REMNANTS OF THE OLD YEAR.

After a most extraordinary trade in Dress Goods aused by the wonderfully low prices at which we were able to offer them late in the season. We have now an unusually large stock of

REMNANTS.

These Goods are now laid out and are marked down less than cost, making the most

SPLENDID BARGAIN

ever offered in Omaha, and the Goods are in such quantity that there is really a splendid selection.

"Can't have it," was the prompt reply. "I expected that answer, and sm prepared for it. I did not come am prepared for it. I did not come here with a tale of woe. I have not wild train on that section, and regulars quantity that there is really a splendid selection. Remember the first choice is worth something.

BLANKETS.

Our new Cedar Blanket Binns are now full of every discription of Blankets, many of them bought recently at very low figures, and the other stock marked down to match them. Making the cheapest and best assort- second. The tests applied by the ed lot ever offered here.

better than the best.

TABLE LINENS.

Now that the rush of the Holiday trade is over, w desire to call special attention to the Greatest Bargai we have ever offered, being a most beautiful line of SATIN FINISHED DOUBLE DAMASK, TABLE

CLOTHS AND NAPKINS TO MATCH.

These Goods are the samples of a large Belfast Linen ten out. As we have said, these must Manufactory, which we purchased on such terms that we can offer them at 33 per cent less than regular goods. There is nothing whatever the matter with these goods except that some are slightly soiled at the folds, which of course, comes off with the first washing. This is a splendid chance to obtain most beautiful and These being only necessary forms, do only fears and apprehensions enterrich Table Cloths at the price of ordinary goods.

SANTA CLAUS FOUND. restest Discovery of the Age.

Wonderful discoveries in the worldhave been made Among other things where Sauta Claus stayed Children oft ask if he makes goods or not, if really he fives in a mountain of snow.

Last year an excursion sailed clear to the Pole and suddenly dropped into what seemed like ahole Where wonder of wonders they found a new land, while fairy-like beings appeared en each hand. There were mountains like ours, with more beautiful green, and far brighter skies than ever were seen, Birds with the huse of a rainbow were found, While flowers of exquisite fragrance were growing around.

Not long were they left to wonder in doubt

ing around.

Not long were they left to wonder in doub.

A being soon came they had board much about,
Twas Santa Claus' self and this they all say,
le leoked like the picture 'esse every day.
He drove up a team that looked very queer,
Twas a team of grasshoppers instead of reindeer,
He rode in a shell instead of a sleigh,
But he took them on board and drove them

He showed them all over his wonderful realm,
And factories making goods for women and men
Furriers were working on hate great and small,
To Bunne's they said they were sending them all,
Kris Kingle, the Glove Maker, told them at once,
All our Gloves we are sending to Bunce,
Banta showed them suspenders and many things

more.
Saying I alse took these to friend Bunce's store.
Santa Claus then whispered a secret he'd tell,
As in Omaha every one knew Bunce well,
He therefore should send his goods to his care,
Knowing his friends will get their full chare.
Now remember ye dwellers in Omaha town,
All who want presents to Bunce's go round,
For shirts, collars, or gloves great and small,
Bunce, Champion Hatter of the West, Douglas

GETTING A PATENT HE POSMALITIES TO BE GUEST THEOCOM | MODEY. SEFURE OBTAINING A PATENT, AND THE COST OF GETTING OVE

Given the invention, which must "new and useful," the government requires the inventor to file a perition for the parent; an oath that skilled in the art to Taich it pertains, the machinery it be; and when it is worked. The object sought by the protection and consequent encouragement of the inventor, and second, the

preservation of the invention for the use of the people at large after the patent has expired. The government does not demand any great amount of Wall Street News. the same forms shall be used in the railroad running west and asked for oath and petition as well as in a part of the specifications, but these forms are plainly given in the rules of want the favor of a pass to Buffalo."

It is a part to the specifications, but these forms to that officer's desk he began: "I to that officer's desk he began: "I answer was, "No train between want the favor of a pass to Buffalo."

Marengo and Brooklyn—go ahead." practice, and the commissioner of "Can't have it," was the prompt re-

Mrs. Glass' celebrated advice about government requires that whatever the intention is, it shall be something new, either absolutely, as in something that was never heard of before, or relatively, as in the new combination of two of two combinations of two combinations. The latter than the same than the tion of two or more known things for a specified purpose. The sewing machine needle, having an eye near the point, was an example of the first; the sewing machine itself, in that it was a combination of known forms of mechanism, was an example of the second. The tests applied by the d lot ever offered here.

Also a light comforts just arrived as good value if not effect than the best.

The tests applied by the examiners of the patent office as to the newness of an invention are very severe. Not only is it compared with the many thousands of patents grant the many thousands of patents grant and in this content of the patent office as to the newness of an invention are very severe. Not only is it compared with the many thousands of patents grant. ents, however, are often refused for machines prejudicial to public morals, as, for example, gambling contrivances.

The invention having been perfected, the specifications have to be writclear, full and expressed in the plain- breeders of cattle good and strong ducing the greatest quantity of eggs not call for extended comment. With tained on the subject have been that the specifications, or rather with the claims, it is different.

The office grants—in short, they are the life of the patent, if we may be allowed a rather bold figure of speech.

The office grants—in short, they are the life of the form and symmetric branch of agriculture; governed by but the supply and the demand. The occupation of the fancier is quite another thing. It is and always will be what fanciers make it. If they keep open the avenues of interest in allowed a rather bold figure of speech. ers and admirers. But I am pleased keep open the avenues of interest in the examination of a patent during to state that in some experiments in their hobby they will find their lines emplify the claims. The very languague dictated by the Office, to be used as part of the specifications, points out the importance: 'What I is of course limited—but it is my firm the points out the importance: 'What I is of course limited—but it is my firm the points out the importance: 'What I is of course limited—but it is my firm the points out the importance: 'What I is of course limited—but it is my firm the points out the importance: 'What I is of course limited—but it is my firm the points out the importance: 'What I is of course limited—but it is my firm the points out the importance: 'What I is of course limited—but it is my firm the points out the importance: 'What I is of course limited—but it is my firm the points out the importance is the points out the points THE DAILY BEE. ters patent is," etc. It is the draw- in a few years from all our herds of stock.— F. in Poultry Magazine. 1 Copy 1 year, in advance (postpaid)....\$8.00 solicitors are of most value to inven- acteristics of the various breeds be tors. The writing of a description, to any one who thoroughly understands the subject and has some prac-tice in the use of words, is not much and trust you may continue the work of a task. But to express in clear language the idea embodied in an invention is not an easy thing. If any one of our readers thinks that it is, let him try upon the first patented turned in anger and ferocity on man, article he comes across and—change his opinion. And this is precisely what drawing up a claim means. We head of Polled Angus cattle sold at have known patent solicitors to study over the wording of a complicated and were there slaughtered for the claim for several days. The attention European market. Mr. Joseph writes: which this part of the application re-ceives from the examiner in charge of the case justifies the care taken with it. As long ar the description is clear fault with it. The claims, however, out just like. It was a grand sight at must not be too broad, or they will the abbaitor where they were killed. involve too much and thus bar the They averaged alive here 1340 lbs., way of future inventors; nor, on the and dressed 62 lbs. to the hundred. other hand, must they be too narrow, They had 1:0 lbs. fat, and the hides or they will not cover the invention. averaged 106 lbs." It is not often that the inventor has such a simple claim allowed as that given to Clark which he put in, "I claim a screw terminating in a gimlet

stand in any court The specifications having been written, the drawings have to be made. The office requires that they shall be of uniform size, ten by fifteen inches, made upon stiff calendered paper, and that all lines shall be clear and black. There is an excessively good rule now in operation in the patent office. In KANBAS CITY, ST. JOE & COUNCIL BLUFFS cases where new drawings are re-quired, owing to technical errors in those first sent, the imperfect ones go o the examiners, in order that there shall be no delay in the examination. We think it would be well for the OMAHA & NORTHERN NEBRASKA CAIL-| Leave. | S:00 a. m. | Fxpress | 4:30 p. m. | | Kxpress | 4:30 p. m. | Mixed | 10:45 a. m. | | Daily Except Sundays. ommissioner to extend this rule to the point of not requiring new drawings from applicants unless the patent is to be granted. As things are now, years."

"Then I can't understand why you should leave our house all of a sudden after buying of us for several years." the office makes new drawings at the

point." Of course, such a claim as

actual cost. It maintains a large staff of investors, and in this, as in everything else connected with its workings, shows itself animated with a spirit of great liberality and a desire to make everything as easy as possible for the applicant. The demand, then, for fees for new drawings when the patent is ultimately refused is one which is not in need of repairs. We were talking in need of repairs. Captin rep. MICA AXLE GREASE Composed largely of powdered mica and lainglass is the best and cheapest inbricator in the world. It is the best because it does not gam, but forms a highly polished surface over the axle, doing away with a large amount of friction. It is the cheapest because you need use but half the quantity in greating your wagon that you would of any other axie grease male, and then run your wagon twice as long. It answers equally as well for Mill Gearing, Threshing Machines, Buggles, &c., as for wagons—Send for Pocket Cyclopedia of Things Worth Knowing. Mailed fres to any siddress.
