FINANCE AND COMMERCE.

FINANCIAL.

NEW YORK, September 22.

Money—Easy at 2 1/2 per cent, closed at 2 per cent.
Prime Paper—3 1/2 per cent.
Exchange bills—Steady at 4.82 1/2; demand, 4.84.
Governments—Strong.
Stocks—Villards were again the feature of share speculation today, and the general market sympathized in the course of these shares, although the changes are not especially important. At the opening the market was lower, but in the first sales Villards improved 1/2 to 3/4 per cent. This was followed by free sales and a sharp decline of 1/2 to 1 1/2 per cent, Villards leading. In the last half hour business the bears made another vigorous onslaught on Villards, and these shares broke rapidly for 3/4 for Northern Pacific common, 6/4 for preferred, and 5/4 for Oregon Transportation company. As these figures were 6 1/2, 10 1/2 and 12 1/2 points below the best figures of the week, in speculation the Oregon Improvement company broke 1/4 per cent, to 84, and Richmond & Danville 3/4 per cent, to 64. The break in Villards late in the day was due to selling by town traders, and reports of inside selling. Large amounts of long stock sold out and were bought by some of the leading bears.

THE WEEK IN CHICAGO.

CHICAGO, September 22.—The week just closed has been an unsettled one on change, and the frequent and marked fluctuations in values have been accompanied by some considerable excitement. For the first half of the week the tendency was strongly downward, at times the pressure to sell inducing weakness approaching demoralization. Later on more favorable influences checked the decline, and for a period the course was as strongly the other way. Instead of an excess of a thousand cars of corn being inspected into store daily, as a few weeks ago, the amount now hardly exceeds one-half of this, and the stock is really so small that almost any house could take it all. Something of this character might easily upset the theories of lower prices which the situation, as regards the next crop, seems to inspire in the general trade.

GRAIN.

The shipping movement continues and is still almost exclusively of corn, which goes east at the rate of half a million bushels a day. Several car loads have been brought here this week to go to points in southern Michigan and north-western Indiana to be consigned to the new corn they will produce is not yet ready for use. A foreign demand for our wheat might start up if prices would advance sharply and show some stability, but could hardly be expected while they were declining day after day. One feature which inspires confidence is the increasing volume of orders from the country, a good proportion of which are buying orders. Only about 20 per cent of the arrivals of winter wheat are inspecting into the special winter grade, while very recently the receipts decreasing and prices showing themselves capable of advancing, the situation, while uncertain, has more elements of encouragement than for a long time past. The readiness with which they now respond to outside influences shows they have been dragging near the present bottom.

Oats are holding their own and change but little in either direction. Being in good demand and not in unusual supply the trade is healthy and steady.

Rye and barley are firming up. The latter cereal is in more request, but nearly all that arrives is of poor quality, being dark and discolored, and goes into the lower grades, which find slow sales at low figures.

The weekly statement of the visible supply shows an increase of about a million bushels each of wheat and corn—a little less of the former and more of the latter. There are 300,000 bushels more oats in sight.

The rye crop of Illinois last year was 6,500,000 bushels, this year will fall short of that quantity 1,800,000 bushels.

PROVISIONS.

Provisions have been hammered down by the packers with interesting energy,

for the sake of cheapening hogs, but during the past two or three days the shorts have taken alarm, and by free buying, have given the market a little start upward. Until then all products were greatly depressed. There is a fair shipping demand for pork and lard, but the increase has been in the speculative trading. Some parties who have led in the bear raids on this market up to the middle of the week are now on the other side and their buying is giving it a support. Should the packers withdraw their influence from the bear side provisions would be much more buoyant, for a good many believe them now to be a purchase.

LIVE STOCK.

The receipts of cattle at this point continue liberal. There has been little improvement in the condition of the market, as the eastern and foreign advices report continued dullness and weakness. There has been a decline of 15 to 25 cents per 100 pounds in the market with the grassy stock a further shrinkage in value is likely to occur. Some superior export steers sold on Friday at \$6 25, as high as any have commanded lately, but the demand on export account is limited and the offerings of such are few and far between, which is all that sustains figures. There was a marked degree of sameness in the offerings, the great bulk of them being neither fat nor very lean and more or less of soft and shrunken flesh, while comparatively few well rounded, solid, corn-fed heaves were offered. Dressed beef slaughterers want 1,200 to 1,350 lbs. cattle of good corn finish, and for such are willing to pay fair rates. For Texas and far-west steers the market has ruled irregular. As larger supplies were anticipated, buyers have held off for a further break.

Although not so large as looked for, the receipts of hogs have fully supplied the demand. With the heavy run, salesmen insist on good packing animals at \$4 50, but shippers are willing to give more and keep the figures near \$5 00. Sheep have been in rather liberal supply, although considerably less have arrived than on last week, but there were finer sheep wanted this week than last, and common grades have sold at a reduction of 15 to 25 cents.

With the advance of ocean insurance to from 3 to 10 per cent, and the increasing freights, the cost of landing a bullock at Liverpool cannot be less than \$40. At present selling values there, cattle that will dress 800 pounds will not bring over \$32, hence the export trade is at this season a hazardous one.
