

The Omaha Bee.

Published every morning, except Sunday. The only Monday morning daily. TERMS BY MAIL: One Year, \$10.00 Three Months, \$3.00 Months, 5.00 One 1.00

OMAHA PUBLISHING CO., Prop'rs E. ROSEWATER, Editor. Edwin Davis, Manager of City Circulation.

John H. Pierce is in Charge of the Mail Circulation of THE DAILY BEE. A. H. Fitch, correspondent and solicitor.

The biographies of Morgan were a trifling premature.

OMAHA is now a city of mud on the banks of the "big Muddy."

MR. TYNER will now have more time to devote to Indiana politics.

RIVER improvement, next to railroad regulation, is the coming issue in the west.

MRS. JANE BALDWIN holds the post-office fort at Council Bluffs, and the hungry horde of starvards around the Nonpareil froth and fume in vain.

BESIDES the speakership there are several minor prizes to be had in the coming house of representatives. For the office of sergeant-at-arms Greenbury L. Fort of Illinois is mentioned as a prominent candidate.

The explanation given by Judge Key regarding his knowledge of the star route frauds and his desire to prevent their exposure brands him as a idiotic old granny. Judge Key ought to be locked up in an insane asylum.

ALL cities having a population over 20,000 or receiving \$20,000 per year at their postoffices, are entitled to free postal deliveries, but the appropriation is so small that over thirty applications from towns in all parts of the country are necessarily neglected.

THE completed census of New Mexico territory gives it 119,565 inhabitants, males being in excess by 9,000; 108,721 are whites and 11,000 natives, showing that the native white Mexican stock is still the most important element. The increase since 1870 is only 8,060.

VERY recently 1500 barrels of New England rum, sent from Boston, were landed on the west coast of Africa for the use of the natives. That is not the kind of a missionary the philanthropists of the Hub usually send out to the heathen, but it will put spirit in them.

THE subscription for the Garfield monument among the citizens of Cleveland already amounts to \$50,000. Thirty \$1,000 subscriptions have already been secured and the remaining \$20,000 will soon be on the lists. Meantime the subscriptions from other portions of the country do not keep pace with the wishes of the committee.

RIDDLEBERGER is confident that the readjusters will carry Virginia this year; ex-Congressman Goodie guesses the bourbon-democratic majority at 10,000 to 20,000; and the Atlanta Constitution's correspondent, after talking with both sides, predicts a bourbon majority of 14,000 or better on the popular vote and of six or better on the joint ballot in the legislature.

RESURRECTIONS in political bon-yards are now in order. Timothy O. Howe, whom the people of Wisconsin sat on with an almost unanimous thud, will administer laws and patronage in the department of justice. Sargent of California is listening patiently for the oho of Chester's horn, to materialize and don the raiment of political mortality.

JOHN RUSH is too well known to the people of Douglas county to need any extended notice as a political candidate. His excellent business qualifications have been tested in four years of active service as a deputy county treasurer, where his obliging manners and thorough knowledge of the office has added to his large circle of friends. Mr. Rush will be elected by a large majority, as he should be.

THE department of agriculture, on the advice of October 1, estimates that the corn crop will amount to 65 per cent., or 5 per cent. better than September 1. The yield in 1879, the census year, was reported to be \$1,750,000,000 bushels, or a 90 per cent. crop. A similar yield this year would have produced nearly 2,000,000,000 bushels, and the shortage is therefore supposed to be about 675,000,000.

OUR SEWERAGE SYSTEM.

Omaha will be the pioneer city of the west to adopt the Waring system of sewerage. This system is the invention of Mr. George E. Waring, of Newport, Rhode Island, the most accomplished sanitary engineer in the country, whose life has been directed to a study of drainage as affecting health, and whose researches in this line have given him a world-wide reputation. The Waring system differs from all other systems of sewerage in the provision which it makes for preventing the decomposition and fermentation of the sewage while in transit through the pipes. It is well known that one of the most prolific sources of disease is "sewer gas." Sewer gas results from the retention of decayed matter in the pipes, and its further decomposition. When such decay takes place the pipes, intended to carry off injurious substances, become themselves the very channels through which disease is transmitted into every residence and business house with which they are connected. It will readily be seen that large pipes afford greater opportunity for the accumulation of sewage than small ones. Taking this fact as the basis for his plan, Mr. Waring invented a system which includes the use of small tile pipes constantly flooded by water, which washes to the outlet of the system, as often as may be deemed advisable, every trace of decomposed matter hurtful to health. Under Mr. Waring's system the accumulation of sewer gas is impossible. The pipes are kept sweet and clean, and bath rooms and closets relieved from the odor which invariably attends imperfect construction in the old system.

Memphis has tried the Waring system, and there as elsewhere it has proved a complete success. The Kansas City Journal has been interviewing a resident of that city on the subject and the result will prove of interest to our citizens who are so soon to test the Waring system themselves. "Memphis," said he, "is now considered by engineers to be one of the finest sewer cities in this country. The system is novel here, but its success will cause it to be adopted wherever it can be successfully employed. The system is a cunningly devised network of six inch tile pipes, underlying the entire city at no great depth and communicating directly with the waterworks. This allows of the pipes being flushed twice a week, and this is done by the waterworks, in accordance with a contract with the municipal government. It is wonderful how clear and sweet the pipes are kept, and how excellently the city is drained. Just at present the waterworks are slightly out of order, but not sufficiently so to interfere seriously with the process of flushing the pipes. "The system is called the Waring sewerage of Rhode Island. It was introduced about eighteen months ago. You will remember that in the summer of 79 the yellow fever depopulated the city. Well, in the spring of '80 they began laying thirty three miles of sewers I have described. Previous to that date we had no sewerage worth mentioning. Since the Waring system has been introduced the city has been free from malarious disease, and the death rate lower than at any time previous in its history."

THE CATTLE TRADE.

Notwithstanding the unusually hard winter and the heavy losses of stock, the cattle interests will close the present season in an unusually prosperous condition. The summer has been an excellent one for the herds. The readjusters will carry Virginia this year; ex-Congressman Goodie guesses the bourbon-democratic majority at 10,000 to 20,000; and the Atlanta Constitution's correspondent, after talking with both sides, predicts a bourbon majority of 14,000 or better on the popular vote and of six or better on the joint ballot in the legislature. Resurrections in political bon-yards are now in order. Timothy O. Howe, whom the people of Wisconsin sat on with an almost unanimous thud, will administer laws and patronage in the department of justice. Sargent of California is listening patiently for the oho of Chester's horn, to materialize and don the raiment of political mortality. John Rush is too well known to the people of Douglas county to need any extended notice as a political candidate. His excellent business qualifications have been tested in four years of active service as a deputy county treasurer, where his obliging manners and thorough knowledge of the office has added to his large circle of friends. Mr. Rush will be elected by a large majority, as he should be. The department of agriculture, on the advice of October 1, estimates that the corn crop will amount to 65 per cent., or 5 per cent. better than September 1. The yield in 1879, the census year, was reported to be \$1,750,000,000 bushels, or a 90 per cent. crop. A similar yield this year would have produced nearly 2,000,000,000 bushels, and the shortage is therefore supposed to be about 675,000,000.

THE anti-monopoly meeting in the hall of Cooper Union, in New York, on Wednesday evening, shows how rapidly the best elements of every trade and profession are uniting to secure the enactment of laws to compel railroad and transportation companies to base their charges upon "the cost and risk of service." The venerable Peter Cooper endorsed the principles of the league, which, when carried to their logical conclusion, would do more to insure the happiness and prosperity of the masses than has

ever been accomplished before. The principles enunciated by the meeting will meet the hearty approval and receive the cordial support of the people of the west. They declare that the public welfare and public safety demand the enactment of relief laws, compelling transportation companies to base their charges upon "actual cost and risk of service," with a fair profit added, instead of the monstrous theory of "what the traffic will bear." The law must prohibit "Credit Mobilier" devices and construction companies, by means of which the actual cost of public works is enormously increased and stock issued to meet the fictitious values. Unjust discrimination against persons and localities must be prohibited by stringent laws, both state and national, and the appointment of commissioners in every state and by the federal government with adequate powers to see that the laws are enforced.

MR. VOORHEES is now posturing as a ground and lofty tumbler. His vault from a "tariff for revenue only" position to an advocate of a high tariff is the best on record.

INDUSTRIAL NOTES.

Chicago has organized a Garfield sewing machine company. A large Presbyterian church has been completed and located at Las Vegas. A 40-ton smelter has been purchased and is now en route to Victoria district, Grant county of Idaho.

California is now sending more wine to the Atlantic than is imported from France. Her wine crop last year yielded to the growers nearly \$3,500,000. The manufacturing establishments of New York City consume annually raw materials costing \$267,000,000, and produce goods valued at \$485,000,000.

There are said to have been 219,805 miles of railroad in the world on January 1, 1880. Of this America had 100,867, Europe 102,903, Asia 8,983, Africa 3,024, and Australia 4,888 miles.

The city of Rich Hill, Mo., though but little over a year old, is having manufacturing establishments already in operation, or in course of construction. Immense deposits of coal, iron, and other ores are found in the immediate vicinity of the city.

The wheel scraper company, of Mt. Pleasant, Ia., during the past summer have put in a new engine and a forty-horse power boiler, and have also erected a large extensive mill for the production of shingles by machinery, and a steam laundry.

An extensive iron manufacturing firm of Pittsburg has opened a new field of labor for women, and will soon turn out female blacksmiths and iron workers by the hundred. Two or three hundred girls are already employed, ranging in age from 15 and upwards. The labor performed by them, it is said, is not heavy, and they earn from 75 cents to \$2.50 per day each.

A WONDERFUL DISCOVERY. For the speedy cure of Consumption and all diseases that lead to it, such as stubborn coughs, neglected Colds, Bronchitis, Hay Fever, Asthma, pain in the side and chest, dry Hoarseness, Sore Throat, and all chronic or lingering diseases of the throat and lungs, Dr. King New Discovery has no equal and has established or itself a world-wide reputation. Many leading physicians recommend and use it in their practice. The formula from which it is prepared is highly recommended by all medical journals. The clergy and the press have complimented it in the most glowing terms. Go to your druggist and get a trial bottle free of cost, or a regular size for \$1.00. For Sale by d5(1) & McMAHON Omaha.

OCCIDENTAL JOTTINGS.

HELL'S Gulch has organized a church choir. Gunnison has eight republican newspapers. Greeley will probably erect a monument to the late N. Meeker.

A flock of 10,000 sheep from Montana have arrived at Golden. Allison and his pals are all sent up for thirty-seven years at Canon City. The smelting works at Golden turn out \$150,000 worth of bullion per month.

A rich strike of gray copper was made recently in the Black Jack claim, on Sigel mountain.

By the death of Arizona Bill there are 10 more fatherless children and half orphans in Colorado.

A piece of ore weighing eighty pounds was taken from the Basic mines, which ran at the rate of \$50,000 per ton. The Denver & New Orleans track is across Lake Archer and is slowly proceeding toward the Rio Grande crossing, pending a decision by the court.

A drunken lawyer named Sawyer attempted to kill his wife in Denver, because she refused to lead a life of sin. He tried to saw her head off with a knife.

The amount of charcoal consumed in Leadville is simply enormous. Over 500,000 bushels are used every month. Grant's works alone use about 125,000 bushels per month.

The Denver, Utah & Pacific railroad has one hundred men working on two tunnels through the continental divide. There are in addition, three contractors at work on the lower end of South Boulder canyon, they have charge of the building of a bridge from Denver to the Erie coal banks as fast as their arrives.

Las Vegas is overrun with tramps. A large Presbyterian church has been completed and located at Las Vegas.

A 40-ton smelter has been purchased and is now en route to Victoria district, Grant county of Idaho.

A ranchman named Riggs was "held up" to the extent of \$3,500 in gold at Socorro. The thieves escaped, though many cruder monuments of bygone centuries are likely to remain for long years to come.

Important improvements are to be noted in Santa Fe, and the ancient Archaic city is gradually being modernized, though many crude monuments of bygone centuries are likely to remain for long years to come.

Small pox of a most malignant form is raging in the towns of Dixon and Ocala. Half the working force in the construction department of the yard at Vallejo have been suspended till next month for lack of funds.

From Moore's Flat to French Corral, Nevada county, there are more than 1,000 white men working in and around the hydraulic mines.

The mining dividends paid in San Francisco during the last month amounted to \$494,500, of which amount nearly \$200,000 were sent to eastern stockholders.

The ban crop in the neighborhood of Newhope was badly damaged by early frosts. The crop was late, not having been planted until after the frosts, which destroyed the wheat crop, had subsided.

A disastrous fire attended with loss of life occurred at J. Olson on the 20th. The victims were Nicholas Allanch, an Austrian, aged 46, his wife, aged 24, and their two children, one a girl 2 years old, the other an infant boy of six months.

IDAHO.

Specimens of ore from the Texas district, Lemhi county, assay \$1,000 of silver to the ton. The Ham's Horn mine, in Bay Horse district, is in the condition, having paid \$80,000 in dividends during the last four months.

The Custer mine and mill at Yankee Fork are producing every month from \$80,000 to \$120,000. The owners of this very few men are employed and times are dull.

In Wood River recently, the owner of a mine having become discouraged at the outlook and continual expense, sold his claim for \$125. The mine afterwards turned a few feet and found a ledge, and followed it on an uprise until it came within 2 feet of the surface. At this point the ledge was 20 feet wide and contained 874 tons of ore. The investment of \$150 can be sold for \$100,000.

NEVADA.

Eureka county owes \$38,000 exclusive of its school bonds. Consumption, for years almost unknown on the Comstock, has within the past year carried off many of the citizens, and almost all of them were steady, hard-working miners.

The value of taxable property in Elko county is placed at \$2,754,555, the tax on the same amounting to \$1,000 per ton. Humboldt county is \$2,785,250, the tax being \$72,416.52.

During the past year 33,988 tons of ore have been reduced at the Comstock county furnace, instead of 2,000 tons of custom ore; 5,667 feet of drifts have been run and 1,081 feet of raises and winzes.

OREGON.

Mail Agent Maguire, running on the C. P., was arrested at Reno for robbing the mails. Between Pen d'Oreille lake and Thompson's river there are now three surveying parties locating the line. There are about 3,000 men working in the vicinity of the lake. A number of Russian families from Kansas are examining the Willamette valley to ascertain by personal inspection whether the published reports of its fertility be true. The colony they represent numbers nearly 10,000 people.

The Oregon railway and navigation company are buying two air-compressors, two engines and twelve steam drills, which were used on tunnels on the Dallas division, preparatory to sending them to build a new line where the Northern Pacific will have a tunnel 6,000 feet long.

Four thousand men now at work on the Northern Pacific road between here and the Cascades will leave for Clark's Fork within a month. There promises to be some rivalry between engineers of the division working east and that coming west in the amount of work to be executed as shown between the Central and Union Pacific in 1880 and 1881. Track laying on the Grange City branch of the O. R. and N. company is going on at a rate of one mile per day, and the track will be completed to the Snake River by November 10th.

UTAH.

The apple crop is panning out unusually poor this year. An association of artists has been started in Salt Lake, the purpose being the advancement of the fine arts in Utah.

The shipments of dried fruit of all kinds from Utah to the east is quite heavy and will continue so for at least a month longer.

Work on the new Academy of Music at Salt Lake is still being pushed forward vigorously by night by means of the electric light.

DAKOTA AND THE BLACK HILLS.

Deadwood has sold \$12,000 in school bonds at 98 cents. The output from the Hills mines for the year 1881 will reach \$9,000,000.

Large quantities of potatoes are being shipped east from Rapid City every day. The whole Hills country is alive with game of every kind from a buffalo to a teal duck.

The quartz mines in Blacktail gulch stands at the head of the list as bullion producers.

Quite a strike was made recently in the Motherspaugh in Galena by the D adwood mining company.

A public meeting in Flandrau voted to give \$5,000 to build a court house for Moody county at Flandrau.

The mining and manufacturing of mica found in the Hills into saleable shape has become of considerable importance.

A company to put in smelting works is talked of at Deadwood. It is estimated that the required works would cost \$15,000. The four furnaces are being built in the Hills—one at Deadwood, one in Crook City, one on the Redwater and two at Rapid.

The mines in the vicinity of Custer are all developing wonderfully, especially the mica mines which are being vigorously worked.

MISCELLANEOUS.

Pike's has demoralized the stage routes in Wyoming. A party of experienced miners are working the old '98' placers near Laramie peak with good success.

The glory of Camp Shoshone, Wyoming, has departed. The houses are either all gutted of lumber, doors, windows, etc., or hauled away entirely.

The Silver King Mining Company of Arizona, have declared their twenty-second monthly dividend of twenty-five cents per share, payable on the 15th inst., aggregating \$25,000. Total of dividends to date \$75,000.

Official life in the Southwest is generally short, being always within range of some desperado's gun. The deputy sheriff of Yavapai county, A. T. J. A. Bryant, was shot and killed by "Grizzly Miller, a disciple of Billy the Kid."

The directors of the Atlantic and Pacific railroad have changed the route of their line from a point in northern Arizona, abandoning the Needles route, over the Colorado river, crossing and running north via Calville, into Southern Nevada, and there forming a junction with the Utah Southern at Jay Couid.

The bullion product of the United States for the current year is placed at \$85,000,000, as follows: California, \$20,000,000; Colorado, \$25,000,000; Arizona, \$18,000,000; Nevada, \$9,000,000; Utah, \$7,500,000; Dakota, \$7,500,000; Montana, \$6,000,000; Idaho, \$2,500,000; Oregon, \$1,500,000; Washington, \$600,000; New Mexico, \$1,500,000.

BRADFORD, Pa.

These Fitchan, Bradford, Pa., writes: "I enclose money for SPRING BLOSSOM, as I said I would if it cured me. My dyspepsia has vanished, with all its symptoms. Many thanks; I shall never be without it in the house." Price 50 cents, trial bottles 10 cents.

SEE HERE

You are sick, well there is just one remedy that will cure you, no matter what the trouble. It is Liver or Kidney trouble, Consumption, Dyspepsia, Debility, "Wells' Health Renewer" will cure you. \$1. Druggist Depot, C. F. Goodman, Omaha.

AGENTS WANTED FOR

CREATIVE SCIENCE and Sexual Philosophy. Profusely illustrated, the most important and best book published. Every family wants it. Extra-ordinary inducements for Agents. Address—New York—Dr. J. M. Stone & Co.

REAL ESTATE.

engaged in extending the grade of the narrow gauge from Silver Bow to Butte City, and within a few days the number will be increased to 300.

It is evident that two or three years will witness railroads penetrating all portions of Montana, and without costing the people of the territory one dollar in the way of subsidies. In two years Helena will have two railroads, the Northern Pacific and Utah & Northern, coming for her trade and laying down at her doors the products of the east and west at rates much lower than the people have ever known or perhaps dreamed of in the past.

THE apple crop is panning out unusually poor this year.
