IMPORTANT SHIPPING QUESTION.

Special Dispatch to the Bee.
—WASHINGTON, September 11.—1 a. m.—A committee of two, representing the American ship builders and vessel owners association, had an audience with assistant secretary of the treasury, French, on a question of great importance to the American shipping interest on the great lakes. The question relates to the enrollment of barges, and it is asked that an old treaty decision be reversed. The committee claims that the provision applies only to barges, etc., built and owned in the United States. The existing treaty, however, prevents American citizens to buy, in Canada, schooners and such other vessels as are adapted for the purpose of bringing them to the United States, and using them for their masts and use them as barges. As such vessels can be bought in Canada much cheaper than they can be built in this country, the committee contends that it is doing much damage to American shipping interests on the lake, and will, no doubt, finally break it up unless department rulings are not reversed. The committee presented to the assistant secretary a petition signed by several hundred owners of vessels on the lakes, representing an aggregate of 207,534 tons and valued at \$29,000,000. The committee will continue their arguments and a decision will probably be reached early next week. The indications are that the decision will be favorable to the committee.
