GEN. O'BRIEN'S opinion on political banking will fill books.

The records of candidates are the only beacons to guide voters in their decision at the ballot box.

JOHN BRIGHT receives many letters regarding Bright's disease, some asking why he can't find a remedy.

The greatest curiosity in Nebraska politics—a railroad organ which supports Hon. M. K. Turner.

Another legislative investigation into printing steals would put the editor of the Lincoln Journal all out of Gera.

The telegraph is full of platforms now-a-days. Platforms are necessary but the people have taken to judging parties more by their candidates.

The Tammany tiger has drawn in its claws. John Kelly predicts 35,000 majority for Cleveland, the democratic candidate for governor.

CONGRESSMAN CHAPIN is the last man who wishes that he hadn't voted for the river and harbor bill.

When fidelity to the dictates of party machinery clashes with the interests of an efficient government and an honest official it becomes the duty of every good citizen to revolt against the machine.

MAJORITY in Virginia appears to be in its last throes. A political movement with no other vitality than that given by office broking and the chameleon of repudiation ought to go overboard.

Tax electric light is the nightmare of gas companies. In Philadelphia since it's introduction, the companies have reduced the price to consumers to \$1.90 per thousand feet and offered to light the city lamps for nothing.

SWORNIN by telephone to affidavits is now the custom in many lawyer's offices in Chicago. Swearing at the telephone has been the practice of thousands of subscribers throughout the country ever since the instrument came into general use.

PAROTISM must rank above party. If the people stand by in silence and allow the sharks who follow in the wake of every party to capture and hold the organization they can blame only themselves when open revolt becomes necessary to regain the channels for the expression of party sentiment.

SECRETARY FREELINGHYVEN has authorized a denial of the statement that he under no circumstances would accept the mission to England.

OLIVER AMES secured the republican nomination for lieutenant governor in Massachusetts on the plea that he wanted to vindicate his father, Oakes Ames.

REPAIRS still continue at the White house, and the president on his arrival in Washington, after a month's absence, was compelled to quarter himself elsewhere.

REP. SHERMAN grows more cheerful in his views of public affairs as he advances in years.

THE SPREAD OF ANTI-MONOPOLY.

Over one hundred years ago the American people revolted against the English government and the abuse of the power of the crown as represented by his majesty George the Third.

Nothing shows so clearly the necessity of the anti-monopoly movement as the rapidity of its spread throughout the country. Ten years ago the question was a local issue.

The spread of anti-monopoly has been coincident with the growth of monopoly itself. The past ten years have witnessed the most gigantic consolidations and combinations of corporate power in the history of the world.

It is a national emergency which has called the anti-monopoly agitation into existence. A power is growing up within the state which is greater than the state itself.

There are thousands of anti-monopolists among Valentine's supporters. They believe that the republican party is the best party that ever existed to right the wrongs of the people.

The anti-monopolists among Valentine's supporters are scarcer than hen's teeth. There are a good many who call themselves anti-monopolists in order to catch votes or to curry favor with the farmers.

REPAIRS still continue at the White house, and the president on his arrival in Washington, after a month's absence, was compelled to quarter himself elsewhere.

REP. SHERMAN grows more cheerful in his views of public affairs as he advances in years.

There every day, and every cent of it is accounted for. I doubt if there can be found anywhere upon the Merriam a merchant who can show as clean a set of books as are kept at Washington.

OUR FOREIGN POPULATION

Thirteen per cent of the population in the United States is foreign born. In 1880, according to the last census bulletin 6,079,943 of the inhabitants of this country were not natives.

How large a foreign element existed among the men of the revolution cannot be determined as the first census gives the population without nativity.

The census brings out the fact that our colored population is about equal to our foreign, and where either element predominates the other is not conspicuous.
