Paddy Ryan Throws up the Sponge CHICAGO, Ill., December 28.—Paddy Ryan, who was expected to meet Sullivan in San Francisco next month, left for Toledo unexpectedly two days ago and late last night telegraphed here: "I have to throw up everything at present." The Toledo telegram says the truth is, Ryan in his recent friendly bouts with Sheriff and Slade has shown they were better more and he has no show with Sullivan men and he has no show with Sullivan and consequently does not care to meet him. Efforts will still be made to keep the Sullivan match on.

General Howard's Bad Break. o the Editor of THE BEE.

Sir-I see a letter in THE BEE of the 24th in which a Fort Robinson correspondent says that it is not the fault of the officers that the men desert, but is caused by the labor that they have to perform, and to too long an interval between pay days. He is not correct in prove to him. The proposition to brand | ment. deserters was a bad break for General Howard to make. The men as a general zled the funds of the bank to the amount of \$27000 being \$15,000 more than is recoverable from his bondsmen. The robberies cover a period of eight years. The loss does not affect the institution which had a surplus of nearly \$1,000,000.

Plain Facts Plainly Spoken.

Plain Facts Plainly Spoken.

At one time a discussion of the secret vice was entirely avoided by the profession, and medical works of but a few years ago would hardly mention it.

To-day the physician is of a different opinion; he is aware that it is his duty—disagreeable though it may be—to handle this matter without gloyres and speak plainly about it; and intelligent parents and guardians will thank him for doing so.

The results attending this destructive vice were ormerly not understood, or not properly estimated; and no importance being attached to a subject which by its nature does not invite close investigation, it was willingly ignored.

The habit is generally contracted by the young while attending school; older companions through their example, may be responsible for it, or it may be acquired through accident. The excitement once experienced, the practice will be repeated again and again, until at last the habit becomes firm and completely enslaves the victim. Mental and nervous at flictions are usually the primary results of self-abuse. Among the injurious effects may be mentioned lassitude, dejection or irrascibility of temper and general debility. The boy seeks seclusion, and rarely joins in the sports of his companious. If he be a young man he will be little found in company with the other sex, and is troubled with exceeding and annoying bashfulness in their presence. Lascivious dreams, emissions and eruptions on the face, etc., are also prominent symptoms.

If the practice is violently persisted in, more serious disturbances take place. Great palpitation of the heart, or epileptic convulsions, are experienced, and the sufferer may fall into a complete state of idiocy before, finally, death relieves him.

To all those engaged in this dangerous, practice, I would say, first of all, stop it at once; make every possible effort to do so; but if you fail, if your nervous system is already too much shattered, and consequences at some future time. The number of young men who are incapaciated to fill the

# Middle Aged Men.

There are many at the age of 30 to 60 who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of thin milkish hue, again changing to a dark and torpid appearance.
