Our New Loan and Improvement Co. Investigation into the matter convinces

Investigation into the matter convinces us that one of the most equitable, reason-able and feasible plans of building houses is that proposed and in operation by the Mercantile Loan, Trust and Improve-ment company of this city. By invest-ing in shares in this institution, which is backed by some of our best and most reliable business men, it becomes possible and comparatively easy for a man of moderate means to secure a comfortable home for himself and family. In taking a certain number of shares, at a certain monthly payment, in a few years a man can own a house of his own for about the same as he pays monthly for rent. We believe the Mercantile Loan and Trust believe the Mercantile Loan and Trust company, by organizing and opening up for business, have filled a long felt want in Council Bluffs. Their plans and system of loans will bear the most care-ful scrutiny and examination, and we have no hesitancy in pronouncing them reasonable and equitable, and backed by gentlemen of honor and integrity. As the company exists it becomes at once an institution of value and credit to our city and those who desire homes. Their pres-ident is T. A. Kirkland; vice president, Judge Peake; secretary, I. R. Beery; treasurer, Col. Beebe, and their office is

They Want Better Weather, Steadier

Some of the teamsters of the city have of late had a streak of bad luck, the weather being greatly against them, the rain preventing them from working much of the time, and little dashes of showers, causing bosses to dock them for every hour lost thereby. They then claim that

the pay is too small, and, in fact, that they do not have a fair show for a living. They have embodied their feelings in a petition, and are talking of holding a meeting soon to air their grievances fur-ther, and see what relief can be had. The following is the petition drawn up: "We, the undersigned, teamsters of Council Bluffs, Iowa, cannot dress our children fit for school, church or society,

feed our wives, keep clothes on our backs and prevent our poor teams from starv-ing with the pay now received by us for ourselves and teams. We get but two or three days work in a week on account of bad weather, and but four or five

Painful Case of Tetter.

Painful Case of Tettor. I have for 25 or 30 years been a sufferer from DRY TETTER. It developed itself on different portions of my body, estending to my feet and hands, caus-ing them to itch intolerably and to crack. It was so painful that I was compelled to wear India Rubber gloves day and night for months at a time. After consulting the best physicians, and using all the remedies which came to my notice without relief. I commenced the use of SWIPTS SPECIFIC, and am happy to say that there is scarcely a vestige of the disease left. At no time in twenty five years have I felt such relief and freedom from disease, and I cheer-fully recommend Swift's Specific to all similarly af-ficted. J. R. BRANHAM, Macon, Ga
