TOWNS

Monsy for the Unmarried.

One of the most solid and subst: itial institutions in this country is the Marriage Fund and Mutual Trust Association, of Cedar Rapids, Iowa. They are organized under the laws of Iowa, and heir officers and directors are among the leading and most prominent business men o Cedar Rapids. Every unmarried person should have a certificate in this association.

It is a splendid investment, as safe as government bond. You can just as well have a good sum of money to commence married life on as not. A large number of members have been paid off, receiving over 300 per cent on their investment. Write for circulars fully detailing the plan, which is the finest known. Do not postpone it. Good agents wanted. Mention where you saw this notice. Sugar Growers in New Jersey. 25,000 acres of barren land in the south part of the state and went into the business. Last year about 160 tons of sugar were manufactured and the state bounties paid amounted to \$8,678. Land valued at \$25 an acre raised \$14 worth of cane. The experiment is held to have proved very successful, and, in accordance with a recommendation of the governor, a bill was introduced this winter to discontinue the bounty. This bill was defeated and another was introduced to limit the appropriation to \$8,000 per annum. This has also failed to pass, and the bounty will

THE EARTH'S ATMOSPHERE, encouragement offered by the act, and it is considered a good investment by the legislators. A considerable further increase in the production is expected.

The lecture of last evening in the Horsford's Acid Phosphate Lowell institute course, by Professor Langley, treated mostly of the effect of the planetary atmosphere in modirecommended for headache occasloned by indigestion, and whenever there is a general feeling of sluggish-ness and lack of energy. fying the sun's rays. The impression is perhaps general, he said, that the

"Jack."

utility of the atmosphere for the pur-poses of life on this planet is in sup-plying exygen to the body by means A year or so ago, as the foreman of one of the iron works of this city was

J. D. Howe, city attorney

For salary of W. I. Baker, as councilman of the lungs. On an atriess planet human life could not be sustained, crossing the yard one day he espied a but many animated creatures do exist little skip of a boy, seemingly not on our planet without breathing apover eleven years, seated on a big fly. paratus and it is conceivable that oxy wheel and chewing the bitter end of gen might be supplied to the blood by reflection. other means than through the lungs. A being who might be able to recall

"Who are you?" "I'm Jack. "What are you doing here?" "Resting." "What do you want?"

the history of the past by ages, in-stead, as we do, by centuries, would be able to relate many in-stances of life being preserved through long periods when there "A job." Those were the inquiries and anwas neither air, as we now know it, or lunge to breathe it; but he would not be able to recall the time when life and warmth were not synonymous terms. No form of life could be mainted without the all-vivitying element of heat. The lecturer remarked that, in what had been said on the Jack to work in the part. that, in what had been said on the Jack to work in the yard.

previous evenings he had mainly No one thought the boy would stay spoken of scientific results, which had been reached by the investigations of other persons. He had now to speak of results gained through certain re- faithful, and as the weeks went by he of results gained through eartain researches and experiments of his own.

gained friends. One day he walked Huckelbone, hay up to he foreman and said. wherein the inquiry was directed to "I want to learn the trade."

upon the earth. That effect is but comparatively small and a ready illus-cold chisel." you are not big enough to handle a "I can whip any 'prentice boy in

sidering that on a certain day of Jan- this shop!" was the earnest declarauary, for example, or a particular year, the altitude of the sun being low at the noon hour, the mercury stood at zero. In the following year, on the corresponding day of the same month the job."

tion.

"Just hear him! Why, any of the lot could turn you wrong side out! When you get big enough to whip the smallest one you come to me for a job."

thermometer might register at noon in this latitude 60° or 70° above zero, yet in the effect of the direct and said:

"Come out doors." "What do you want?" "I'm going to lick you." "What for?"

"Because I want a chance to learn of this investigation it should be the trade." The two went out, and in sight of

borne in mind that heat, light and chemical action are but modes of one common thing which lies beyond or exists prior to them. Thus by means of the spectrum, which has to deal immediately with the phenomena of light, an inquiry with fruitful results may be made concerning the action, or the presence or absence of heat. But

the presence or absence of heat. But in there to day you will find him with what is desirable to get is not those greasy hands, oily face and a head full facts which the spectrum as ordinar of business ideas. Jack carries the ily seen discloses, but such as are beyond the reach of the eyesight. The object is to go down into the spectrum, where the eye can not see, that thus may be ascertained the amount thus may be ascertained the amount of heat produced by the direct rays of the sun outside the line of the earth's atmosphere. This can not be found out by any direct experiment, as we can not get beyond that atmosphere nor survive if we could resch that point in the lacturer.

The mathed as the lacturer.

space. The method, as the lecturer And here in Detroit are hundreds proceeded to explain, is by getting an of boys who complain that there is no approximate, but so far as it goes a chance for them, even when backed by sure result, and then estimate or calmoney and influence. They wait and culate what would be the result if the wait and whine and complain, and method of approximation were carried leave it to waifs like little Jack to call to the absolute limit. The plan adopt-ed was to make comparative measure-boldly into a great manufacturing ments of heat produced by the sun's works and say:

"I'm here-I want a job!"

and at or near the top, the difference being a consequence of penetrating through and getting rid of about three miles of the earth's atmospheric envelope. The place chosen was Mount Whitney, which is within the limits of the United States, but near the northern boundary of Mexico. It was chosen because of its situation in the midst of a vast desert region where the and at or near the top, the difference midst of a vast desert region where the midst of a vast desert region where the atmosphere has but a slight amount of misery will cease, and henceforth you will rejoice in the praise of Electric Eitters moisture. The lecturer described and Soid at fifty cents a bottle, by C. F. Good illustrated on the white screen the ap-

paratus used, which had to be, so Proposals for Military Eupplies, far as the heat-defining and register-ing part of it is concerned, invented for the purpose; and he also showed upon the screen some pictures of the desolate mountain region to which; with his party, he ascenced. Among the curious results which he lecturer

Proposals for Military Supplies,

Headquarters Department of the Platts,
Chief Quartermaster's Office,
Oman, Neb, March 7th, 1833

SEALED PROF SALS, in tripleste, subject to the usual benditions, will be received at this office until 12 octock M, on Wedersday, April 18 1883, or at the same hour (a lowing for the officence in time) at the offices of the Quartermasters at the following nomedate love, at which places as diffred they will be opened in the presence of binders for the furnishing and delivery of Military Supplies during the year commencing July 18t, 1881, and ending June 30th, 1884, as follows Wood. Hay and Charcal, or such of said supplies as may be required at Omaha Dero', Fort Omah', Fort Niebara, Fort Scincy, Chey-nne Depot, Fort Russell, Fort's cele, Fort Douglas, Fort Robinson, Fort Bridger, Fore Laranie, Fort McKinney, Fort Washakie, and Fort Thornburgh of 300 tons of Coal of 2240 pounds to the ton.

Frances will also be received at this office un named are blueish, and the conclusion appear to be blue. The main result reached was proof that the heat by

is owing to the absorbing heat capacity the atmosphere has, is in storing on From this it may be concluded that

amie, Fort McKinney, Fort Wahakie, and Fort Thornburgh of 300 tons of Coal of 2240 pounds to the ton.

Froposals will also be received at this effice up to the day and hour above named, for the delivery on the cars at the print neare to the mines on the bine of the Union Pacific Railway, of eight thousand; ns of Coal, of of 2240 pounds to the to. Also for delivery at the Omaha Depot, or at a ations on the maintline of the Union Pacific Railway east f om Kearney Junction, of two million pounds Corn, and on-million pounds Oats, bids for gr in should state the rate per 100 lbs, not per bushel.

Proposals for either class of the stores mentioned, or for quantities less than the whole required will be received. Each proposal should be in triplicate, separate for each attick at each station, and upon the blank form furnished under this advertis ement, guaranteeing that the party making the proposal shall not withdraw the same within sixty days from the date announced for opening them; and that if said proposalis accepted and a contract for the supplies bid for, awarded thereunder, he will, within ten days after being notified of the award (provided such notification le made within thesixty days above mentioned), accept the same and furnish good and sufficient sureties, at once, for the fail him performance of the contract. The government reserves the right to reject any or all proposals. A preference will be given to articles of domestie production.

Blank proposals and printed circulars, stating the kied and estimated quantities of wood, hay and charcoal required at each station, and giving full instructions as to the manner of tidding, conditions to be observed by bidders, and te ms of contract, etc., will be furnished on application to this office or to the Quartermaters at the various stations named.

Envelopes containing proposals should be reached. The proposals and proposals.

In 1881 the New Jersey legislature passed an act to encourage the growth and manufacture of sorghum and sugar. The farmers were to receive \$2.50 for every ton of cane raised.
