But when this death current is carried into houses, although it be carried no further than the storage battery, an element of danger and death appears which may lead to a wholesale, although unjust condemnation of all systems of domestic electric illumination. Whenever the death current is thus actually introduced into a house to feed storage batteries, we hope the public will remember the distinction between it and Mr. Edison's current, which, like

the other details of his system of lighting, has been perfected with an especial eye to absolute safety. If the public will understand this distinction the Edison system will escape future censure for accidents and deaths caused, not by our safe current, another system of lighting used in streets but not adapted to houses."

Although it was the middle there is a more happy or prosperous of winter. I came into the office with patch of land on God s footstool than a linen duster on, for I was very poor then. A fellow named Jack Wright, who knew me out west, thought to have some fun, so he posted the office and had New York put on an operator named Bagley, at the end of the line, with a special of 800 words to The Journal. He had had my end switched

to a table about the middle of the room, near the manager's deak. Not suspecting anything, I sat down and commenced taking it. Soon Bagley commenced to whoop 'em up,' and, although I was accustomed to keep six or eight words behind in copying, I thought best to close up, especially as he commenced to send some awful sticking stuff, making i's of his m's and contracting his words, sending 'imy,' for instance, for 'immediately, I having to write it out in full. "There is a little experience I had out in Indianapolis that may interest you. Naturally, when I had the real responsibility of taking it, I 'bulled' it bad at first, as they sent it at the rate of forty words a minute. I off at the rate of about twenty-five words per minute, which I read and wrote off very easily. The only trouble was that we got '30' (good night) from the east about 2:30 a. m., while it was some time-an hour or more-later when we gave the last sheet to the newspapers. They com-menced to growl after awhile, and our manager dropped in on us one morn-ing and discovered our little game in full blast.

Are never imitated or counterfeited. This is especially true of a family medicine, and it is positive proof that the remedy imitated is of the highest value. As soon as it had been tested and proved by the whole world that Hop Bitters was the purest, best and most valuable family medicine on earth, many imitations sprung up and began to steal the notices in which the press and people of the country had expressed the merits of H. B. and in every way trying to induce suf-fering invalids to use their stuff in-

stead, expecting to make money or the credit and good name of H. B. Many others started nostrums put up in similar style to H. B., with vari ously devised names in which the word "Hop" or "Hops" were used in away to induce people to believe they were the same as Hop Bitters. All such pretended remedies or cures, no matter what their style or name is, and espicially these with the word "Hop" or "Hops" in their name or in any way connected with them or their name, are imitations or counterfeits.
