FRITSCH'S PRUSSIAN Cough Syrup BOSTON

VICTORY OF MEDICAL SCIENCE. The only existing remedy for every species of Acute or Chronic Disease of the Organs of Respiration, SPECIFIC FOR CONSUMPTION

THIS all-powerful vegetable prepara-tion expels from the lungs and air pas-sages, the mucus and muco-pus produced by pulmonary inflammation, heals the irritated membrases, and renovates every organ which utilizes the breath of Life. It contains no stupefying poison, and is in all respects a healthful medi-cine. The rapidity and certainty with which it ANNIHILATES A COUGH Is astonishing. Its effects go deeper than the mere symptoms of pulmonary disease and discharges the cause from the system. Free and painless expectoration is the mode by which it relieves the lungs, chest and throat from the burdens which oppress them; thus arresting Consumption and Bronchitts in the germ before they reach the more dangerous stages. The emaclated sufferer

BATTLING FOR LIFE nate will find Fritsch's Prussian Congi Syrup a potent ally, and will assuredly win the fight by adhering strictly to this great medicine. The CASES NOW ON RECORD in which it has been administered with entire success as a remedy for every va-riety of malady which affects the Re-spiratory Functions, amount to more than

FIVE THOUSAND at the present date, and yet the preparation is only in the infancy of its usefulness. The great defect of all Cough Remedies hitherto introduced is that they are simply expulsory. Hence they are useless; for unless the causes of the acrid secretions which are coughed up are removed, and the ruptured, inflamed or maturated surfaces healed and restored to their natural tone, a cure is impossible. Fritsch's Prussian Cough Syrup accomplishes these objects. The mucus and muco-pus which are the consequence of Lung Discase, are thrown off by it, while at the same time it soothes and invigorates the weakened tissues.

"LIFE FOR THE LUNGS." For coughs, colds, influenza, bronchial fliculties, tightness of the chest, hoarseness, sore throat, trachitis, inflamma-tion of the lungs, difficulty of breathing, pleurisy and all disorders of a pulmonary nature, it has never been equaled.
