

THE DAILY BEE

E. ROSENWATER, EDITOR

NATIONAL REPUBLICAN TICKET

FOR PRESIDENT: JAMES A. GARFIELD, of Ohio.

FOR VICE-PRESIDENT: CHESTER A. ARTHUR, of New York.

PRESIDENTIAL ELECTORS. GEORGE W. COLLINGS, of Kansas.

REPUBLICAN STATE TICKET. For Member of Congress, EDWARD K. VALENZUELA.

For Member of Congress (Contingent), THOMAS J. MAJORS.

For Governor, ALBINO NANCE.

For Lieutenant-Governor, E. C. CAHNS.

For Secretary of State, S. J. ALEXANDER.

For Auditor, JOHN WALLICHES.

For Treasurer, G. M. BARTLETT.

For Attorney-General, C. J. DILLWORTH.

For Commissioner of Public Lands and Buildings, A. G. KENDALL.

For Superintendent of Public Instruction, W. W. JONES.

DISTRICT TICKET. For Attorney—Third Judicial District, N. J. BURNHAM.

I FLEPPED 400 BUCKS.—[John I. Revid.]

It breaks the failure of the Cronin business.—[George L. Miller.]

The Basutos, or South African tribe have risen in revolt against the British and the general opinion is that the trouble will be more difficult to settle than the Zulu war was.

I start as well resign from the National Committee and resume my place in the lobby. Barnum's mules are no match for Cameron's iron horses.—[J. Sterling Morton.]

Dedicated to Dr. Miller: Put away that bastion tooth. Blood engraved with so much care. For you never more will the golden "Lamb's" brand be the good man. Come to meet S. T.

The Western Union Telegraph Company have held their annual meeting. The increase of the company during the past year shows an increase of \$1,600,000 over that of the last year. The old management was re-elected.

The October Waterloo is a crusher to the Democratic press throughout the country. We will offer to bet a dime to a nickel that the Omaha Herald is the only Democratic paper which has not a roster over its title page.

The registration in New York is unusually heavy, 145,270 voters having registered in the first two days, against 89,064 the first two days of last year. It is estimated that over 40,000 young men will cast their first vote in New York city during the coming election.

The Mexican house of representatives have declared Gonzalez president of the republic. He enters office on the 1st of December, when President Diaz retires. On a total vote of 14,731 Gonzalez received 11,928 votes, while the minority vote was divided among five candidates.

The railroads have again commenced cutting rates, and a war is now in progress between the Wabash and other roads running from Chicago to Kansas City. Rates for first-class passengers went as low as \$11 Wednesday afternoon.

The effect of the election returns on the markets shows how well rounded were the republican assertions that the success of their party was necessary to the business and financial interests of the country. United States bonds in London immediately became firmer on receipt of news from Ohio and Indiana, while the stock market in New York and the grain market in Chicago became more buoyant.

The fight between Chili and the allied republics of Peru and Bolivia still continues with unabated ferocity. The latest news from the seat of war in South America is that the Chilean sloop Covadonga was destroyed by an infernal machine sprung on it by the Peruvians. The Chileans continue devastating the coast of Peru and claim to have 25,000 men from Yuma and Arica. There seems no prospect that the war, which is now in its second year, will be drawn to a conclusion unless other governments intercede.

WHILE we are jubilating over the triumph of the republicans in Indiana and Ohio, we must not forget that as citizens of Nebraska we have interests in the coming election almost as vital to us as the election of the next president. We have a legislature to elect that will exercise greater influence upon the prosperity of Nebraska than any president of the United States. That I legislators will elect a United States senator, who should if he be an honest representative of the people of this state, be a staunch supporter of measures to regulate inter-state commerce, limit the power of the railroads, and to charter by congress. He should be a man of varied ability and known opinions on all the great questions of the hour—a man who would rank with the eminent statesmen that represent other states in the national senate. The next legislature will have an

BLACK HILLS NUGGETS.

Deadwood is to have another horse house. Rocheford mines are said to be looking up.

Deadwood has organized a "Pleasant Hour" club. The last Father De Smet clean up at Central amounted to \$61,840.

The Knights of Pythias new hall at Lead City is nearing completion. Deadwood has now, for the first time, a settled Methodist minister.

A fire-proof bricks are replacing the shanties in Deadwood and Central.

Deadwood's streets are crowded with bull trains and freighting is on the increase.

The Fairview mine at Central is making an incline and level with flattering prospects.

Strawberry Gulch is improving. The Old Fine mine has developed a monstrous body of ore.

The Bonanza mine at Ouster City has been bonded and a force of men are now developing it.

A single firm in Deadwood has paid \$20,000 for freighting goods into the Hills during the past year.

Reports from the southern hills are encouraging, many prospects panning out better than expected.

Central's firemen's ball was a great success. The proceeds will be applied to purchasing a new horse cart.

Spears has made his first shipment of ore this season. It is valued at 5,000 pounds and was of fine quality.

A fierce mountain lion was killed near Rapid City last week which measured eight feet four inches.

The Clearmont mine at Galena is producing \$4,57 of gold a ton and a forty stamp mill is in course of erection.

There is a great scarcity of water in the upper gulch at Deadwood and the Clearmont mine has been compelled to shut down.

A rancher on the Redwater has raised this season 1100 bushels of magnificent oats and considerable wheat and barley.

The Fort Mead tunnel and dam are completed, and water will be running in a few days to the mill. The cost \$50,000.

The treasure chest went out of Deadwood on the 6th inst., with \$250,000 in bullion, the largest sum ever shipped from the hills.

The colored company of troops stationed at Fort Meade gave a ball and supper to their colored brethren in Deadwood, on the 4th inst.

New explorations in the Alpha mine which was thought to have petered out have resulted in the discovery of new and unusually rich deposits.

Galena wants a practical academy. It costs \$70 a ton to ship ore to the Omaha reduction works and hundreds of tons of low grade ore are lying on the dumps waiting for reduction.

The Northwestern transportation company are furnishing the Homestead company with 72 cords of wood. They have 100 men chopping in the timber and 80 men and 40 mules delivering wood.

The amount of game brought into the Deadwood market is said to be wonderful. Deer, antelope, etc., are in fine condition and a ready sale. The country beyond Bella Fouché is said to be covered with deer.

A piece of rock from the Atlantic mine, taken out at a depth of sixty feet, and weighing five pounds, which is very rich in free gold, is exhibited in Deadwood. It is a siliceous quartz, with a few particles of iron pyrites. The rock is a hard, crystallized quartz.

In the Humatale group of mines, the big mills are all built and paid for, and the money has been paid out, mostly for labor, material and machinery, and will now be shipped to the stockholders.

The great Union Hill at Galena is reported to be a wonder in the hills. The summer has been rather dry, but corn is good, wheat is very fair, but considerably hurt in the stalk by wet weather since harvest; potatoes are not a first rate crop; hay is rather scarce as it is getting prettily well settled up and but little hay is grown. I have lived within three miles of where I am now twenty-four years; here I was, grown up with the country, and I never was sorry I came here, but I now wish to get more into raising stock, and of course, would like to get where it is not quite so thickly settled, and had been thinking of going north. I would ask that some resident would write up the counties of Antelope, Holt, Knox, and Lincoln, and give the face of the country, how watered, if good chance for taking homesteads, how timbered and all particulars, and you publish them for the benefit of the readers of THE OMAHA BEE.

Yours etc., Wm. H. SROOK.

MORMON CONQUESTS. THE LATTER-DAY SAINTS REACHING OUT TOWARDS THE SOUTH. PROVO CITY, (U. T.) Enquirer.

Team after team of oxen, and might almost say company after company of people are constantly passing through Provo for the southern country. Most of them are from Arizona and New Mexico, in the region of the Little Colorado. This continual move towards the "sunmy south" brings forth the prediction that the way to the center of the earth is by the south.

It is a great disappointment," says the Louisville organ of the Bourbons. It's worse than that it's a death blow.

The snake is scotched. New York, New Jersey and Connecticut will finish the business in three weeks time.

BARNUM is more of a success as a "mule buyer" than an inventor in "steel rails."

The people evidently prefer brains to brass buttons and corsets.

THE DEMOCRATIC PARTY IN THE PRO-ENGLISH AND ANTI-AMERICAN PARTY.

England's policy of free trade has liberally assisted in destroying the industries and the consequent poverty of my native land; England's agents and agents are at work in this country to-day seeking to ruin the great industries of America, and to force upon us the use of laboring classes. As an American citizen and as an Irishman, I am in favor of a strong, healthy tariff and a protective policy. I am opposed to the election of democratic congressmen. In the expressive language of Dean Swift I would "burn everything if it came from England but her coal," and, if my voice and my feelings could reach the sixteen hundred thousand voters of my race in the United States, there would not be a free-trade trader, nor a congress of the United States. Very respectfully yours, JOHN BRENNAN.

Credit when Due. Leavenworth Times.

The Democracy makes complaint that the Republican press never gives the Democracy credit for anything. We disagree with it by giving them credit as follows:

They predicted that secession would be peaceable.

They predicted that the states would not respond to President Lincoln's call for militia.

They predicted that the militia would not cross the Potomac and invade Virginia.

They predicted that money could not be raised to support the army.

They predicted that the people would not take the greenback.

They predicted that the greenback dollar would be worthless as paper.

They predicted that the grass would grow in the streets of New York.

They predicted that England and France would form an alliance with the south to secure cotton.

They predicted that a "poverty-stricken people in the north would compel the government to terminate the war."

They predicted that Grant could not capture Richmond.

They predicted that the war for the Union would be a failure.

They predicted that the confederates would never be overthrown.

They predicted that the people would never consent to emancipation.

They predicted that the people would never ratify the amendments to the constitution.

They predicted that the free negro would become a race of pariahs.

The predicted that the people would never permit black men at the ballot-box.

They predicted that the war would terminate in a vast standing army and a military dictator.

They predicted that the child would be born who would live to see gold or silver restored to the currency of the country.

They predicted that the interest on the vast public debt could never be paid.

They predicted that specie payments would not be resumed on the first of January, 1875.

They predicted that the resumption of specie payments would bring universal disaster and ruin upon the business and industry of the country.

Who Wants a Change? The Detroit Tribune, being in and inquiring about the change of a republican administration. Says the paper:

If a change is desirable there must be a reason for it. If there is such a reason, what is it? If change will improve the condition of the country, anybody, whose condition will improve, and how will it do it? These are the things that thoughtful voters will ask.

Will change help me? Will change help my neighbor? Will change increase the wages of mechanics and laborers? Will change secure a better price for farmers and producers? Will change make employment more certain? Will change increase the profits of merchants and manufacturers? Will change make the collection of duties easier? Will change make it easier to borrow money? Will change lower the rates of interest? Will change promote the starting of new factories, railroads and other enterprises? Will change give us a better currency? Will change establish the National credit on a sounder basis? Will change increase the flood of gold now pouring into our lap from the old world? Will change give us officers who will do better than handle all the money of the government with only the loss of one-third of a cent on \$1,000? Will change give us purer elections? Will change increase the patriotism of public officials? Will change encourage a National love and love of country among the people? Will change enforce the amendments to the Constitution more surely? Will change add stability to the Government? If change will do none of these things, what good will it do? And if it can do no possible good, why should we risk the hazard of a change?

The Last Ditch. San Francisco Chronicle.

It is evident from the way in which they are carrying on the campaign in Indiana and Ohio that the democratic leaders fully realize the situation and the decisive character of the present struggle. They know that the national democracy now occupy a position as desperate as that of the confederacy just before Appomattox. A defeat now just as final as that which preceded their surrender, and they will be followed by a disaster which will be the party as complete as that which overwhelmed the Confederacy when Richmond fell. If they cannot win now, with a union soldier as their standard-bearer and the solid south rallying to his support, their last hope will have failed and they will have no better chance of a struggle under the old party organization. One more republican victory and the democracy will collapse as suddenly as the confederacy collapsed after the final campaign of 1865. Down to the very close of that struggle the confederate leaders loudly declared that if beaten in the field they "would die in the last ditch." Throughout the south the cry was, "We will die, but we will never surrender." Yet six days after the fall of Richmond Lee surrendered, and then nothing more was heard of dying in the last ditch. On the contrary, the entire confederacy, "took mules and horses and went home." So will it inevitably be with the democratic party. If they are elected, their legions will disband, never again to rally under the old standard.

It is because the democratic nation committee fully understood that they are now resorting to such desperate expedients to carry Ohio

45 Years before the Public. THE GENUINE DR. C. McLANE'S LIVER PILLS

are not recommended as a remedy for all the ills that flesh is heir to, but in affections of the Liver, and in all Bilious Complaints, Dyspepsia, and Sick Headache, or diseases of that character, they stand without a rival.

ACUE AND FEVER. No better cathartic can be used preparatory to, or after taking quinine. As a simple purgative they are unequalled.

BEWARE OF IMITATIONS. Each box has a red wax seal on the lid, with the impression, McLANE'S LIVER PILLS. Beware of cheap imitations, and the signatures of C. McLANE and FLEMING BROS.

Insist upon having the genuine Dr. C. McLANE'S LIVER PILLS, prepared by FLEMING BROS., Pittsburgh, Pa., the market being full of imitations of the name McLANE spelled differently, but same pronunciation.

Chicago and St. Louis. St. Louis Globe-Democrat.

Corn from Kansas City and other Missouri river points can be taken to the Atlantic seaboard by rail for two cents per bushel less by way of St. Louis than by Chicago.

St. Louis receives upwards of 500,000 bushels daily, while St. Louis receives less than 5,000 bushels daily. The Chicago receipts of corn at Chicago amounted to 720,132 bushels; receipts at St. Louis on the same day, 2,338 bushels. Will some of our countrymen explain to us why they are so much more ready to buy corn from Chicago than from St. Louis?

They predicted that the interest on the vast public debt could never be paid.

They predicted that specie payments would not be resumed on the first of January, 1875.

They predicted that the resumption of specie payments would bring universal disaster and ruin upon the business and industry of the country.

Who Wants a Change? The Detroit Tribune, being in and inquiring about the change of a republican administration. Says the paper:

If a change is desirable there must be a reason for it. If there is such a reason, what is it? If change will improve the condition of the country, anybody, whose condition will improve, and how will it do it? These are the things that thoughtful voters will ask.

Will change help me? Will change help my neighbor? Will change increase the wages of mechanics and laborers? Will change secure a better price for farmers and producers?
