

FOR PRESIDENT: JAMES A. GARFIELD, of Ohio.

FOR VICE-PRESIDENT: CHESTER A. ARTHUR, of New York.

PRESIDENTIAL ELECTORS.

GEORGE W. COLLINS, of James County, Va.

JAMES LAIRD, of Adams County, Pa.

JOHN M. THURSTON, of Douglas County, Neb.

REPUBLICAN STATE TICKET.

For Member of Congress, EDWARD K. VALENTINE.

For member of Congress (Contingent), THOMAS J. MAJOES.

For Governor, ALBINUS NANCE.

For Lieutenant-Governor, E. C. CARNS.

For Secretary of State, S. J. ALEXANDER.

For Auditor, JOHN WALLICH.

For Treasurer, G. M. BARTLETT.

For Attorney-General, C. J. DILLWORTH.

For Commissioner of Public Lands and Buildings, A. G. KENDALL.

For Superintendent of Public Instruction, W. W. JONES.

DISTRICT TICKET.

For Attorney—Third Judicial District, N. J. BURNHAM.

The Sultan's motto is never to do to-day what he can just as well put off until to-morrow.

The Ohio republicans are hopeful of gaining four congressmen in next Tuesday's election.

From the contradictory statements given in the latest school difficulty, it looks very much as if somebody was Lyon.

A few more Warren speeches and Fowler interviews from General Grant will make Hancock crawl in his hole and pull the hole in after him.

The "329" posted on dry goods boxes and fences means the number of times the democrats voted against re-emption and prosperity.

GENERAL PHIBBS, who took two months to accomplish a march which General Roberts made in two weeks, has been summoned from Candahar to India to explain his conduct.

ENGLISH has given the spigot another twist for the benefit of next Tuesday's election. The \$5,000 represents the amount extracted from seven workmen of Indianapolis by this miserly tax title and mortgage feud.

The scheme of John Kelly for assuaging politicians and firemen in New York city in the interests of Hancock and reform, is not working smoothly. Many of the policemen demand their money back, and a large number absolutely refuse to turn in any money at all.

The Irish landlords have appealed to the Lord Lieutenant for protection against their tenants. Additional troops will shortly be sent to the barracks in the disaffected districts. The feeling of sympathy for Ireland is said to have been greatly checked by the recent murders and agrarian outrages.

AUGUST BELMONT, the agent of the Rothschilds and the natural son of one of the firm, has given \$50,000 to elect Hancock. The money is said to have come from the London branch, who desire to create a distrust in the credit of our government and then make vast sums of money out of the panic which ensues. August is used to be throwing around large sums of money. He is said to have secured his first wife only after writing out a check for \$200,000 in favor of her father, who didn't quite like Mr. Belmont's birth.

The juvenile editor of the Republic makes an underhand stab at Carl Schurz, who is now doing his best to advance the election of Garfield and Arthur, and quotes his sentiments on civil service reform in 1872. The juvenile editor of the Republic was then tipping his childish treble for Horace Greeley, and is no better or inferior republican to-day than he was then, and is the last person to attack the republicanism or inconsistency of Secretary Schurz.

THERE are two classes of citizens who should be particularly interested in the success of the republican party in the coming election. We refer to the business men and the mechanics who depend upon good times for good profits and good wages. It is pleasant to note that both these classes are falling rapidly into line in the eastern states and are prepared by their votes to do battle for a policy which fosters industry and upholds the national credit. The fact that American laborers and mechanics receive nearly double the wages of laborers and mechanics in England is largely due to a tariff policy to which the democratic party are persistently opposed and which they are pledged to destroy. The fact that we have an abundance of gold and silver, and a paper currency convertible at any place in the world into gold and silver is due to the urgent and persistent efforts of a republican congress and a republican secretary of the treasury. In short, the present prosperity of the business and industrial interest of the country is inseparably bound up with the record of republican principles put into operation by republicans. The business men of New York city and the mechanics and laborers of Paterson and Pittsburgh are united in a common cause during the present campaign, to continue in power a party who believe in good wages for bread winners, good finances and an unshakable public credit.

THE SCHOOL MUDDLE.

This paper has been the consistent friend of the public schools of Omaha. It has never used its columns to weaken or destroy public confidence in these schools, and it never has sought to advance the interests of any faction in the school board, or any teacher, to the detriment of the system. We have favored the radical change in the management of the schools which has taken place this season, because we believed that a more vigorous administration was absolutely necessary. We regret exceedingly that the changes made this fall have in several instances brought discord into the board, and have given rise to crimination and recrimination that cannot fail to cripple the efficiency of our schools. The election of Mr. Lyon as principal of the high school, we will be remembered, viewed by THE BEE as a questionable experiment, not because we had any prejudice against Mr. Lyon, but because we believed that the principal of the schools of a small town like Iowa, was not likely to be up to the standard demanded by the high schools of Omaha. The school showed that our fears were well grounded. Mr. Lyon after resigning his position at Adams, came to Omaha and failed to satisfy the board of examiners as to his qualifications for teaching the high school grade. He was, however, privately informed by members of the board that they had no doubt of his ability and fitness to teach the eighth grade. Accordingly the new superintendent, Mr. Lane, assigned Mr. Lyon temporarily as teacher of that grade. The fact is, however, that the law requiring each teacher to have a certificate is imperative, and the board of education has no right to elect any man as teacher until he has stood the examination and exhibited his certificate. Had the board merely filled the position temporarily occupying by Mr. Lyon with a teacher holding an eighth grade certificate, Mr. Lyon would have had no cause of complaint. In common with every other teacher he had the right to demand an examination for any grade and the duty of examiners were bound to issue a certificate if he passed. But the board of education laid itself liable to just criticism when they created a new office, and after electing Mr. Beale to that position assigned him to the place occupied by Mr. Lyon. If Mr. Beale was properly qualified for that position he should have been required to stand his examination like any other candidate. To create a new office for him under any name gives rise to the suspicion that there was an underhanded deal somewhere. And this brings us to a very serious question concerning the management of our schools. The main object of the board of examiners was to afford an impartial tribunal to all teachers who seek employment in our public schools. For this reason the law should not limit the selection of examiners to Omaha or even to the state of Nebraska, but allow their selection to made anywhere in the United States. The board of examiners are supposed to know no candidate nor their relations to a member of the school board, the church or any political party. They are expected to rigidly examine each candidate in the branches of instruction pertinent to the grade he or she desire to teach. The questions propounded elsewhere by a citizen of Omaha concerning the examination and appointment of teachers are not mere gasconade. The charge that there are teachers now in our schools who have never passed examination has been admitted to us by members of the board. This is a violation of the letter and spirit of the law that will not be tolerated by patrons of the schools and taxpayers. They will insist that the board of examiners shall be impartial, that the questions propounded to each teacher in any one grade shall be pertinent to that grade and that every teacher who is capable of answering those questions shall have a certificate. No person should be allowed to teach in our schools who has failed to procure a certificate of competency, and among those who hold such certificates only the most efficient and industrious teachers should be employed. The sisters, cousins and aunts of members of the school board should be placed on the same plane as any other class of teachers. Supermenaries must be weeded out, and only the fittest allowed to survive the weeding out process.

OCCIDENTAL JOTTINGS.

The whaling season has opened. The whalers think the season will be a prosperous one.

New discoveries of gold-bearing quartz are daily being made in Magalia and Yankee Hill mining districts.

L. Moulton, of Colusa, has 60,000 sacks of wheat, of his own growing, piled up on his wharf waiting for more favorable prices.

The Tulare settlers are not partial to the railroad. A stage line has been put on between Visalia and Hanford and gets a good patronage.

The Wilmington railroad is soon to be entirely relaid with steel rails, the material is already distributed along the track for a number of miles.

A Nevada county nurseryman, a few months since, shipped 100 straw-plants to Japan, and now learns that they are doing fairly in the land of their adoption.

The owner of a large tract of tule land on the border of the Sacramento river, has been endeavoring for some time past to sell it or lease it to Chinese. The Celestials finally took the land and are about to cultivate it.

The recent introduction of the wild yak to the foothills of Butte county, has been a success in every respect. The genial climate and rich pasturage of that section of the county is peculiarly adapted to the growth and development of this animal.

The owner of a large tract of tule land on the border of the Sacramento river, has been endeavoring for some time past to sell it or lease it to Chinese. The Celestials finally took the land and are about to cultivate it.
