A resolution discouraging divorce and marriage other than is justified by the New Testament, was passed by a rising vote; not to extend clerical courtesy to the same. Question Box brought out many good uggestions from Dr. Stone.

Adjourned. Wednesday evening At 7 o'clock Rev. W. Read, President of the Sunday school convention opened the exercises addressing a large congregation for a short time upon Sunday school work.

Rev. J. W. Osborn, Sunday school missionary, led a responsive praise service, after which Rev. F. Thearle, of Chicago, delighted the audience with an excellent address upon Sunday school work as connected with the work of the Publication society. He gave Boston Smith's definition of the Sunday school, the Bible study and service of the church. One Sunday school had no small children, saying they had none—they were used to go and bring in somebody else's children-must have small children or lose the hope and promise. The old are hardest to keep in Sunday school— may be they know so little they are askamed to be there. The superintendent must not be expected to be so much more than a man and so much less than an angel. The assistant superintendent must have a good deal of shaking hand religion, and the secretary should not be kept more than two years from TORONTO, November 12. - Hanlan the study of the Bible for his own sake. Plain Facts Plainly Spoken.

Plain Facts Plainly Spoken.

At one time a discussion of the secret vice was entirely avoided by the profession, and medical works of but a few years ago would hardly mention it.

To-day the physician is of a different epinion; he is aware that it is his duty—disagreeable though it may be—to handle this mater without gloves and speak plainly about it; and intelligent parents and guardians will thank him for doing so.

The results attending this destructive vice were formerly not understood, or not properly estimated; and no importance being attached to a subject which by its nature does not invite close investigation, it was willingly ignored.

The habit is generally contracted by the young while attending school; older companions through their example, may be responsible for it, or it may be acquired through accident. The excitement once experienced, the practice will be repeated again and again, until at last the habit becomes firm and completely enslaves the victim. Mental and nervous af flictions are usually the primary results of self-abuse. Among the injurious effects may be mentioned lassitude, dejection or irrascibility of temper and general debility. The box seeks seclusion, and rarely joins in the sports of his companions. If he be a young man he will be little found in company with the other sex, and is troubled with exceeding and annoying bashfulness in their presence. Lascivious dreams, emissions and eruptions on the face, etc., are also prominent symptoms.

If the practice is violently persisted in, more serious disturbances take place. Great palpitation of the heart, or epileptic convulsions, are experienced, and the sufferer may fall into a complete state of idiocy before, finally, death relieves him.

To all those engaged in this daugerous, practice, I would say, first ef all, stop it at once; make every possible effort to do so; but if you fail, if your nervous system is already too much shattered, and consequences take place. Great palpitation of the heart, or epileptic convulsions, are exper

Middle Aged Men.

There are many at the age of 30 to 60 who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of thin milkish hue, again changing to a dark and torpid appearance. There are many meny men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness.
