COLORADO STATESMAN.

A LIVELY REVIEW OF TELLER'S CAREER. WASHINGTON, April 30.—The unpleasant personal relations which, it is understood, have for some time existed between the secretary of the interior and Senator Hill, of Colorado, have at last manifested themselves in such a way that publicity is likely to be given to the cause of the disagreement.

Beginning with his personal grievances, Senator Hill in his letter charged Secretary Teller with attempting to place him in a false and unpleasant position by causing to be published unfair and inaccurate reports of which statements and requests. He asserts, furthermore, that the secretary has been guilty of violation of ordinary courtesy in repeating to newspaper correspondents for publication what had been said to him in private interviews.

After reviewing Secretary Teller's position in the last campaign in Colorado, Senator Hill takes up the secretary's administration of affairs of the interior department and subjects it to detailed criticism and severe censure. Referring to the lease of the Yellowstone National park, he says Teller devised and dictated its terms and then allowed his assistant secretary to take all blame and public disapproval, which followed its execution.

After congress has returned he has taken across the secretary evaded both letter and spirit of law and practically gave the Rufus Hatch syndicate a monopoly of the entire park. In dealing with questions which have arisen in connection with the public domain, and particularly those growing out of lapsed land grants, he charges Secretary Teller with acting in the interest of the great monopolies and against all interests of the government and people.

He also asserts and attempts to show that Secretary Teller is connected with a number of land deals in Colorado. In conclusion he views the manner in which the change of the interior department has been dispensed since the appointment of Teller as secretary, and other number of instances in which notoriously unfit and incapable men have been given places, while experienced and able employees have been, but any assigned reason, summarized.

Among the latter he mentions Mr. Albert Johnson, late governor of Colorado, a gentleman of high character and fine ability, who, he says, was dismissed on account of Secretary Teller because he awarded a surveying contract to his friend.

Teller upon being asked whether he had treated him with respect, he answered in an outline, "No, he had not, but he had not as yet had an opportunity to do more than glance through it. He didn't desire to present to make any statement for publication with regard to the matters therein referred to. He understood Hill had arranged to give his own letter publicity by furnishing copies of it to a number of correspondents, but whether it would be worth while for him (Teller) to give it equal publicity to a reply to a subject he had not yet considered. He would, he said, read Hill's letter carefully to-morrow and give it such attention as it seemed to him to deserve.

Senator Hill said to-night, in response to inquiries, that he had written Secretary Teller the letter above referred to because, in the first place, he thought the latter had treated him with great discourtesy. Not long ago he had said, he said, a private letter to the secretary upon a matter of business, and had been hurt and provoked a few days later to find an alleged account of this interview in a St. Louis paper; an account, however, in which his (Hill's) conversation was so distorted and misrepresented that he was placed in a false and despicable light. For this distortion and misrepresentation, as well as for the publication in any form of what in a private and confidential letter to the secretary he believed Secretary Teller to be responsible, and he did not propose to indefinitely submit to this sort of treatment. The secretary's connection with recent newspaper attacks upon him could, he said, not be traced. Another reason for writing a letter to Teller was that he (Hill) knew many things about the management of the interior department which the public was ignorant of with regard to which it should be set forth in his letter. He said he had not himself written

THE CROOK CAMPAIGN.

TROOPS MUST NOT CROSS THE BOUNDARY.

WASHINGTON, April 30.—The secretary of war said to-night that the orders sent General Crook Saturday, directing him to be careful to observe the convention with Mexico in relation to crossing the border by United States troops, were issued because of reports of General Crook's intention to make a raid across the Mexican line for the purpose of dislodging a band of hostile Apaches from Arizona. The agreement with the Mexican government made in August last, while it permitted troops of either country to cross the border in pursuit of a flying band of marauding Indians, did not, he said, admit their remaining for the purpose of beginning raids on resident Indians or their crossing for that purpose, as newspaper reports said Gen. Crook contemplated doing. The consent for the United States troops to cross under such circumstances could only be granted by the Mexican senate and pending negotiations to obtain such consent he deemed it prudent to suggest to Gen. Crook to exercise caution in keeping within the limits of the present agreement. He said the war department was notified to-day that the telegram sent Saturday had been forwarded to Gen. Crook in the field.

CAPITOL NOTES.

WASHINGTON, April 30.—When the star route trial opened to-day Ingersoll announced that he was willing to submit the case to the jury for Dorsey provided government counsel would agree to proceed no further with the argument. The court then wished to hear from the government. Merrick answered that the government has not yet completed the opening of the case. "That is enough," said Judge Wiley and Bliss began his address to the jury.

KIN AND RAUM. The president has not yet signed the commission of Kein as chief examiner under the civil service commission. It is stated at the white house that the appointment will not be withdrawn unless the commission express a desire to that effect, because it was made upon their recommendation. The general impression now is that no appointment as commissioner of internal revenue will be made at present. Deputy Commissioner Rogers is acting as commissioner to-day and will continue in that capacity until an appointment is made.

THE NORTHERN PACIFIC. The secretary of the interior rendered a decision in which he approves of the map definitely locating the Northern Pacific railway through the Rocky mountain division, filed July 6, 1882. The line so approved departs from the line of the general route at Gallatin city, and unites with it again at Little Blackfoot. One effect of the change between this point is to shorten the line some forty-three miles. It will also have an effect to release from the land grant, and restore to the public domain more than one million acres of land.

TREASURY FIGURES. It is estimated that the decrease in the public debt for the month of April amounts to about \$3,500,000. The smallness of the amount is accounted for by the fact that \$10,000,000 has been paid out during the month on account of pensions. The issue of standard silver dollars from the mint for the week ended April 28th was \$168,000; for the corresponding period of last year, \$161,000. Treasurer Wyman to-day mailed 8,119 checks to pay \$2,254,417 in checks to-morrow on the 3 per cent loan of 1882; 1,407 checks to pay \$312,370 due on the funded loan of 1881; also checks amounting to \$6,450,226 in payment of bonds of the 120th call, maturing to-morrow.

NEW BANKS. The comptroller of the currency has authorized the following banks to begin business: Los Angeles National bank, Los Angeles, California, capital \$100,000; Ennis National bank, Ennis, Texas, capital \$100,000; First National bank of Deatur, Tex., capital \$50,000. During the month of April twenty-nine new banks were organized.

SHIPS GAS. Proceedings are to be commenced at once by the District authorities against the Washington Gas Company for not lighting the city according to contract. The act of 1874, under which the company supplies gas to the city, provides that gas shall be of sixteen-candle power, and shall not contain more than twenty grains of sulphur or more than five grains of ammonia in any form in 100 cubic feet. The penalty for violation of any one of these provisions is \$100 fine for every day of violation. The inspector of gas and meters having reported that on several occasions the law has been violated, suit to recover the penalty has been begun in court.

Virginia Crops. ORANGE VA., April 30.—A heavy frost and ice in Northern Virginia is blighting the fruit, but there is no injury done to wheat. No corn has been planted, as it has been too cold and wet.

BANQUETING DR. GREEN.

LONDON, April 30.—A complimentary banquet was given to-night to Dr. Norman Green, president of the Western Union Telegraph company, by John Pender, member of parliament, at Ship hotel, Greenwich. There was a large number of guests, among whom were Sir Hussey Vivian, Sir Sydney Waterlot, Prof. Rogers, George Armitstead and Sir George Elliott. John Pender, in proposing the health of the queen said her dominion extended over Americans, where she is as much loved and esteemed as in England. The next toast was to President Arthur. Pender said he knew it would be drunk as heartily as that to the queen. The president never died, but there were occasions when he was stricken down by the hand of the assassin. On the last occasion when this happened England, and its queen above all, expressed such heartfelt sympathy as never can be forgotten in America.

Viscount Bury, replying to the toast to the house of lords, thought it was a great honor his health should be drunk by such distinguished company. When, if ever it should come, the house of lords should be abolished he would apply for the post of electrician to the combined cable company (Pender remarked, "and a very good position to be.") Pender in proposing the health to Green as the toast of the evening said before submitting it he must apologize on account of illness for his absence, (referring to Lords Monch, Tweedale and James Anderson.) Continuing he said, "This is the doctor's first visit to Europe, and that fact is the only fault we can find. He has told me he has looked forward to visiting the old country and I am convinced that England is ready to honor as he is to honor England. The former of Dr. Green as president of the Western Union telegraph company is one of the most arduous and responsible in America. He fulfills the duties of his position with the greatest energy and ability and I can tell you such a position requires a man of vast ability and unimpeachable honor. I think it always well on occasions like the present to justify a man by statistics. Dr. Green presides over a company with \$80,000,000 capital, 13,000 stations and 20,000 employees. The company owns 150,000 miles of poles and 425,000 miles of wire. During my visit to America and Canada I found no part or district without a Western Union station. The car wherein I traveled was stopped by a small white flag and a telegraphic message handed me containing the news of Tel El Kebir victory. I replied, congratulating Sir Garnet Wolseley, and before sunset of the same day he had the answer. The object and mission of telegraphy is peace and unity, and it has come more in this direction than any political or social efforts have accomplished. When we consider that almost every commercial transaction necessitates the use of the telegraph we must understand what vast influence the telegraph controls.

In the earlier times the idea prevailed that when the cable was broken it was irreparable. Now it is known that we are as much masters of submarine cables as of railways. The cable to the cape, I am sorry to say, is broken again this morning, but I am confident it can be repaired in a day or by exertions which will have the benefit of the experience gained by the last breakage, which so seriously inconvenienced us. The telegraph is an element of social, political and commercial unity. Who can foresee the incalculable results that must proceed therefrom? I drink to the health of the head of the telegraphic system of America, and long may he be spared to continue in the good work he is now doing.

Dr. Green, in replying said: "I feel an overwhelming sense of the great honor done me. After seven days of disagreeable rocking on the ocean I am delighted with such a welcome. I had an idea that on come to this vast metropolis a person lost his individuality, but I suppose from my being selected for such distinction that I am an exception from the rule. I see before me in a strange land, the American and English flags entwined. They are the symbols of the cable uniting the two countries. It is true I have always wished to visit the mother country, although it is not much different from America. Your common law is ours, your bill of rights are models for ours. On the other hand I notice you are progressing and improving in science after us. It is said that the sun never sets on British soil, but it takes nine hours for it to rise on our telegraph system. We claim to do sharpest telegraph work. As an instance, the closing of the London prices at three in the afternoon are published in the San Francisco evening papers. I have seen a New York clerk dispatch a commercial message from the produce exchange to Chicago, and receive an answer while waiting at the counter." He concluded with expressions of thanks for the honor done him.

THE OHIO LIQUOR LAW. STURBEYVILLE, Ohio, April 30.—The State liquor law was decided upon constitutionally by Justice Jessy this afternoon. A saloonist selling liquor without the written consent of the landlord was arrested. The defense was that the law was unconstitutional, because it impaired existing contracts. The Justice gave an opinion that the law was unconstitutional because the tax was unequal, and impaired existing contracts.

GOULD IN ST. LOUIS. ST. LOUIS, April 30.—The Gould party arrived to-day. A subpoena was served on Mr. Gould this afternoon in the suit against the Missouri Pacific, known as Poplar street track, and his deposition will probably be taken to-morrow. It is not known when the party will leave nor where it will go, but inspection of the entire southwestern system is more than likely and a run over the Texas and Southern Pacific to San Francisco quite probable. Col. R. C. Clowry, general superintendent of Western Union telegraph company, joined the party.

A BLOODY RIOT. NEW ORLEANS, April 30.—The Times-Democrat, Marshall, Texas, special agent at Galveston, two negroes were tried for a trivial offense, convicted and ordered to jail at Longview. Officer Bradshaw had them in charge at the railway depot waiting for the train when an attempt was made to release the prisoners. Bradshaw, fearing trouble, had summoned two citizens to aid him. The attempt resulted in general firing, during which Officer Bradshaw and three negroes were killed. In response to a telegram the sheriff and posse from Longview repaired to the scene. The negroes are armed and defy the officers. It is feared more serious results will follow. Three negroes were killed yesterday in a railroad accident at Ranger on the Texas Pacific.

HORSE POWER AGAINST HUMAN. BOSTON, April 30.—A six day's race for \$2,000, horses against bicycles, between Charles Leroy on horses and John S. Prince, twenty-mile champion of America, and Wm. M. Woodside, champion of Ireland, on bicycles, began to-day. The horseman uses as many horses as he chooses, and the bicyclists relieve each other at intervals. The race will be run from 12:30 to 10:30 p. m. each day. At 10:30 to-night the score stood: Horses 170 miles, Bicycles 164 miles.

ETHER GAZMAN GONE. MEXICO, April 30.—Don Pedro Diaz Gutierrez, governor of San Luis Potosi, and brother of the minister of the interior, and Esther Guzman, daughter of Ramon Guzman, a well known capitalist, and a director of the Mexican Central railway, were married this forenoon. The archbishop of Mexico officiated. The church was strewed with white roses. There was a nuptial mass and reception in the society of the church.

THE GREAT ELIXIR.

Preparations Made to Supply Mankind with a Fresh "Chaw."

Spuds and Plugs Speeding by Special Trains to all Points.

LOUISVILLE, April 30.—The internal revenue office is open to-night and the clerks are busy filling out tobacco stamps. The sales begin at the stroke of 12. One firm takes \$32,000 worth, another \$24,000, a third \$18,400. One million pounds of tobacco goes out to-morrow, another follows next day, requiring stamps worth \$160,000. The freight depots are open to-night, and an extra force of men are engaged to load cars. The Cincinnati & Louisville Short Line railroad send out a special train of twenty cars for points east of Cincinnati. The Ohio & Mississippi send twenty cars to Chicago. All the other roads have large engagements. The shipments will be the heaviest ever known in this, the greatest tobacco market in the world.

CHICAGO, April 30.—Orders have been received for over \$50,000 worth of new tobacco stamps at the office of the collector of internal revenue in this city, and the office will be open at midnight to enable the dealers to procure stamps and send out large quantities of goods held for the operation of the new law.

THE RIGHTS OF LABOR. A Monster Strike Among Coal Miners to Begin To-day. The Cigarmakers Get Their Dollar Almost Everywhere.

PITTSBURGH, April 30.—The tannery strike here will probably not last much longer as news of weakening are apparent on all sides. A number of strikers returned to work to-day, and it is thought others will soon follow. To-morrow is the day set for several strikes, among them the coal miners, plasterers and cigarmakers. The miners claim that the strike will be general and that about 6,000 men will come out to-morrow as ordered by the convention. The peculiarity in this strike is that for over a week a majority of the miners concerned have been working for the rate against which they strike to-morrow. The strike of cigarmakers is thought will be a small affair. It is stated that out of ninety cigar factories in this city only five will refuse to grant the increase demanded and that only forty men will be obliged to strike.

WHEELING, April 30.—The cigar manufacturers of this city will all accede to the demands for increase of wages made by the workmen several weeks ago, the advance to go into effect to-morrow. Some firms will temporarily decrease their wages, however, owing to large accumulation of stock on hands by the fall in business prior to May 1st, when the rebate goes into effect.

NEW YORK, April 30.—The board of arbitration grants the advance claimed by the men of one cigar factory. CHICAGO, April 30.—About all manufacturers of cigars have acceded to the demand of the workmen for an advance of \$1 per thousand. There will be no strike to-morrow of any considerable proportions. LYNNBURG, April 30.—Semenovs are on a strike for further increase of wages.

ALBANY, N. Y., April 30.—The cigar manufacturers met last Saturday and agreed to discharge all their men. The Cigarmakers' Union demanded \$2 per thousand advance, but the manufacturers were only willing to pay \$1. To-day all the shops save where prices are dropped, and one shop where half a dozen union men who received the advance asked for are at work—are closed. The manufacturers say they will not accede to the demand.
