Most of the Track Layers Resume Work. While a Few Sue For Their Pay.

The track layers of the Milwaukee & St. Paul railway, who struck for higher wages, have for the most part gone back to work. Some of them, however, left for other places, and an even twenty commenced action before Justice Fraincy to recover the pay due them. The company had refused city authorities. The complaint as to pay them until the regular pay day, which was of uncertain date, ex-cept that it would be whenever the paymaster came here. The papers were duly served, and the company through its agent promised to settle the claims at once, they amounting in all to \$315, while the costs reached \$74 more, a pretty good day's work for the court.

### THE OTHER SIDE.

Dr. Pinney's Relation to the Smail-Pox Case Explained

As stated in yesterday's BEE, complaint has been entered against Dr. Pinney, charging him with neglecting to report a case of small-pox to the signed by Chief Field, is that he "did the speedy arrest of the assassins and attend upon a case of small-pox within the city upon the 5th day of May, and for several days previous, and did fail to report the same to the authorities. The case was called up yesterday, and adjourned until next Saturday, it being stated that Mrs. Durgan was a needed witness, and she being being in quarantine now, it was of course not deemed expedient to expose the public to contagion by havng her appear as a witness in court.

Hence the matter was allowed to rest Dr. Pinney's side of the affair is en-tirely different from that stated in the tirely different from that stated in the complaint. He says that he was called last Mondsy evening to see a man at the Emmet house. He found that the man was in a room where five others were aleeping, and a small room at that. He did not find the man seriously ill, and on questioning received no answers, and found no symptoms indicating small-pox. He left some medicine, and told the man who came for him to let him know the received no answers, and found no symptoms indicating small-pox. He left some medicine, and told the man better, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater, as he did not think there was not see fit to proclaim him the greater. Dr. Pinney says that the next he call the next he card of the matter was on the following Friday, when a messenger came just as he was getting ready to go away from home. He wanted the city authorities and every man, the city authorities a

dent of the poor, and get an order for Dr. Hart to visit him, he being the county physician. The messenger then informed him that the man's face was broken all out, and thinking to the authorities at once.

It seems, therefore, from Dr. Pin-ney's statement that, instead of at-tending the case on Friday and for several days previous, he made but one call, and that last Monday evencharged with having been drunk on ing, and not being sent for again, sup-

Dr. Pinney declares that the whole thing is a matter of spite and jealousy, tal being as usual \$7, he swore a long and that the facts, when shown in swear of vengeance upon the men court, will clear him entirely of any who sold him the stuff that thus made charge of carlessness or neglect, and react on those who started the case.

#### BEGINNING BUSINESS.

ing Their Reservoirs.

There is now every indication that the water works enterprise will tracts with the Council Bluffs iron works for certain needed work, has located reservoirs and is preparing to build them. There is to be a reservoir on the bottom near the river, known as the settling reservoir, which will hold about eight million gallons, and the water from this will be pumped into a supply reservoir. This latter reservoir was located yesterday upon the bluff, between the north end of Fairmount park and the head of Glenn avenue. The natural lay of the lands is very advantageous. A wall, one hundred feet thick, is to be built, and the water thus held in a sort of bollow on the side of the bluff day, and the papers were accordingly at almost its summit. This supply issued to bring him to time for thus reservoir is to contain two million breaking the law. His case is set for this morning.

Every city should have one or two representative new-papers - papers that reflect the interests and wishes of its people, and it is peculiarly unfortunate for such people when from lack of enterprise or other cause they cannot have them.
