EXECUTIVE MANSION, LINCHIN, NEB., Mar. 30, '83. To the People of Nebraska:

The subject of Forestry, or Tree Planting, is fast becoming one of National importance, and is receiving the careful attention of thoughtful minds throughout our own country, and in other lands as well The steady and rapid disappearance of

Our forests, is viewed with apprehension.
We are for ed to consider the matter of future demand and supply, and in view of the facts it becomes a question of grave moment. The disappearance of the natural growth of timber, has been followed in many of our states by the drying up of springs, and brooks, a decreased annual rain fall, and consequent increa ed fre-quency of seasons of extreme drouth. The presence of trees, and forests exerts a direct and controlling influence upon the moisture of the air, and the amount of rain fall, as well as serving to lesson the extremes of temperature, and great modifying the severity of climate and season.

earnestly inviting competition thereof, from all.

The question of tree culture—important as it is to the country at large—is of paramount importance to our state.

Nebraska embraces within her limits, Nebraska embraces within her limits, lands that are unsurpassed in fertility; and effering as they do, advantages in the way of easy and simple cultivation, they are being developed with a rapi lity that is nearly, if not quite, without precedent.

Therefore, to the end that the past gratifying degree of development, and improvement, may be maintained, and if possible increased, I, James W. Dawes, governor of the state of Nebraska, hereby name WEDNESDAY, THE 18TH DAY OF APRIL, D. 1883,

to be observed as "Arbor Day," embracing in its design results so varied, beneficial and far-reaching; saving for its aim and purpose, the common interest, and general welfare of our state, it should be strictly bactved by all classes.
Having reference to both ornamentation

and usefulness; to beauty and utility; con-sidering the claims of present et joyment and ultimate prefitable investment, care should be exercised and selections for planting made, from such varieties as have been approved by the tests of time and experiment, as suited to the conditions of our soil and climate.

Let it be remembered that the person

who plants and causes to grow if but a single tree, shrub, or vine, is contributing his or her mite in the way of added inducement and attraction, tending toward that future development and ultimate standing of Nebraska, for which we are all tration and general debility, I was standing of Nebraska, for which we are all advised to try Hop Bitters.
