FAIRLY OPENED,

So the State Fair May Now be Considered.

The First Day Mainly Davoted to General Preparations.

Arrival of Two Military Companies for Police Duty.

Electire Light Undoubtedly Brilliant Success.

Unusually Fine Exhibits and

Superior Entries,

The Evening Programment Length Finally Arranged

ling activity all over the state fair owned grounds. Nearly two thousand exboard were on the ground by eight to trot in clock and all preparations for the great rapidity.

ENTRIES COMING IN.

During the entire afternoon and, in fact, the whole day, the entries poured in at the secretary's office in great number, and the clerks were kept as busy as bees. They seemed very tired, but evidently satisfied with their work, and answered the questions of the newspaper man as graciously as possible. "Yes, we are very busy," said Mr John Gillespie, of Lincoln, one of the assistant secas a premium at the state fair for the best retaries; "and we have had to delay some of the entries for a considerable time on account of inability to tran-

for closing the entries, to-morrow noon, arrives. Although so far the entries have not been equal in number to those of the same time last year, still they excel them in point of nerit. Now, in my classes, embracing horses, poultry and bees and honey, some of the finest entries I ever saw have been made this afternoon, and I feel somewhat proud of it. I have 103 entries in horses, 74

in poultry and four of avaries." THE NEXT DIVISION is presided over by Mr. Lee Estelle, classes of cattle, sheep and swine to fill, cants with great readiness and celerity. In cattle he had recorded 164

entries, representing about 300 head. Mrs. Michael Griffith, who resides in La 50 stalls of sheep, and 69 pens of noon and fractured her wrist. Dr. Chad- ever known, and that they were coming in very rapidly. As the reporter was standing at the window a man rushed up in breathless haste, duststained and generally unkempt, with strong evidences of spiritual excitement about him, and excitedly inquired if there was still space for sheep. He was smilingly answered that there was, and forthwith entered six stalls of fine Merinos, which he asserted he had brought all the way from Des Moines. The sheep were entered and he went off happy.

THE THIRD DIVISION embraces the Fine Arts, Textile Fadrics, Floral and Discretionary. Exactly what the latter is, has not yet been found out, but it commands 125 entries just the same and bids fair to be an attractive and mixed up assortment of articles. About eighty entries were made in the fine arts and the same number in the class of textile fabrics. Mr. E. L. Sayre, of Lincoln, is the courteous assistant secretary in this division.

THE FOURTH DIVISION

embraces mechanical arts, in which fifty-two entries were made at the hour before referred to. Machinery, with 119 entries; marble works, with no entries as yet; and floral exhibits. of which there are 25 entries. Mr. J. T. Welsh, of Omaha, officiates at this desk, and is very accommodating to all who call upon him.

THE FIFTH DIVISION includes farm productions; 75 entries. Champion entry, no entries as yet, and natural history, 5 entries. These classes made a fine showing where they are exhibited, and their numbers will doubtless be swelled by to-morrow. Mr. E. S. Phelps, of Aurora, is the efficient and well known secretary of this division.

OVER THE SIXTH DIVISION, which is the last in the line, Mr. U. of 1421 Howard street, left the city yester-day on the west-bound train. They are entry secretary. He states that he had been over his ears in work, and the number of his entries fully substantiated this statement. The class of agricultural societies and special agent's premiums is represented by 13 entries. Fruits take the prize as to numbers, with 250 entries. The class of orchards is not as yet represented, but will probably be by to

THIS AGGREGATION 2,000.

U. P. DISPLAY. The display of the U. P. railway of various products of this state and the territories is very creditable. Chief among the display are the specimens of grain upon the stock from the western counties of this state, Hall, Among the large number of visitors to and Buffalo. There are over one on account of its recent introduction in this state. It is called the Yankee corn, and is unexcelled for commercial purposes. The fruit exhibit of Nebraska, Idaho and Utah are fine. grapes from Utah are fully equal in been completed on the grounds to looks to those grown in California, day is the headquarters building, in

THE ELECTRIC LIGHT.

As announced in The Bee yesterday morning an unlooked for accident caused the suspension of the illumination which otherwise would have taken place upon the grounds the night before last.

While the power was being applied from the large power engine to the electric engine, and when the revolutions of the drive wheel had been raised to two hundred a minute, an upright beam to which was attached the shaft running the electric engine, Platte about fifteen miles west of Omaha, swine. He, too, said that the charac- gave way at the foundation, and susfell down the cellar stairs Saturday after-noon and fractured her wrist. Dr. Chad-ever known, and that they were com-The conductor of the electric engine, Mr. Baker, had just applied the electricity, and for a moment the lights all over the grounds flashed into startling brilliancy; then, as the beam gave way and the shaft became bent by the irregular pressure, the revolutions ceased and the lights went out it became rumored about that the electric engine had been shaken from its foundation and that it was impossible to repair it. Such was not the case. The cause of the accident was generally said to be the unsubstantial foundation of the upright to which it was attached by the shaft. In order to successfully run the electric light eight hundred revolutions a minutes of the electric wheel are required, and sixteen horse power is necessary to maintained by the large power engine. Yesterday a number of men were at work during the entire afternoon and evening replacing the beam which had broken and rearranging the shaft in such a way as to make it perfect and secure. There is no question now but what the electric light will run without difficulty, and the public may feel assured that the grounds will be brilliantly illuminated every evening during the week. The experiments with the light night before last proved that the current is \$75 for second, \$50 for third, \$25 for The water has again been completely distributed aright and that no diffi- fourth. Entries free. These races drained from the mains so that they culty exists between the machine and the lamps, to which its wires conduct the electrical fluid. All that is necessary now is to maintain sufficient power from the large engine.

Early yesterday morning the floral for floral hall exhibits menced to arrive and were rapidly arranged and put in place, so that last evening every available spot in the hall was with flowers, fruit, garden products and domestic machinery and the various attractions that go to make up the many beauties always to be found in this spacious building. In one wing of the building there is an eshandsome pyramid fruit and vegeta pecially vegetables, canned are arranged in which the most artistic fashion. The display of vegetables is not only large and varied but also excels in assortment and quality that of any previous year. Mammoth pumpkins, squashes, choice apples and apricots touched with the rich hue of autumn ripeness, peaches, pears, and a tempting collection of smaller fruits occupy two long stands in the hall. By noon to-day every-

An Entire Success.

It has been proved by the most reliable testimony that THOMAS' ELECTRIC OIL is an entire success in curing the most in-veterate cases of rheumatism, neuralgia, lame back and wounds of every descrip-tion, 12-eod-1w.

A Queer Sight.

Early last evening a portable engine which was attached a heavy thresher, passed through the principal streets of the city. The engine wheezed and gasped as if it were in mertal agony, and the limit of its strength seemed to have been reached in hauling the cumbersome machine. The puffing and snorting of the engine frightened several teams and runaways were the result. Fortunately no particular damage was done in this respect, so far as heard from. The engine made a blockade in every street through which it passed, and no end of trouble was the result. That it should have which will come in to-morrow and been allowed at all to pass through next day will aggregate from twenty to the main thoroughfares is altogether
