### Mischievous Malaria.

To say that malaria is mischieveus is to put it very mildly. It is all that and more. , It is cunning, deceitful, treacherous, sly, and underhanded. It does its work in the dark, and in such a sly way that much of the mischief is done before it is discovered. It saps the foundations of a healthy system. It robs the blood of its vitality, demoralizes the liver, confounds the stomach, and makes the victim wish he were in his grave. It is sad to see people sit down in their misery, content to be the victims of mischievous malaria, and thinking that nothing can be done for them. The power of BROWN'S IRON BITTERS over the mischiefs of malaria has been so amply proved that there is no reason why anybody who can procure a bottle of this Prince of Tonics shall ite family remedy can be taken without ruining the teeth or producing constipation and headache. 1

Pipe smoking is the real test of a tobacco. Pipe smoking is the real test of a tobacce. It is the regal way of smoking. You get more directly at the flavor and fragrance. You take the amoke cooler, and the tonic cleanlier and safer. Pipe smoking is smoking reduced to a fine art. The more the question of adulterated tobacco forces itself on the attention of amokers, the more desirable it becomes to know precisely what you are smoking.
