lower for three per cents. Stocks-The week opened with a depression in Villard stocks and a general disposiion to sell in first sales. There was a break of 2 to 22 per cent in the shares mentioned and a decline of 1 to 11 per cent in other stocks. This was succeeded by a better feeling and an advance of 1 to 2 per cent, Oregon Transportation leading, with sales to 54; Northern Pacific rallied to 33, preferred to 631 and the general list moved up 1 to 11 per cent, the latter in Michigan Central. In the last half hour of business the fever to sell abated and there was some disposition on the part of the bears to accept the profits. This process resulted in an improvement of 1 to 17 per cent, Villards, Denver, Union Pacific and Michigan Central leading. In response to a dispatch of inquiry from Anthony Thomas, Vice President of the Northern Pacific road, to Frederick Billings, at Woodstock, Vermont, Billings replied to-day: "I have just received your telegram of yesterday, giving the substance of an article in a New York paper. which is utterly without foundation. I had no communication either verbal or writter with Mr. Gould about Northern Pacific stocks. I have not said they were selling too high and I have not sold a share of my large holdings. COUPONS.

CLEARINGS. Boston, September 24.—Reports from 28 leading clearing houses of the United States give the total clearances for the week ended September 22, at \$960,387,162, being a decrease of 21.5 per cent compared with the corcrease of 21.5 per cent compared with the corresponding week of 1882. The exhibit is un26 fe for October; 27 gc for November. favorable compared with last week, as the clearings show a falling off of 22.8 per cent. This decrease is made up to some extent by the heavy decrease in New York, where clearings show a falling off of 26.4 per cent against a falling off of 27.2 last week. The outlook is certainly far from favorable just at present. Failures are increasing, money is tightening and crop reports are contradictory, but generally on the bearish side, and the general outlook is far from being as favorable as it was this time a month ago.

GRAIN AND PROVISIONS.

CHICAGO

Special dispatch to THE BEE. CHICAGO, September 34.—The grain market to-day was firm and active, especially wheat, Nevember and December options, which were very lively. Cablegrams reported unfavorable weather and increased demand for American wheat. This, together with large buying orders, counteracted the effects of the bears at the opening movements and market after raling irregular the first hour of the session advanced from 974c to 99%c for November, 99%c to \$1.01% for December and 95c to 96c for the year. The advance was very rapid and induced immediately by shorts covering. Corn did did not partake largely of the activity which characterized wheat. Dealers and speculators are waiting apparently for more definite frost news. Speculative trading was only fair and the range of prices moderate. Oats were steady, and showed an improvement over Saturday's price of about 4c. Pork was active, particularly in the latter part of the morning resiston. Prices advanced 10@15c, October ranging from 10 67½ to 10 92½, closing 10 71½; November, 10 70@10 85.

The new hoard of trade clearing house went into operation to-day. The institution is designedto facilitate settlements between dealers and simplify a system now slow and complicated. Has long been acknowledged and more so at this day than any other. The vast field of medical science is ever increasing, and its numerous branches are brought nearer and nearer to perfection, and no one man can any longer grasp them all Hence the necessity for dividing the labor. And it is true beyond all doubt that disease, affecting the genito-urinary organs need special study more than anything clae, if we would understand and knew how to treat them properly.

DR. H. WAGNER is fully aware that there are many physicians, and some sensible people, who will condemn him for making this class of diseases a specialty, but he is happy to know that with most persons of refinement and intelligence a more enlightened view is taken of the subject, and that the physician who devotes himself to relieving the afflicted and saving them from worse than death, is no less a philanthrophst and benefactor to his race than the surgeon or physician who by close application excels in any other branch of his profession. And fortunately for humanity, the day is dawning when the false philanthrophy that condemned the victims of folly or crime, like the lepers under the Jewish law, to die uncared for has passed away.
