A pretty soubrette, who scored her early triumphs in San Francisco, appeared at a New York theatre recently and made a hit. When she was called before the curtain the actress expressed her delight at the warmth of her reception, and declared that she felt as much at home as if she were in her dear old theatre in San Francisco. "Indeed," she said, "it seems to me as if I had one foot in San Francisco and one in New York." Whereupon a fellow in the gallery shouted in a stentorian voice: "Give me a ticket for Omaha." The audience screamed with laughter, though the point where the joke comes in is not visible to the naked eye. - Philacelphia Record.

If the mark ever stood out in bold relief, if it was ever written in letters that "he who runs may read." it is on the establishment at the head of which F. C. Festner & Son have so long stood and made the

firm name a synonym for good work, promptness and satisfaction. The pedestrian along Farnham street may hear the constant clanging of their presses from morning till night, and yet he can form very little idea of the extent of the business carried on in this great job printing establishment. The only way so correctly is to pay it a visit. That is what THE BEE reporter does about every other day, and he always finds something new in the way of machinery or facilities for the transaction of mont with Mrs. Dorsey, who has been at | their enormous business, which is increasing from day to day. Twenty-four hands are now

constantly employed, and the facilities for turning out commercial, book and job printing are second to no first-class establishment in the country. They do printing in five different languages, and blanks, books etc., are kept in full stock at all times, while book-binding is a specialty in which they acknowledge no peer in the land, as Mr. F. C. Festner, who attends personally to that department has worked at it for over fifty years, and in the leading establishments of Paris and London. The reporter saw a splendid specimen of the work in this line in fourteen large, full Turkey Morocco gilt-edged books, including two valuable bibles and twelve volumes of "Picturesque America, World and Europe." They are beautiful samples of this art, which does so much to beautify our homes, and these books belong to the wealthiest men in this part of the country, who take their work where they think it will be done the best. The mode of binding and ornamenting these works was explained to the reporter, and it is as delicate and complicated
