SUFFER

no longer from Dyspepsia, Indigestion, want of Appetite, loss of Strength lack of Energy, Malaria, Intermittent Fevers, &c.

BROWN'S IRON BITTERS never fails to cure all these diseases.

Boston, November 26, 1881.
BROWN CHEMICAL CO.
Gentlemen:—For years I have been a great sufferer from Dyspepsia, and could get no relief (having tried everything which was recommended) until, acting on the advice of a friend, who had been benefitted by BROWN'S IRON BITTERS, I tried a bottle, with most surprising results. Previous to taking Brown's Iron Bitters, everything I ate distressed me, and I suffered greatly from a burning sensation in the stomach, which was unbearable. Since taking Brown's Iron Bitters, all my troubles are at an end. Can eat any time without any disagreeable results. I am practically another person. Mrs. W. J. FLYNN,
30 Maverick St., E. Boston.

BROWN'S IRON BITTERS acts like a charm on the digestive organs, removing all dyspeptic symptoms, such as tasting the food, Belching, Heat in the Stomach, Heartburn, etc. The only Iron Preparation that will not blacken the teeth or give headache.

Sold by all Druggists.

Brown Chemical Co.
Baltimore, Md.

See that all Iron Bitters are made by Brown Chemical Co., Baltimore, and have crossed red lines and trade-mark on wrapper.

"WINE O. CARDUI" four times a day makes a happy household.

SABBATH SERVICES.

A Fusillade of New Year's Discourses.

Synopsis of the Sermons of Revs. Sherrill and Harsha.

The Sabbath preceding New Year's day was a quiet one about town, the arrival of Madame Nilsson being the most important event that transpired.

It was celebrated at nearly all the churches by sermons or services appropriate to the day.

At Trinity services were the same as on Christmas day; Rev. Chas. W. Savidge, of the First M. E., took for the subject of his evening sermon, "The Old Year;" Rev. W. E. Copeland, of Unity Chapel, gave "A Review of the Old Year;" Rev. A. F. Sherrill, of the Congregational church, spoke on "The Old and New Year, etc."

Your Habits.

Rev. W. J. Harsha's Sabbath evening lecture was upon the subject, "Your Habits," his text being chosen from Jer. xv., 6: "I am weary with repenting."

Butler's analogy is very dry reading, but its lessons are often practical and spicy. The good bishop seems to have endeavored to put his wholesome remedy in the form of a remarkably bitter powder. Among the most salutory of his prescriptions is this thought: That every successive stage of life not only prepares the way for the next, but seems mainly designed for that purpose. Youth seems adapted to prepare the way for manhood; and manhood with the greatest fitness ushers in old age.

The train of thought opened up by this suggestion seems specially fitted for us to-night. The old year prepares the way for the new; the bells of the past have fulfilled their mission when they have joyously rung in the present. We have been wise when we have drawn from that which has passed away a power and inspiration to accomplish that which is to come, and all this leads us to think of habit. For what is habit but the permanence of action in the present, to which the little things of the past have been leading? Habit is the channel of the river—but it has not always been as we find it now. The flowing of the waves of last year and the year before have worn this deep way through the soil of life; and now we cannot change our course if we would. And could we find a better description of the despairing exclamation of the creatures of habit than is given in the text: "I am weary of repenting!" Every drunkard says it, every chronic liar says it, every creature to whom the little actions of the past have become the binding laws of the present takes it often upon his lips

Let us look at these following points in regard to habits:

FIRST—THE FORMATION OF HABITS.

No man intends to be a drunkard or a thief. No man proposes that he shall form one of the countless multitudes who no longer are free men, but slaves to passion and appetite. Yet a thought leads to a wish, a wish to a purpose, a purpose to an action, an action to a repetition, and a frequent repetition to a habit. It is because young men do not, with sufficient care, guard the beginning of sin that the ending of it is so distressing and deadly. Formation of character is far easier and safer than reformation of character. In the spring you hold a seed of wheat and a grain of corn in your hand. It is far easier than to substitute the one for the other then in the autumn to pull up the corn stalk and find a ripened spear of wheat in its place.

SECOND—THE STRENGTH OF HABIT.

Samson was bound with new twine, and with green withes. These he broke, but he could not snap a lustful habit, which at length wrought his ruin. Habit is the strongest thing on earth, next to God's power. It makes of the highest minds foolish drivellers and of the happiest homes places of misery and shame. Alexander, Cæsar, Napoleon among conquerors; Porphery, Aurelius, Bacon among philosophers; Byron, Sterne and Poe among poets, could bind the world of politics, truth or fancy—but not a single one of them could rule himself! Only the power of God can subdue the habit of man.

THIRD—THE RESULTS OF HABITS.

What a man is at twenty-one he is apt to be at fifty. Habit makes the man. If you drill yourself in frugality, industry and love of knowledge, the future will show the influence of the present, just as the present does of the past. And if this is true up to the point of death, why shall it not be true of the hereafter? The habits of earth will be followed in the life beyond the grave. If any one denies this let them produce the proof of the falsity of the statement. Let your habits then be pure, enobling, Christly; study purity, temperance, charity. Avail yourself of the divine mercy offered in Christ, and live the devoted, self-forgetful life of which His is the pattern. Then the future will take care of itself.

If the old year could speak to you it would say: "I had my youthful days, my days of manhood and declining age I found that one period prepared for the next, just as I prepare for the next year that shall come Copy my example. In truth and virtue let the past drill you, and by a holy life do you pass on to others the benefit."

Rev. Sherrill.

The pastor of the Congregational church, Rev. A. F. Sherrill, took for his text, for his Sabbath morning sermon, "As for me and my house, we will serve the Lord" Joshua 24:15

While we may not stop to consider the natural and historical surroundings at this time, we will consider the principal theme, "The act of Joshua—its nature, influence and reward."

FIRST—NATURE OF THE ACT.

It was an open, public act to which not a few could testify. It was a manly and right act, to cause emulation in the hearts of the wise and cause shame in the hearts of the perverse. Whatever had been the experience in his life previous to this, he felt it was opportune at this time to profess his allegiance to his Lord. On the contrary there are some who, while they have a faint hope that they are Christians, will not make a profession before men and fight for their Lord and Master.

SECOND—THE INFLUENCE.

A. On Joshua. B. On the people

The excitement of battle had long passed away, and now the day which had dawned after the darkness of the night had passed the Israelites were enjoying. But it became evident to Joshua that plenty and pleasure were conducive to idolatry, which was in the spirit of men, if not in their acts. Thus Joshua convenes the people because of the influence which this profession would make; and this as all laws are founded in the needs of our being. By this statement, Joshua prepares the road for himself, and by it warns any one against obstructing.

B. And the people are in sympathy with their leader, and say they will serve the Lord, and they were true to their vow all the days of Joshua.

THE AIM OF JOSHUA

was that of an unselfish purpose. Let each man who, by his position is or should be working for the people's good, ask themselves if their morality is defective here. Let each Christian ask himself if his aim is sanctified. For if there is a proper adjustment of the engines of warfare there will be victory over sin and immorality in this or in any city, as Joshua was successful with his fixed aim, unobstructed by selfishness or cowardice.

GOOD DEEDS.

The little daughter of Alfred Wells of New York state, desired to unite with the church, and when she made her desire known to her father, her father requested her to wait one year. And when the year had expired, he requested her to wait one month, and then he would go with her and also make a profession of faith. And the little girl was by this the cause of her father's conversion.

The brother of Chas. G. Finney fought against the impression for fifty years, which was made upon his mind when his brother confessed Christ, but at last became a Christian also.

The deeds of man, yes, mighty deeds; they cast their shadow or their ray on every pathway, though it leads to hades or eternal day.

THIRD—REWARD.

A still, a quiet conscience was possessed by Joshua. And when he was buried, the soul had fled to cease from the cares and trials of life, and to go to the Heavenly Father. And while some may make a profession as Joshua did, may not others make it a day of repentance and good resolutions.

It is written of Hercules that he was met by two forms—pleasure and virtue—that he might make his choice; and by choosing virtue he won a place among the immortals. And it is that which will bring a reward which the youth of our city must choose. The guilded palaces of pleasure and ease are but the quicksands upon which many a craft has been left to the mercy of the waves.

ACCESSIONS TO THE CHURCH.

On account of some of the persons, who intended uniting with the church, expecting to be absent from the city next Sabbath—the regular communion Sabbath—they were received by the congregation immediately after the delivery of the sermon. Among those who united with the church was General Howard and family.

OCCIDENTAL JOTTINGS.

COLORADO.

A census of Fort Collins is being taken.

The Herdics are now running in Denver.

Cataract lake in Pitkin county has been stocked with 300 trout.

From present indications the ice crop of Colorado will be very short.

Two thousand dollars have been raised in Silverton for an Episcopal church.

The Bessemer works at Pueblo are producing two miles and a half of steel rails a day.

It is said that there is in the Powder valley alone $2.0,000 worth of wheat to be marketed.

The school board of Leadville is in debt to the amount of $150,000 through its inability to collect the school tax.

The bottom of a furnace which had been in operation eight months at Golden was removed recently. Its value was $37,0.0.

Two new towns have been laid out in the new mining district of Red Mountain; one is called Roger City and the other Borella.

Leadville has a mining company managed entirely by women. The company is the Colorado Queen mining and tunnel company.

During the past year there has been shipped out of Weld county 10,900 beeves. New purchases to the extent of 21,50 0 head have been made and placed upon the ranges in the county.

The coal banks near Walsenburg are turning out about 400 tons of coal daily, most of it being used by the railroads. The capacity of the mines will be increased to 500 tons a day.

A Boulder county woodchopper who built a fire last week to warm himself succeeded admirably. He also warmed a tract of country three miles long and destroyed the logs at Wood's mill, and the barn and the Forest house, quartz mill and barn, the houses of Mr. Beloy and Mr. Greene, and the Boulder county tunnel ore house.

WYOMING.

The territorial supreme court met in Cheyenne on Tuesday, January 2nd in regular session.

The Cheyenne press is clamoring for a better city government. It thinks that the coming election will bring it.

Seventy-eight cars received repairs at the Green River shops in November. There is a rumor that the shops at Cheyenne will be moved to Green River.

The city council of Cheyenne has let a contract for building a dam in Crow Creek so as to divert the water to a lake near the city. The price paid for the work is $31,-373.

Cheyenne's electric light company will soon start up. The plant is furnished with two dynamo machines two fifty horse power boilers and one forty horse power engines.

The feeding of hay to stock on Wyoming ranches is becoming more common each year. This season between 12,000 and 15,000 are thus fed, a large increase over the last previous season.

DAKOTA.

Mayville has received an Odd Fellows' lodge.

Millbank has taken steps to organize a board of trade.

Huron is to have a new Methodist Episcopal church.

Rapid City, in the Black Hills, will soon have water works.

A sash, door and blind factory is being built at Bismarck.

The artesian well at Bismarck is now down 725 feet. It will reach a depth of 800 feet next week.

The bridge across the Dakota river at Huron is completed.

The Deadwood Terra company has paid $800,000 in dividends.

The Father De Smet mine, Central, for the last half of November, yielded $21,-874 49.

The Homestake mining company paid out $50 000 on the 26th of December. During 1882 the company has paid to stockholders $600,000.

Calamity Jane, a noted character of 1877 and 1878 in Deadwood, has been living on a ranch for two or three years. She is again on the warpath. Her specialty is dexterity with a poker deck and a six-shooter.

MONTANA.

A recent find in the Atlantic mine at Glendale uncovers over $100,000 to sight.

The silver, gold and copper product of Montana for 1882 will not fall below $3,-0.0.

Custer county is the largest county in the United States. Its area is 33,000 square miles.

The increase in the last year in the valuation of Custer county property, aside from the railroads, is $321,206.

Over 50,000 head of Montana cattle have been sold this year in Eastern markets, and fully 3,000,000 pounds of wool.

Deer Lodge is now the point of supply for Helena, Missoula and other points north of the end of the railroads.

In the Barker district eggs are worth $1 50 per dozen, butter 95 cents a pound, potatoes 6 cents a pound, and flour $10.00 per hundred.

One thousand dollars each is charged by the Northern Pacific company for corner lots in Livingston, and $500 each for inside lots.

The largest sum realized this year for mining property in Montana is for the Drum Lummound mine, near Helena. It was sold to an English company for $1,-500,000.

A promising bank of superior bituminous coal is being developed near Bozeman. A track from the Northern Pacific will tap the deposit in the spring.

It is said that the desperadoes of Weeksville have the population so thoroughly cowed that they would be afraid to open the door if a man was murdered on the steps.

An important enterprise has just been completed in the Basin Creek flume, between the Colorado and Montana smelter, which cost $30,000. It will be used to transport wood to the smelter.

Twelve years ago a Yankee ranchman on Horse prairie started in the sheep business with one old ewe as a starter. He now has over 600 head, the multiplied increase of that one old ewe.

IDAHO.

There are 37 prisoners in the territorial penitentiary, at Boise City.

Important developments are being made in the Muldoon mining property, near Hailey.

The governor's message to the legislature shows a decided improvement in all territorial enterprises during 1882.

WASHINGTON.

New Tacoma is experiencing a boom The prospect that the place will be the terminus of the Northern Pacific on Puget sound has attracted lots of people there. The hotels are crowded and business is good.

A number of prisoners confined in the jail at Goldendale, escaped last Monday night, taking with them all the jail blankets, a needle gun and 150 rounds of ammunition. Three of the fugitives were stock thieves.

The channel cut through the St. Helen's bar, a few months ago by the steamer Walla Walla, has proved a complete success, as the river current has deepened it two feet since it was cut, instead of filling it up as was feared might be the result.

OREGON.

Five cars loaded with wheat, near Albany, were smashed up and the contents ruined last week.

There is a project on foot to build a wharf at Port Orford, in southern Oregon, which is very much needed, as at the present time all freight must be landed in surf-boats.

CALIFORNIA

A steam plowing company has been formed at Stockton.

The Red Bluff academy has recently purchased a $5.0 telescope for the use of the pupils.

The corn crop in the northern part of Inyo county has been ruined by early frosts this season.

A large number of incorporation papers, principally for mining companies, are being filed in San Francisco.

The county jail at Nevada City has been lined with heavy boiler iron. The prison contains several desperate prisoners.

A curfew law has been made at Grass Valley. Any boy under 18 years of age found on the street after 8 o'clock will be arrested.

The Napa Water company have selected a reservoir site on the outskirts of that city, and the building of water works will be commenced shortly.

A canal scheme to water the land on the west side of the San Joaquin valley, in Fresno county, is talked of. The estimated cost will be about $40,0.0.

During the season ended May 10 last 11,0.0 tons of beets were used at the beet sugar factory at Alvarado. The expenses were $18,000 and the profits $15,000.

A fabulous individual at Chico recently had $2 150 sent to him from the east, and was proceeding to drink it up. He spent $150 for whisky in one day, when his friends took his money and will attempt to have a guardian appointed for him.

Like many other towns that are situated in the center of a wool-growing district, Fresno wants a woolen mill. Six million pounds of wool were shipped from Fresno county last year and transported at a large expense to other parts of the country to be manufactured.

NEVADA.

The Virginia and Gold Hill Water company's ice house at Gold Hill was destroyed by fire last week. Loss, $30,0C0

The deficiency of $2,000 in the accounts of ex-Treasurer Norton, of Washoe county, was settled by his bondsmen, who compromised with the county commissioners for $1,0C0.

An iron tank containing about fifteen gallons of sulphuric acid exploded in the Bullion quartz mill at Paradise valley last week. Two men were injured, and every pane of glass in the building was shattered. The cause of the explosion is attributed to the closeness of the tank to the engine boilers.

The Bodie Free Press says: Owing to the extensive excavations in the hill, one-half of Bodie bluff is slowly moving east. There is a crevice now a foot in width extending across the middle of the mountain. The work of Nature has thrown the standard consolidated shaft out of plumb, and the work of "falling" is still in progress.

ARIZONA.

Since November 26th last nineteen convicts from various parts of Arizona have been placed in the penitentiary.

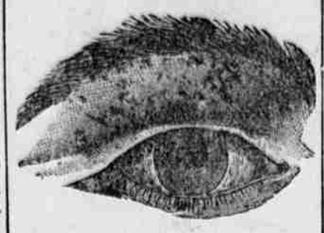
At Prescott, last week, a bond for twenty mines in Copper basin was placed on record by a company of English capitalists. The conditions of the bond are that within six months next ensuing the capitalists are to pay the owners $3,500,000.

NEW MEXICO.

The San Pedro mines are turning out large quantities of copper.

Ground will be broken at the Clifton branch of the Silver City railroad at an early day.

PROF. SAMUELS,
OPTICIAN



OF QUINCY, ILLINOIS,

Has returned to Omaha (for a short time only), where he can be consulted at parlors,

PAXTON HOUSE.

Prof. Samuels offers to all those that are suffering from Weakness and Defective sight his

IMPROVED
CRYSTAL SPECTACLES!

Superior to any other in use, as the following home evidence of well-known people of this city and vicinity will testify.

TESTIMONIALS.

COUNCIL BLUFFS, IOWA, December 2d, 1882.
Prof. P. Samuels:
Dear Sir—Some two years and a half since you visited this city, and at that time I was troubled with my eyes, caused by excessive proof-reading and other office work to such an extent that I could at times hardly read, study or decipher plain print without frequently resting them. You fitted me a pair of glasses for me that are next to indispensable, and I have no hesitancy in recommending persons to you who may be troubled with weak eyes. Yours truly,
J. C. MORGAN,
Editor and Publisher Globe.

COUNCIL BLUFFS, February 14, 1880.
Prof. Samuels:
Dear Sir—I feel that I would be ungrateful indeed if I did not in some manner express my gratitude to you for the wonderful benefits received from the use of your glasses adjusted to my eyes by you. I have tried other glasses and means but all to no purpose, and I had concluded myself doomed to go through the world nearly sightless; but whereas I was nearly blind, now I see, and am able to read as I never could before. I regret that I had not met Prof. Samuels sooner, as then I might have been enjoying this blessing of seeing. In hoping that many others may have the benefits of your help, I am, gratefully yours,
MISS ABBY WALTON, Nurse.

While on the Pacific coast years ago I became partially blind, and finally the sight never recovered. I made the attempts of three to get glasses to help me the sight recovered, but it was of no use, as no one could help me. When Prof. Samuels came to Omaha I thought that I would go and see him and see what he could say. He examined my eyes and told me that he could make me see, not with one, but with both eyes. I told him to go on and make me see, as I had given up the idea of ever being able to see with again. To my surprise he made me a pair of glasses that enabled me to see with my right eye as well as with the other. I will cheerfully recommend him to all those that have given up hopes. Yours, with good sight,
GEO. E. GIBSON,
Herald Office.
Omaha, Neb., December 20, 1882.

I used to have very weak eyes and tried a great many things to help them, but it was all in vain. When Prof. Samuels was in the city two years ago I was advised by one of my friends who was then attending to call on him. I done so, and am glad to state that he helped me wonderfully. He fitted me at that time with a pair of his glasses, and they gave me instant relief, and after using them for a short time my eyes improved so that I had no use for the glass at all. My sight is perfect, although I was advised not to put on glasses, for I would have to wear them all the time, but Prof. Samuels' glasses were different. They improved my eyes, and I would advise all persons who have trouble with their eyes to call on him. Respectfully,
A. T. SWIGART,
City Police, Omaha.
December 15.

OMAHA, September 18, 1879.
Some years since, while engaged in editorial labor at night, my eyesight became impaired, and I found it difficult to find glasses which would afford any relief. During the past two or three years my eyes grew weaker by constant use, and began to be alarmed lest I might for a time be obliged to lay aside my books, which I so much delight in. Providence, I think, has kindly aided me by sending Dr. Samuels to this city. By means of his improved crystal glasses for several days I find the natural vision restored, and I am now able to read and study as much as I please, without tiring the eye or causing pain. It seems wonderful that such an effect can be produced in so short a time, and I have no doubt it will be permanent.
I am glad Prof. Samuels has visited this city where so many need the aid he can afford them and I hope his glasses will be introduced and extensively used here.
E. H. P. JAMESON,
Pastor First Baptist Church.

OMAHA, Neb., December 12, 1882.
Prof. H. Samuels:
Dear Sir—I have now used the glasses with which you furnished me for one week and can truly say that I have received more comfort in that short space of time than in years previous. Almost from my earliest recollections I have suffered from a disability to see distinctly even when close by, sometimes failed to know or recognize my most intimate friends, all of which was a constant source of mortification to me. I tried remedies and glasses of different kinds with but very little benefit and until I met Prof. Samuels' treatment and he benefitted as I have been. Very truly yours,
MARY BOSARD,
2530 Decatur Street.

ARTIFICIAL EYES
ALWAYS ON HAND.
