Republican State Convention.

The republican electors of the state of Nebraska are hereby called to send delegates from the several counties to meet in state convention at Omaha on Wednesday, September 27th, A. D., 1892...

Table with columns: County, Delegates, Electors. Lists counties like Adams, Antelope, Boone, etc., with their respective delegate and elector counts.

It is recommended: First, That no proxies be admitted to the convention, except such as are held by persons residing in the counties from which the proxies are given.

THE Omaha Republican says Judge Glinn wears low shoes and no stockings. And now comes the Republican City Enterprise and says "good enough but he wears congress gaiters about this season of the year."

THE city authorities of Omaha, Neb., place barrels of ice-water at street corners for the benefit of thirsty pedestrians, and base fellows often tip the barrels over into the gutter.

THE bulls have the stock market by the ears in New York. The reports of fine crop weather, large railroad profits, easy money, fall trade and the whole horizon of business which is announced as altogether lovely, have enabled the bulls to drive out the bears and declare that they will hold the fort for many months.

ANOTHER prize ring is staked out and another slugging show on the boards for Saturday August 3, in Milwaukee, at which John Brooks and John Ward will catch on to each other for the value of \$500, the championship of the Pacific coast and the gate money.

HON. WILLIAM HALL, of our neighboring state, has been appointed by the president as governor of Wyoming Territory. It is expected that this appointment will be promptly confirmed.

Mr. Hall was born in Henry county, Iowa, in 1839, and for twenty years has been practicing law in Greenwood. He was a member of the legislature of his native state, and at one time speaker of its house of representatives.

As a prominent republican supporting Grant and Colfax. For some years he has been president of the Iowa and Colorado Mining company, which he organized and only recently resigned to induce ex-Governor Gear, of Iowa, to accept the position.

PETER SCHWENCK'S STORY.

"And Peter said, man, I know not what thou sayest. And immediately while he yet spoke to the cook crew."

Peter the quack, surnamed Schwenck, is a good deal less reliable in telling what he knows about the doings of his master than St. Peter was on the memorable occasion when he denied his master.

Peter tries to saddle the entire blame for the disreputable job, in which he played such a prominent part, upon Tom Majors, whom he accuses of being the sole instigator and perpetrator of the fraudulent scheme.

It is notorious that Schwenck has been Valentine's man Friday for some years. They were both up to their necks in the land office frauds at West Point and Norfolk, and Schwenck, through his intimate and corrupt relations with Valentine, held a club over his head that compelled him to defend his dishonest and scandalous transactions in the Norfolk land office.

UNDER the present system of revenue and taxation the income of the government aggregates about \$150,000,000 over and above the expenditures. Now congressmen don't care to reduce this surplus, for it gives some excuse for a good round river and harbor bill under the theory of addition, division and silence, and also leaves enough crumbs to provide for "Long Branch" and "across the continent" committees during the recess.

OTHER LANDS THAN OURS. The cable dispatches are still burdened and monopolized by the news from Egypt and the influence of the situation on the great powers. In England the most important change it has effected was in the resignation of Mr. John Bright, who objects to the course of the ministry as opposed to that policy which has been the rule of his political action.

Cuba is getting expensive to the home government. It formally used to pay a handsome income, now it has just cost the Spanish treasury \$1,500,000 in gold.

The constant and flooding rains in Ireland have nearly ruined the splendid promise of a harvest. The potatoes in the low districts are wet to the skin, and unless the weather subsides tamine will add its fearful fangs to the sharp teeth of the repression bill.

The chief embarrassment of the European powers upon the Egyptian situation arises out of the provisions of the treaty of London, executed on the 15th of July, 1840, in which Prussia, Austria, Russia, England and Turkey were the "high contracting parties."

Paris has had another of its diplomatic dinners on the occasion of the departure of Count Von Bausi, the favored minister of Francis Joseph of Austria. Bismarck demanded his recall from the Parisian court, and the count took advantage of it to close a long career of diplomatic service by retiring to his musical and historical researches.

The right honorable, the earl of Shaftesbury, K. G., presided at the annual meeting of the Victoria philosophical institute of Great Britain, which took place in London on the 15th of June.

As a necessity to the ocean travel and commerce around the world was undertaken and injected into Egyptian affairs the most important interests of England and France. The freedom of the Suez canal and the security of \$450,000,000 became paramount items in the question of eastern diplomacy.

the means to threaten the disruption of the Austrian Empire.

The English attempt to improve the tenements of the poor at the public expense in the large cities has practically broken down as far as London is concerned.

Sir Charles Dilke's elevation to a seat in the cabinet will be in accordance with the traditional policy of keeping up the radical equilibrium.

Human life is apparently more precious in Austria than it is regarded in this country, to judge from the precautions the government has taken in respect to theatres and public halls.

The Vienna theatre fire awakened the authorities up to a duty, in the performance of which an edict has already gone forth regulating the building of theatres, and their general supervision when built. It provides for a local supervisory commission in every town where there is a theatre, composed of representatives of the municipal authorities, police, medical profession, fire brigade and experts.

Among the provisions for the regulation of the liquor traffic in Copenhagen just reported by the special commission appointed for the purpose are these: The number of licenses shall be reduced from 1,350 to 300; no landlord shall be under thirty-five years of age; female service, except that of the hostess, is forbidden; drink can not be served to any person under eighteen years of age, male or female, or to any one who is already drunk; a drunken person is to be conveyed to his own dwelling in a cab or covered carriage at the expense of the landlord in whose house he took his last glass.

A statue of Mazzini was dedicated last week in Genoa. This was a great republican demonstration, Mazzini never having consented to the monarchy in Italy, although he would have been too patriotic to accept the anarchical theory of the present admirers.

Ecador has its Arabi Pacha in the person of Alfaro, who is making headway with his revolt, and promising death to all officers who support the government. Arabi has not thought of this, and by the time the hint reaches him it may be of little service.

A letter-writer at Alexandria, a woman gives a highly romantic explanation of the Egyptian question. Her story is that Arabi, early in his career, fell madly in love with an Egyptian girl, the daughter of a fellow, but the unscrupulous Ismail, the khedive, also took a fancy to the girl, and had her carried off to harem without even saying "by your leave."

The body snatchers got the body of the Earl of Crawford and Balcarne's, but didn't carry it further than 650 yards from the family vault at Dunchess in Abbotshire. They did better with A. T. Stewart, but there may be something peculiar in the body of an earl. Perhaps the weight of the title was too much for the resurrectionists.

The right honorable, the earl of Shaftesbury, K. G., presided at the annual meeting of the Victoria philosophical institute of Great Britain, which took place in London on the 15th of June.

As a necessity to the ocean travel and commerce around the world was undertaken and injected into Egyptian affairs the most important interests of England and France. The freedom of the Suez canal and the security of \$450,000,000 became paramount items in the question of eastern diplomacy.

THE English attempt to improve the tenements of the poor at the public expense in the large cities has practically broken down as far as London is concerned. Some fourteen areas, covering forty-two acres, have been cleared away in London under it, with the result of housing about 3,000 more people than were displaced. The cost was enormous, the result practically nothing.

seemed to bring the country before the student of the present day as it appeared to the inhabitants ninecent centuries ago, and confirmed in a most remarkable manner the accuracy of the Bible record.

There is much in the present condition of the country to make men feel together and act together in public and general concerns, who thought apart in years now gone. Old party interests have largely passed away, at least as dividing lines.

It is true that party lines are less sharply defined than they were. Tens of thousands of democrats voted two years ago for James A. Garfield. This state elected a democratic legislature last year. This senatorial district chose a democratic representative to succeed the late Senator Wagner, and other instances are not wanting to show that the people are becoming very independent of bosses, if not of parties.

There are numerous evidences of the fact that the matter of the migration of the Russian Jews is being sadly mismanaged. The benevolent societies in Europe have been organized for the purpose of alleviating the sufferings of their persecuted brethren and crowding them overboard, rather than they can be provided for on this side.

A dispatch from St. Paul announces that 185 refugees have just been dumped down at that point in a half-starved condition, having been almost without food for five days. The city authorities are doing what they can for them until they can find work, in which some of them may succeed in doing; but it is not likely that they will all at any time soon.

The Philadelphia Times says that last Thursday fifty-one families, who came to this country a few months ago, left that city for New York, en route for Europe, being enabled to do so through the aid of the city of Philadelphia, the Times claims: "Less than one-fifth of that number found employment here, and the remainder, with the exception of perhaps fifty or sixty aged people, were sent to other points. Those who were sent away, for some unknown reason soon returned, until almost the original number were in the city 'his week.'"

It begins to look as if there was a system in this thrusting process, so far as the interior points are concerned.
