Let Us Unite.

For once the Globe is eminently correct. The advocacy of the principles of reform in our city government is a new departure on the part of the press of this city. The Globe of Satseday night whirls its gans upon its alies and our enemy and gives them a broadside that does credit to its edi-

This should be our motto, for anything less ation, fretfulness, etc., by using than this will make our city a by-word. Brown's Iron Bitters. than this will make our city a by-word. The Duty of Assessors. The following communication refers to the law requiring the assessment of a half mill tax for the benefit of soldiers'orphans and the making of a list of the same. Are you and each of you doing your
duty and obeying the laws of the state,

Disease of the Kidneys.

The frequency and fatality of diseases of the Kieneys give an especial interest to the study and investigation of them, and elevate any obscovery as their essential instures, or the means of curist them, to a ver importat plact in the art and science of medicine. When the fact is recalled that the kidneys are the great scavengers of the human body, their office is to remove from he blood any and all impurities which may exit in it; that, if this office be entirely shut up, life cannot be long maintal ed. The products of used-up and were-cut principles of the human body, retained in the blood so potten the nervous system, that its functions or outles will be arrest d the brain will tease to take cognizance of surrounding persons and objects, consciousness will be obliterated, the vital anot will be some on getted, the heart and lungs will cease to perform their rart in the phenomena of life—they sop. Fre this, however, the most terrible form of all human suffering is apt to take place and gives an admit mal herror to the hour of death. If the ffices of the Kidneys bo so essential to life, that it must cease soon after they cease to act, the conclusion is incessanished they—the change means of health. The urine is the depurating secretion eliminated from the blood by the Kidneys—the channel by which morbife agents are carried out of the secretarial down as a necessary sequence. To be serve health it is necessary sequence. To be serve health it is necessary to preserve a healthy condition of the Kidneys. I think it a duty I owe to humanity to say what your remedy has done f r me. One year ago I contracted a bad case of Blood Di case, and not knowing the result of such roubles, I allowed the best physician in t is city, who 'reated me for six months. In that time I took over 600 public or Proproporties or Marchay I grain cach. for six months. IN THAT TIME I TOOK OVER 800
PILLS OF PROTOIDDIN OF MESCURY I grain rach,
and had run down in weight from 210 to 167
