BONNER'S HORSTS. WHAT THEY COST.

THE FASTEST COLLECTION OF ANIMALS— N. Y. Cor. Indianarolis Herald. Gentlemen of refinement taste and wealth are given to indulging some particular fancy, mania or hobby to tunes on fine pictures and bric-a-brac, some collect antique books, both old and new, while others invest largely in diamonds and other precious gems.

And these are hung, cased and cheracter and the many interesting happenings too the fine many interesting happenings too to contain a sincle particle of Marcuay, or they had knocked one guard down and the fine world.

The Cheapest, Purest and Best family Meditate in the World.

For DYSPEPSIA, CONSTIPATION, Jaundice Billious Attacks, SICK HEADACHE, Colic, De pression of Spirits, SOUR STOMACH, Hear Burn, Etc., Etc.

This unrivalled Southern Remedy is warranted not to contain a sincle particle of Marcuay, or 1-2 in diamonds and other precious gems. admirers as treasures of the highest order. But the world is made of many men of many minds. While 11 1-2 works of art are loved by some, they give back no affection in return to the wner. Mr. Robert Bonner, the widely known connoisseur, has an expen-\$20 00 sive but humane fancy for horses. They are not only loveabla, but loving, and give affection in return for the tender care and admiration bestowed upon them. No gentleman thanlively for Dr. Walker and family. 22 00 in America possesses this extravagant taste and gratifies it so rovally as Mr. Bonner. Nothwithstanding he already owns over twenty of the most valuable and best known horses in the country, he is continually making additions to the collection whenever he comes upon one that strikes his fancy. No one is ever, under any circumstances, permitted to run upon public track, but is only driven for the pleasure and amusement of the owner, who derives no benefit other than enjoyment. Dexter, the oldest of the animals, was twenty-two years old last May, and, although he still retains his great beauty, has lost his good disposition, for he is awful cross and curls his haughty lip and shakes his aristocratic head most significantly three times each week, and is as fast Rarus is as well known as Dexter, and with Music, a beautiful chestnut,

Major Morton 3 75 is a superb bright bay, handsome, rapid and valuable. May Bird is a shapely creature as black as a crow, but as graceful as the bird is 40 awkward, and travels as well 2 50 under saddle as in harness. 2 50 Moslev is another beauty; bay, with black mane, tail and feet, and soft, gentle eyes, which are very at-4 00 tractive. Grafton is a 2:15 trotter, 1 25 and, like Jce Elliott, is as high priced 30 00 as fast. Pocahontas is known far and wide. Elsie Venner rnd Lucy Colyer are wonderful travelers, with fine re-18 cords, and are valued away up in the thousands. Maude Macy is a recent addition to the stables, and is a gem in every sense. Emma B., pamed for Mr. Bonner's only living daughter 8 00 is "too darling for anything." She is 40 00 a light chestnut, with a satin coat, the 50 00 | trimmest feet and legs, and prettlest 100 00 ears, the mildest, most intelligent eyes, and the carriage of a handsome woman. Mr. Page says he was an awful stout fellow, and but for luck would yesterday morning have made matters more How Railroads Eat Up Forests.

ircinnati Commercial.

But few people comparatively have my idea of the amount of timber used in the construction of a single railroad. We hear that our forests are rapidly disappearing, and we know that material for building and fuel causes the sacrifice of many leafy monarchs of the forest; yet only the nitiated know that it yearly takes 200,000 acres of forests to supply ross-ties for the railroads of the Inited States. We interviewed a gentleman who has been in the busi ness for 13 years, and concluding that his observations and experience would be of in frest, we give the substance of his talk. It takes 15,000,000 ties to supply the demand on our railroads, for which, on an average, the contractors get 35 cents apiece, making in the aggregate \$5,250,000. In building a new road the contractors igure on 2,700 ties to the mile, while t takes 300 ties to the mile te keep a constructed road in repair. Contract ers, of course, buy pieces of timber and as near to the proposed line of road as possible, paying for the timber an average of about \$20 per scre, or giving the proprietor of the land 10 cents for every tie gotont. The average of a good piece of timber land is 200 ties to the acre and 12 ties to the tree. The size of a cross-tie diff-rs on different roads, but the usual size demanded is eight feet six inches long and eight inches face. White or borr

oak is considered the best timber for the purpose, although cherry, maple, ash, and even locust, have been used. The last named were first used on the Little Mismi railroad, and after a time thrown aside as unfit for the purpose. Railroad men much prefer ties newn out with an axe to those sawed in a mill, and many contend that the first named will considerably outlast the sawed ties. This theory is probably a mistaken fallacy, as sawed ties have been placed alongside of hewn ties, and remained sound twice as ong. This business gives employnent to an army of choppers, who are paid 10 cents apiece for each tie. A continued practice makes the choppers

pers were paid 12½ cents spiece. Although the contractor nets 35 cents apiece from the railroads for each tie, still there is a less of from 5 to 7 per cent. on dockage and stealage. An inspector is sent by the company to inspect the ties. This is generally a clerk from some of the offices, who frequently knows but little as regards the strength or durability of timber, and as a consequence, some of the best ties are docked and only bring 20 cents apiece. The stealage is where the section men put in new ties which have not been inspected and received, and fail to report the use of the same to the roadmaster. Most all cross tie men also mostly used. SANTA CLAUS FOUND.

Greatest Discovery of the Age.

Wonderful discoveries in the world have been made Among other things where Santa Claus stayed,

Birds with the hues of a rainbow were found.

He drove up a team that looked very queer,

Twas a team *fgrasshoppers instead of reindeer, He rode in a shell instead of a sleigh,

But he took them on toard and drove them away. He showed them all over his wonderful realm,

And factories making goods for women and men Furtiers were working on hats great and small. To Bunce's they said they were sending them all-tris Kingle, the Glove Maker, told them at once, All our Gloves we are sending to Eunce,

Santa showed them suspenders and many things
