as a provision boat, and was making toward it, made for it. This the boat from the shore had a hasty retreat, the "Loa" toward two boats to take in the prize, and it was brought alongside and the discharge once commenced. As the launch in the launch was diminished the machinery in connection with the torpedo was set free and in a moment 300 pounds of dynamite exploded and the "Loa" was almost lifted off the water. The effect, as described by those who were witnessing the operation with breathless interest from the shore, was awful in the extreme. Every house in Callao was shaken to its foundation and every ship on the bay shivered as though a fearful earthquake had spent its fury upon them. The fatal splash appeared to have been a great one, and the water seemed to have covered the sea. At this time the "Banco," "Euclaida," and the "Huscar," were some eight miles distant from the scene and could not render any assistance, but were lowered immediately and proceeded to the rescue of those who were seen in the water. The boats succeeded in picking up thirty-five men in all, but the rest of the crew, it is thought, may have perished. At least one hundred and fifty men perished. The only officers saved are the second commandant, the doctor and the chaplain. A corps of about twenty men from Lima sailed had agreed to allow foreigners to leave Callao in neutral vessels. Some of the Peruvians have made a great objection to their leaving and in ten or twelve thousand foreigners in Callao and Lima will have to remain. Some of the Peruvians are of leaving Callao, fearing more torpedoes.

FIERCE FIRES OF THIRST.

The Fasting Doctor Constantly Craving for a Wet.

A Secret Corps of Watchers on Guard.

Special Dispatch to The Bee. NEW YORK, August 3, 4 p. m.—Dr. Tanner was reported this morning very weak, but in better condition than expected. He is so far gone, however, as to be completely exhausted after any exertion. It is thought he has been drinking too much water of late, but the force that consumes him calls imperiously for instant satisfaction. Not being able to drink sufficient water for his needs he sponges his face and wraps wet towels around his head hoping that to absorb a small amount of moisture. Only four days from this noon and Tanner will have completed his task, which is to fast until he is dead. He is very weak and his health is such that he is unable to keep quiet and not to waste his strength in exercise.

A secret and independent corps of watchers was organized some time ago, to watch the fast of Dr. Tanner and to see that he does not eat, and, as certain, if possible, whether the faster was receiving food from some unknown source. Tanner's every movement was being watched, and it is believed that nothing has occurred to give the slightest ground for suspicion.

Special Dispatch to The Bee. NEW YORK, August 4, 1 a. m.—The fast of Dr. Tanner is still being watched, and it is believed that nothing has occurred to give the slightest ground for suspicion.

Major Walsh says Sitting Bull was killed in 1880, and the major was presented with his famous war bonnet by Sitting Bull, who said, "take it, my friend, and use it as a reminder to have for you some important provisions from Sitting Bull to both the Dominion and United States governments, which he will make public at the proper time."
