HOW ATE TES TRAIN.

Gymnast's Habits and Incomes.

High Salaties Paid For Skill and Daring.-The Work of the Trainer.

Developing the Muscles in Erly Youth.

In recent years, says the New York Sear, much directation has taken place among physicians and others as to the effect of acrobatic and gymnastic exercises on the human system. The action of the spelery for the preven tion of crushy to children, in causing the arrest in this city of juveniles who perform in the circus and en the stage, on the ground that such exercise atunts their growth and is injurious to their general health, adds interest to the controversy. Much popular misconception seems to exist with regard to this subject, more eapecially as to the condition of the children, the wretched little "white slaves" of sensational newspaper articles, who are brought up to the scrobatic business; the existence of this misconception being borne out by the tenor of certain proposed legislative enactments, which, if carried, will affect the members of this profession to no inconsiderable extent. Some details of the education and routine of this class, both before and behind the scenes, gleaned qy diligent inquiry among the representatives of its different departments, may therefore be acceptable.

And first it must be admitted that the professional athlete follows his avocation solely for gain, and enlists and trains recruits with the same object in view. High salaries are paid men whose skill and daring give them prominence in the profession, and the children command better pay than the average mechanic can earn. The following list gives the weekly aslaries of some of the leading athletes now performing in the United States in vari one lines of business. When traveling, board and railroad transportation are furnished in addition. Charles W. Fish....Rider......\$350

prising many "lines" and specialties women, the fashions have been for several years favorable to a proper form. The bonnet and hat have beinto two distinct branches, each combling upon or in closer proximity to the earth. An acrobat or gymnast wants a pupil, eithea to assist him in his own tricks or to educate and farm with an eye to profit in the future. Whatever the object may and whatever the line of business into which the young idea is destined to shoot, the trainer looks about him for a pupt!. Seven or eight appears to be the age which all agree upon as the

most suitable for commencement. The trainer does not sock for anecial points of natural aptitude in making his choice of an embryo athlete. Any youth of the appropriate age, provided he be free from bodily allment or deformity, is regarded as irritation and general thinning. capable of being developed into a Leotard, Blendin or Grimaldi. If two boys, equal in other respects, were to smaller or better looking of the twain healthy boy is regarded as absolutely unfit for the work.

The first and chief aim of the trainer is to work up the muscular strength of his subject to as high a pitch as possible. He feeds the boy on an abundant of nourishing diet, and teaches him to be temperate in all things. The boy is made to take long walks, an ordinary gymnasium of ladders, ropes, and bars, such as a schoolboy might enjoy himself with. This treatment is pursued for two or three months before difficult feats are attempted, and the boy is usually encouraged to undertake the latter by judicious praise and promise of rewards, and by the example of his Several of the 'little fellows usually train together, and are stimulated also to attempt dangerous feats by the spirit of rivalry that exists

RAILBOAD ROW

The Citizens of Manning Stirred Up Over the Matter.

There is a lively railway row at

Manning, which has stirred up the business men greatly. It seems that the town voted \$3,000 to the Chicago, Milwaukee & St. Paul company to performers, ceiling steppers, pedestal acrobate and modern Samsons are a drop in the market.

Inquiry among physicians and others who have the best means of knowing the facts, goes to show that the physical education and training of boys for the acrobatic profession is at present conducted with the greatest care and skill and is not unhealthful.

Industria, Ga., Apri 17, 1883.

In 1878 I was the victim of a terrible Bond having its property taxed to help and the town property, objected to having its property taxed to help and having its property taxed to hel care and skill and is not unhealthful, said she was stuffing her mother's the same time pledging each other One medical gentleman, who takes a head full of her sallor yarn. But the under a heavy forfeiture, not to have special interest in such cases, said: child persisted, and the dream was not sny freight shipped over the Chicago & No child or adult whom I examined forgotten. Rockwell learned the Northwestern until that company disshowed any irace whatever of injury, facts about the family at the village solved the injunction and united the nor could I discover any disease inci-dental to their mode of life. If an accident ever occurred to a child in the process of training, I was not weeken in clinging to what they consider their rights, and it is reported that the company threatens to run its trains through Manning without stopping st all, if the citizens do not give them a just share of the business. Manning bustness men are quite ex man who still survives Three sons cited over the affair, and there is all sorts of talk and predictions as to what could be the outcome.

Mr. D. H. Barnaby, of Owego, N. Y says that his daughter was taken with wislent cold which terminated with pneu-monia, and all the best physicians gave the case up and said she could not live but a few hours at most. She was in this con-dition when a friend recommended DR, WM. HALL'S BALSAM FOR THE LUNGS and advised her to try it. She accepted it as a last resort, and was surprised to find that it pr duced a marked change for the better, and by persevering his widow is rapidly falling, and in its use a permanent cure was effected.
