ARIZONA INDIANS.

Rising of the Apaches at the San Carlos Agency.

Settlers Disgusted With the Government's Treatment of the Indian Question.

Chicago Times.

Glenn City, Arizona, July 15.—The telegraph has long since given you the news of the uprising of the Apaches at the San Carlos agency, and as this is the third time they have been on the war-path within the last year, and as heretofore no correct account was published in regard to the causes which led to these outbreaks, I am enabled to give you the facts and particulars in this case, as I got my information from a reliable source.

Some few weeks since, the chief of scouts, a Mr. Colvig, found it necessary to arrest an Indian for some crime committed at the time of the Indian outbreak last October. He, accompanied by his assistant, repaired to the camp where the Indian was supposed to be concealed, and there found an Indian concealed under some blankets, and ordered him to throw up his hands and surrender. This the Indian refused to do, and instead commenced firing on the scout, when the latter returned the fire, and the result was that two squaws and the Indian under the blankets were killed, the squaws attempting to shield the Indian concealed in the wrickup. The Indian killed was not the one wanted, but it turned out that he was a prominent participant in the Cibola affair last October—a bad Indian and well deserving his fate. The man wanted was not there, or if there he was in the mole.

This affair created wild excitement in this town and throughout the entire mining country, and doubtless found its way to the east at the time of its occurrence.

Last Thursday was a "count day" at the reservation, as Friday is issue day. The chief of scouts, in company with his usual assistant, repaired to a point some ten miles from the agency buildings, to count and issue ration tickets to such Indians as usually assemble at this point for the purpose named. While in the act of counting them and issuing tickets, three different charges of powder and ball entered his body, and killed him on the spot. His Indian companion was also killed. This killing was done by the White Mountain tribe, and doubtless in retaliation for the killing of the Indian and squaws a short time before by this same scout.

The news rapidly spread throughout the country. The wildest excitement took place. The church bell was tolled, drums were beaten, and the whole town notified of another outbreak of the Indians. Immediately some forty of our most prominent citizens armed themselves and, mounted, repaired toward San Carlos. When about twelve miles on the way they were informed of the true character of the outbreak, and that the Indians had gone on the warpath toward the Cibola country, their old hunting grounds. How strong they are is not known, as reports are conflicting. The agency at San Carlos reports only twenty-five or thirty missing, but this must be a mistake. It is said that a party of the San Carlos tribe has gone with them, and if this is correct they must number some two or three hundred. The last heard from them was yesterday when they attempted to take the mining camp of McMillan, some twenty miles from here. The people there had been warned in time of their danger, and the women and children were placed in the tunnel of Stonewall Jackson's mine for safety, and the men fortified themselves in the hotel, and had a few shots at them. One Indian was seen to "double up," and several others made a hasty retreat, but it is not known that there were any killed. One white man, a clerk in the store, had a wound in the arm, and a loud call in the shape of a bullet mark in the back of his neck. They have also killed a miner named Henry Mercer, at the Champion mill, according to late reports. This, however, needs confirmation. The Indians have gone north, and in a few days we expect to hear of further depredations, of which you will doubtless be advised by telegraph, should any occur. Last evening and this morning some twenty well-armed men have gone north in search of the Indians, and hope to encounter them. The Indians are known to have their ponies and squaws with them, and it is supposed are unable to make rapid marches. Instead of aiming for Mexico, as they usually do, the late reception of the Mexicans gave them by killing Leico and his band, has deterred them from going in that direction, and as Uncle Sam is not so dangerous, they will doubtless operate in the mountains of Arizona and New Mexico. These Indian outbreaks are becoming decidedly monotonous, and have a very depressing effect on the business of the country. Every man that has a dollar in his possession holds on to it, not knowing but he may need it to get out of the country, or require it for subsistence in camp. This San Carlos agency occupies a very important position in regard to the commerce of this part of Arizona, the importance of which is not generally realized, on the contrary, is regarded of no consequence. Lying, as it does, on the only feasible route for a wagon road between this place and the railroad, some 120 miles distant from here, it commands the line of travel between the east and the border settlements. The road is almost completely lined with wagons conveying merchandise, coke, and mill and fur-nace supplies. The importance of our industries may be partially understood when it is known that we have eight gold and silver mills and three thirty-ton copper furnaces in the district, and others in process of erection. We now produce over \$50,000 monthly of silver bullion, and the two cop-

The Indians are known to have their ponies and squaws with them, and it is supposed are unable to make rapid marches. Instead of aiming for Mexico, as they usually do, the late reception of the Mexicans gave them by killing Leico and his band, has deterred them from going in that direction, and as Uncle Sam is not so dangerous, they will doubtless operate in the mountains of Arizona and New Mexico. These Indian outbreaks are becoming decidedly monotonous, and have a very depressing effect on the business of the country. Every man that has a dollar in his possession holds on to it, not knowing but he may need it to get out of the country, or require it for subsistence in camp. This San Carlos agency occupies a very important position in regard to the commerce of this part of Arizona, the importance of which is not generally realized, on the contrary, is regarded of no consequence. Lying, as it does, on the only feasible route for a wagon road between this place and the railroad, some 120 miles distant from here, it commands the line of travel between the east and the border settlements. The road is almost completely lined with wagons conveying merchandise, coke, and mill and fur-nace supplies. The importance of our industries may be partially understood when it is known that we have eight gold and silver mills and three thirty-ton copper furnaces in the district, and others in process of erection. We now produce over \$50,000 monthly of silver bullion, and the two cop-

per furnaces now in operation have within the last month produced over two hundred tons of copper bullion, one-half of which now remains at the furnaces for want of transportation to market and through fear of the Indians on the reservation. The copper furnaces will be obliged to draw their fires, as they cannot procure coke or other supplies from the railroad, and hence hundreds of honest, hard-working miners will die.

This state of things cannot last much longer without at least an effort being made to remedy the same. This is the third outbreak within the past year of the "nation's wards," and so far no effective means have been adopted to check further outbreaks. If the government cannot successfully meet this question and solve it, the settlers will have to do it themselves, and, if compelled to resort to this, they will do it in such a manner as to startle the whole civilized world. Already secret organizations are being discussed here and at Clifton, Lordsburg, Wilcox, Silver City, El Paso (Tex.), Tucson, Deming, and other places, which has for its object the concentration of forces, at a given time, at the San Carlos reservation. The proposition is to organize companies all over this part of the territory, and make a rally on the reservation that will mean business. Shocking and revolting as such an undertaking would be, yet such men seriously are discussing it. They say the government cannot interfere with organizations of this kind until some overt act has been committed, and it could not interfere while simply preparations are being made in this direction. They express no fear of juries or courts martial, especially if the undertaking is successful and the work well done, as the entire country interested would applaud the act. These men argue that the question now is whether this miserable band of savages of the white settlers are to have possession of this young and growing country.

WHIPPLE BARBERS, Arizona, July 25.—A dispatch by courier from Chevelon fork, dated July 19, gives the result of the battle with the Indians on the 17th as follows: Fourteen dead Indians found. The number of wounded cannot be estimated, but blood on the rocks and ground shows a great many wounded. Two dead Indians have been recognized as renegade scouts. Six women and children were taken prisoners, and their provisions, blankets, camp outfit, and a large amount of ammunition captured. Over a hundred head of animals were captured. Where the hostiles took their stand is a succession of very deep wooded gorges with almost perpendicular sides. The character of the country permitted the escape of few Indians during the night. The casualties of our side are: Private Leron, 6th cavalry, killed; Charles, a scout, killed; Lieut. Converse, 3d cavalry, wounded in the right eye, slight; Lieut. Morgan, 3d cavalry, fracture of left arm and leg broken; First Sergeant Taylor, company D, 3d cavalry, right arm; Sergt. D. Camp, 6th cavalry, shot in the neck; Private Foley, company K, 6th cavalry, shot through the neck; Private Millico, same troop, shot through the right lung; Private Will, same troop, shot in right breast, both dangerous. The Indians have split into small parties. The pursuit continues, the entire country being thoroughly scared.

LEGISLATIVE EXPENSES. What the Extra Session Cost the Taxpayers.

The statement of the auditor of public accounts, showing the appropriations made and the moneys expended by the Seventeenth session of the Nebraska legislature, convened May 10th and adjourned May 25th, is published. The total appropriations for the session amount to \$30,550.00, and payable from the following funds:

State sinking fund... \$19,500.00  
Payment of officers and members... 15,000.00  
Payment of incidentals... 3,000.00  
Payment of laws and journals... 1,500.00  
General fund... 11,050.10  
Expenses suppressed recent riots Omaha... 11,050.10  
Total appropriated... \$30,550.10  
The following has been expended from above amt, viz:

Payment of officers and members... \$10,012.50  
Payment of incidentals... 2,466.38  
Expenses suppressed... 11,016.61  
Total expended... 23,495.49  
Balance expended... \$ 7,054.61  
Commissions to ten notaries public in the state were sent out yesterday.

\$200.00 REWARD!

Will be paid for the detection and conviction of any person selling or dealing in any bogus, counterfeit or imitation HOP BITTERS, especially Bitters or preparations with the word Hop or Hops in their name or connected therewith, that is intended to mislead and cheat the public, or any preparation put in any form, pretending to be the same as HOP BITTERS. The genuine name has a cluster of GREEN HOPS (notice this) printed on the white label, and are the purest and best medicine on earth, especially for Kidney, Liver and Nervous Diseases. Beware of all others, and of all pretended formulas or recipes of HOP BITTERS published in papers or for sale, as they are frauds and swindles. Whoever deals in any but the genuine will be prosecuted.
