One should not only consider it a pleasure but a duty Not long since the writer dropped into the school that has been for a short time in charge of Miss Eddie, of Chicago The school is conducted on the "material ' plan so to speak, and is one word in English, "Kindergarien," in German, "Kinder Garten," which means children's garden, a name given it by that distinguished Germ n educator, Frederick Fruebel, who o usually established the new method for educating little children. The plus introduced by Fruebel was to educate in the open air. A beautiful garden was laid out into play grounds and little plats divided into little garden beds, in which the children planted their seeds and tended them daily as they grew up. Here in this garden the children underwent not only physical, but mental development. The kindergarten established in this city is at present an indoor institution. like any other city school. Here we found Miss Eddie busily at work, trying to entertain and instruct about sixty children whose ages would range from four to six years. Everything in the room is in keeping with the pupils. They have their little tables, little chairs, etc. When Miss Eddie first undertook to tame the class she now has, they were in such a chaotic state that it seemed almost impossible to teach that church, to be addressed by Mrs them to form a ring around the room.
