

The turkeys are now coming down from their high roosts and breathing a sigh of relief over the departure of Thanksgiving.

GREENE is about to undergo a cabinet crisis. Greene wishes to show that he is fully abreast of her political neighbors.

BRANTON, Governor of Oregon, will probably be unable to attend the next session, owing to the declining state of his health. He remains away after March 4th, and if Malone acts with the republicans, the republicans will have a majority in the senate.

BRANTON DAVIS is likely to be re-elected from Massachusetts without opposition. Ben Harrison is ahead in Indiana, and the contest over the Ohio seat left vacant by General Garfield's election is likely to prove especially lively.

Iowa ranks this year second in the list of wheat states, having raised 45,600,000 bushels. Nebraska is credited with 120,000, while the whole west contributes 324,675,000 bushels to the wheat crop of the world.

Mr. LOCKE, we understand, has expressed himself as decidedly opposed to the contest for the seat in the senate to which he was not elected. Now, the best way for Mr. Locke to show that he doesn't want that seat, and from down there to deprive this country of its rightful representation in the legislature, is for him to withdraw as a contestant or claimant.

JOHN L. DAVENPORT and Marshal Jewell called upon General Garfield the other day and Dr. Miller, enquiringly remarks that people are known by the company they keep. This being the case Dr. Miller may draw what satisfaction he can from his intimacy with Bill Barnum, Abe Hewitt and Cronin. It is a poor rule doctor, that don't work both ways.

CONSPIRING AGAINST THE PEOPLE

"Whom the gods wish to destroy they first make mad." When the monopolies of Nebraska picked the late state convention with their cap and tools, and forced upon the people and party of this state a representative in congress and the state government who were notoriously in league with them to rob the taxpayers of this state, and thus prevent an honest assessment of corporation property and legislation to protect the producers against abuses by transportation companies, they struck a blow at the liberties of our people that must rest and which is sure ere long to annoy the people against this outrage upon the people of Nebraska.

The National Grange is holding a session in Washington, and on its opening day passed resolutions asking congress to pass a bill making the commissioner of agriculture a cabinet officer; recommending congress to pass what is known as the Regan bill, regulating the transportation of cattle; favoring a graduated income tax; recommending a revision of the patent laws, so that farmers who buy machines shall not be liable to patentees for penalties, but that the liabilities should rest upon the persons from whom the machines are purchased.

GEN. GARFIELD will probably have the appointment of a majority of the justices of the supreme court of the United States. Justices Clifford and Hunt are both old men, and are suffering from paralytic strokes. If they do not resign their offices, it is not likely they will live long to enjoy them. It is said that Justices Swayne and Strong, who are respectively seventy-five and seventy-two years old, contemplate resigning. Justice Miller is now sixty-five years old, and Justice Bradley sixty-seven, and they are likely to have good work in them for ten years to come.

THERE are many indications that the railroad kings will make a hard fight to secure control of the United States senate. Vanderbilt is already laying his plans in New York to secure the election of Chauncey M. Depew as the successor of Senator Keruan. Depew is the able attorney of the New York Central road and corporation, whose influence in the legislature is very powerful.

Ir Hitchcock has been giving thanks in advance for that cabinet appointment, he is likely to find a case of misplaced confidence. The following civil service curriculum is seriously propounded by an exchange: "If a president deserves a

OMAHA IN THE LEGISLATURE

There are some vital interests for Omaha and Douglas county in the coming legislature apart from any general legislation that the people of the whole state demand. Our city charter is before us in many particulars.

Amethyst is found in the Lake Wau mine at Sherman. There is not an empty business house in Idaho Springs.

Ouray's numerous heirs will contest the will left by his wife. The roof is being put on the new opera house at Colorado Springs.

A fire in Denver's new hotel, the Windsor, last week, occasioned a loss of \$10,000. Daily discoveries of new mines are reported from the tellurium belt, Boulder county.

Gothic City, in the Gunnison, is now connected with the outside world by telegraph. Quantities of Mormons are being employed on the extension of the Denver & Rio Grande railroad.

Lieutenant Governor-elect Robinson has given \$500 towards erecting a Catholic church in Kokomo. The Williams mine in Lake district has a monthly output of over 600 tons of iron, mill and smelting material.

The Del Norte and Summit Telephone company has its poles set at Del Norte, and now awaits the arrival of the wire. A "circle railroad" is soon to surround Denver. A company with \$1,000,000 capital has been organized for its construction.

A metallurgical and mining department is to be added to Colorado college, Colorado Springs, with Prof. William Strieby in charge. Over 800 cars of freight are now lying along the main line of the Santa Fe road west of Larned, waiting shipment over the mountains.

Custom and Terosa are the euphonious names of two new rival towns down in the northern end of Saguache county. They are both prospering. An important strike of rich ore has been made on Fletcher mountain, the ore running ninety per cent in silver, two in gold and seventy per cent in lead.

An unusual amount of work is being done on Sheep mountain, and the mines, without an exception, are showing large amounts of mineral. The efficient depth has been reached. Some three hundred men were prospecting and mining in North Park, Colorado, last summer, and half that number will remain in the locality all winter.

The new school of mines building at Golden is completed, and is certainly very conveniently constructed throughout. The location is excellent; can be seen from all points of the city, and presents a fine appearance.

The Fort Collins Express says: "A hunter named Rowell came down from North park, last Monday, bringing three wagons loaded with game, consisting of deer, elk and four bears. The largest bear weighed eight hundred pounds. The hunters killed several elk which they left in the woods over night. On returning in the morning they found the bears growing about the camp, and were fortunate enough to dispatch them all. One of the bears and claws were brought in Collins and the balance shipped to Denver."

Forest fires are raging near Santa Barbara. Work has begun on the new insane asylum at Stockton. Road agents continue to be troublesome in Nevada county.

San Francisco complains of the price of coal, which is \$3 a ton. The frost has put an end to grape picking and crushing at the vineyards. Moody and Sankey are drawing crowded houses in San Francisco.

The wine produced this year in Sonoma county will amount to over \$5,000,000. A land slide occurred last week on the San Luis Obispo railroad, stopping the train for two days. Stockton is shipping over 600 tons of grain a day, but the warehouses continue filled to their utmost capacity.

The continued favorable weather has enabled the farmers on the coast to nearly clean up their grain threshing. Oakland's new railroad bridge for the narrow gauge railroad from San Diego will be put under contract within a few days, all preliminary work having been completed.

The whalers in Monterey Bay are having lively times. A school of six whales came in near the town of San Diego and a company took after them. They killed one and hooked on to another, which took them out to the heads and sunk, compelling the whalers to cut loose.

Travel on the Central Pacific is increasing. The aggregate losses from the fire at Mammoth City were \$45,000. The works of the woodhuck company at Bodie are being rebuilt.

The various towns in the state are contending for the location of the insane asylum. The treasurer of Storey county has defaulted in the sum of \$21,940.91. Ruby Lake, formerly the sportsman's paradise, is drying up.

Over \$25,340.44 of bullion were shipped by the Standard company of Bodie, during the week ending November 13. Virginia City is said to be having a month's boom, and policemen have little to do.

A partition in the Sierra Nevada mine, at Virginia City, gave way last week, fatally crushing the foreman. A fire broke out on Monday in the 2000-foot level of the Consolidated mine at Virginia City, which was extinguished with extreme difficulty.

In the next assembly out of fifty members there will be seven republicans—three from Eureka, three from Ormsby and one from Lander. The Nevada Southern road will be open for travel on the first of June, 1881. The building of this road is only a starter of which will be a continuous line of rails from Battle Mountain to the Colorado river, and will be the means of opening an immense field of gold mineral country.

OREGON AND WASHINGTON

Grain shipments continue to be made from Portland. About thirty men will winter in the Sagitt mines.

There are indications that the Columbia river will soon be closed to navigation by ice. The survey of Tequema has made by the government shows a safe channel through the reef outside the bar.

A man named Haugh of Beaver Lake (Or.) killed four panthers with four successive shots in the course of two hours. A whale recently found stranded on the beach near the mouth of the Umpqua river, Or., was sold by its finders \$1800.

At a depth of 600 feet the Vancouver coal company has reached an 18-foot seam of excellent coal near the old workings. An organization of a branch of the Irish National and Industrial League has been effected at Portland. Officers were elected, and 81 members signed the roll.

There is considerable complaint among farmers throughout the state owing to the absence of rain this fall. In many sections the ground is so dry that the farmers have not been able to put in the fall crops.

The Northern Pacific has recently sold ten ranches to a German colony on the Pen d'Orielle end of their line, consisting of 20,740 acres, and netting the company over half a million of dollars.

Ten stacks of timber have recently been gotten out at the east side camp for the Port Blakely (W.T.) mills, the longest being 152 feet in length and 24 inches at the smallest end. There were also monthly sales of sheep, and all of the finest first timber.

At the Cascades landing, George Weidner is building two large flatboats for the purpose of shipping timber and cordwood to the Dallas for the Oregon railway. He has a contract for 100,000 cords, and the company is to furnish the towing for Little White Salmon to the Dallas. These cords will be of equal capacity, two hundred cords at a load.

A grand Indian polich has been in progress on Squaw island, a few miles below Olympia, W. T. Last week about 1000 Indians assembled there, making intricate presents of blankets, flour, clothing, etc., to each other. A number of Olympians, including Gov. Newell and his family, went down to witness the ceremony. The unusually high tides saved during a war dance could be heard for miles.

The Victoria Colonist's correspondent, who spent the summer in the Sagitt mines, pronounces the diggings payable failure. He says \$100,000 in the year of the gold was taken out there. There were about fifty men there when he left. Fully three hundred men had left the mines diggings at the last month.

Mt. of mill dams, acres of fields, wheels, pumps, machinery, tools, cabins, sluices and lumber are all abundant. Thousands of feet of lumber have been sawed on the sides of the creek for the first freight to arrive anywhere. Everybody has become demoralized.

California. Forest fires are raging near Santa Barbara. Work has begun on the new insane asylum at Stockton. Road agents continue to be troublesome in Nevada county.

San Francisco complains of the price of coal, which is \$3 a ton. The frost has put an end to grape picking and crushing at the vineyards. Moody and Sankey are drawing crowded houses in San Francisco.

The wine produced this year in Sonoma county will amount to over \$5,000,000. A land slide occurred last week on the San Luis Obispo railroad, stopping the train for two days. Stockton is shipping over 600 tons of grain a day, but the warehouses continue filled to their utmost capacity.

The continued favorable weather has enabled the farmers on the coast to nearly clean up their grain threshing. Oakland's new railroad bridge for the narrow gauge railroad from San Diego will be put under contract within a few days, all preliminary work having been completed.

The whalers in Monterey Bay are having lively times. A school of six whales came in near the town of San Diego and a company took after them. They killed one and hooked on to another, which took them out to the heads and sunk, compelling the whalers to cut loose.

Travel on the Central Pacific is increasing. The aggregate losses from the fire at Mammoth City were \$45,000. The works of the woodhuck company at Bodie are being rebuilt.

The various towns in the state are contending for the location of the insane asylum. The treasurer of Storey county has defaulted in the sum of \$21,940.91. Ruby Lake, formerly the sportsman's paradise, is drying up.

Over \$25,340.44 of bullion were shipped by the Standard company of Bodie, during the week ending November 13. Virginia City is said to be having a month's boom, and policemen have little to do.

A partition in the Sierra Nevada mine, at Virginia City, gave way last week, fatally crushing the foreman. A fire broke out on Monday in the 2000-foot level of the Consolidated mine at Virginia City, which was extinguished with extreme difficulty.

In the next assembly out of fifty members there will be seven republicans—three from Eureka, three from Ormsby and one from Lander. The Nevada Southern road will be open for travel on the first of June, 1881. The building of this road is only a starter of which will be a continuous line of rails from Battle Mountain to the Colorado river, and will be the means of opening an immense field of gold mineral country.

The weather at Salt Lake has been intensely cold. Salt Lake has established a city estray pound. The prospects in the Marysville

HOUSE, ETC., ARE BEING BUILT AT BUNION, A NEW TOWN IN ILLINOIS.

A young man of Peavo killed one grizzly and two brown bears in Provo canyon last week. The owners of mines in the Frisco district are making preparations for a vigorous winter campaign.

The U. S. Eastern is only eight miles from Ocala and is being rapidly rushed forward to completion. The drifts at the 700 foot level of the Ontario mine at Park City has tapped the vein, showing a fine body of ore.

Work on the temple at Logan is being pushed with great vigor, and structures are being made to get it under cover before December. The Frisco Times complains that Beaver valley is infested with cattle thieves, who find a ready market at Millford for the stolen beef.

The bullion shipments from Silver Reef through the Wells, Fargo & Co., from the 31 of November to the 10th, inclusive, aggregated the sum of \$13,977.03. Idaho. The ice bridge at Blackfoot over the Snake river is completed and the trains are crossing.

The Panamint mine at Idaho City is being thoroughly explored by its owners with good prospects of a rich strike. A smelter will be erected at some point in the Wood river country this winter, and a daily paper is also to be started soon.

The population of Alturas county will be considerably increased next year. The estimate is placed from 15,000 to 40,000. From three to six inches of snow lie on the Saw Tooth mountains, but the Salmon valley and adjacent foothills are clear and grass all green.

Nineteen hundred locations have been recorded in the Wood river country this season. The number will be likely reach 8000 before Christmas should the weather continue favorable. In Smiley's Canyon Yankee Fork, two companies, the Emma and Vienna, are at work. A 75-foot shaft on the Emma shows a three-foot vein of ore, most of it assaying from \$300 to \$1200 per ton. The company have a force of men running a tunnel to reach the vein at a depth of over 250 feet. The Vienna, from which ore has been shipped to Salt Lake the past season, is the best developed mine in the canyon. At a depth of 250 feet from the discovery the vein is four feet in thickness, and assays at an average of \$3000 per ton, and the average \$800.

Montana. Game is said to be plenty and hunters are few in Meagher county. Copper mining is rapidly assuming great importance in Butte.

The measures of Deer Lodge county in the year of the gold were taken out there. There were about fifty men there when he left. Fully three hundred men had left the mines diggings at the last month.

Mt. of mill dams, acres of fields, wheels, pumps, machinery, tools, cabins, sluices and lumber are all abundant. Thousands of feet of lumber have been sawed on the sides of the creek for the first freight to arrive anywhere. Everybody has become demoralized.

California. Forest fires are raging near Santa Barbara. Work has begun on the new insane asylum at Stockton. Road agents continue to be troublesome in Nevada county.
