## The Tide of Immigration.

Chicago Times. During the month of May 90,025 ending June 17, 1882. immigrants landed at Castle Garden, against 76,791 during May, 1881. Atkins S During the first five months of the A len G calendar year 228,404 landed there, against 182,082 during the same Bowley B against 182,082 during the same months last year—a gain of 25 44 per months last year—a gain of 25 44 per cent. The whole number landed in the country last year at all ports was, in round figures, 720,000. It has been estimated that 1,000,000 would be landed this year, but, should the country last year. estimated that 1,000,000 would be landed this year, but should the increase for the year at all ports be at the same rate as at the port of New Dike F V York for the first five monts, the total number of arrivals will not be much more than 900,000. This, however, is a greater number than the country has ever before received from abroad Griffiths J. in any one year-95 per cent. greater than in any year except 1881. Dur-ing the ten fiscal years ending with the ten fiscal \$80, the whole number of the shove estimate, may be expected to arrive this year alone. Of the whole number arrived during the ten whole number arrived during the ten \$2,261,904, or more than 80 per \$2,261,9 still call themselves "Irish patriots," outnumbered the Asiatics four to one. And that explains why they have been able to bully two great, hulking, cowardly parties into saying that "the Chinese must go." Last year six "Irish patriots" and twenty Germans to every one "heathen Chinee" land-

permitted to come to this country. This year, as last, mere are coming from Germany than from any other Ritchey J C country. The emigration from Germany has been increasing rapidly for the past few years—a fact which has been attributed in part, and probble been attributed in part, and probbly not erroneously, to the policy of commercial obstruction which goes under the name of protection. It is an undeniable fact that loud complaints against the new policy of restriction have been made in all parts of the country, and that amorphism has aparts. country, and that emigration has enormously increased since the adoption of that policy. The same phenomena have appeared in Canada. The party of commercial obstruction there predicted that their policy would not only make the population contented, but attract immigrants from Europe.
But very soon after the adoption of
that policy the emigration from Canada to the United States began to increase, and from about 24,000 in 1877 it rose to 99 705 in 1889, and 125,391 it rose to 99.705 in 1889, and 125,391 in 1881. During the years 1880 and 1881 we received more immigrants from Canada than from any other country except Germany. The two countries which have recently adopted the obstruction policy have sustained the greatest loss by emigration, and have lost more since the adoption of that policy than they ever did before. Even the extraordinary offer of the Canadian government to set Englishmen down in Canada free of passage men down in Canada free of passage money and all other charges has failed

county, about eighty mites north of Dubr que. This vast deposit is more than 400 acres in area, and over 200 feet in depth. Scientists have investigated its claims, and assays show a percentage of 65 of iron. Deeper down the ore is believed to be richer even than this. Experienced iron men have examined specimens, and pronounce them excellent. The character of the mineral is that of a hematite or sesquioxide of iron, being of diminishing in production. This form of iron ore is more generally distributed than any other. It is to be hoped that careful investigation will leave no doubt of this great mineral discovery, and immediate steps should be taken to ascertain its real value. It seems, in the light of the discovery made within the past few years, that Iowa is to rank as a mineral producing state after all, and an iron mine would be better for its interests than a gold one.
