### Plain Facts Plainly Spoken.

At one time a discussion of the secret vice was en-tirely avoided by the profession, and medical works but a few years ago would hardly mention it. To-day the physician is of a different opinion; he is aware that it is his duty--likagreeable though it may be--to handle this matter without gloves and speak plainly about it; and intelligent parents and guardians will thank him for doing so. The results attending this destructive vice were or merly not understood, or not properly estimated; and no importance being attached to a subject which by its nature does not hivito close investigation, it was willingly ignored.

Its nature does not invite close investigation, it was willingly ignored. The habit is generally contracted by the young while attending school; older companions through their example, may be responsible for it, or it may be acquired through accident. The excitement once ex-perienced, the practice will be repeated again and again, until at last the habit becomes firm and com-pictely enslaves the victim. Mental and nervous af-flictions are usually the primary results of self-abuse. Among the injurious effects may be mentioned lassi-ude, dejection or irraschility of temper and general debility. The boy seeks sechusion, and rarchy joins in the sports of his companions. If he be a young man he will be little found in company with the other sex, and is troubled with exceeding and annoying bashfulness in their presence. Lascivious dreams prominent symptoms.

binditilities in their presence. Laservious oreans, emissions and eruptions on the face, etc., are also prominent symptoms. If the practice is violently persisted in, more seriou-disturbances take place. Great palpitation of the beart, or epileptic convulsions, are experienced, and the sufferer may fall into a complete state of idlocy be fore, finally, death relieves him. To all those engaged in this dangerous, practice, i would say, first of all, stop it at once; make every possible effort to do so; but if you fall, if your nervous system is already too much shattered, and conse-quently, your will-power broken, take some nerve tonic to aid you in your effort. Having freed yourself from the habit, I would further counsel you to go through a regular course of treatment, for it is a great mistake to suppose that any one may, for some time be t every so litt'e give himself up to this faacinating but dangerous excitement without suffering from its evil consequences at some future time. The number of young men who are incapaciated to fill the duties enjoined by wedlock is alarningly large, and in most of such cases this unfortunate condition of things can be treated to be and the outse of faults which had been of such cases this unfortunate condition of things can be traced to the practice of self-abuse, which had been abandoned years ago. He When she went she took nothing with dropped his pack and chattered at them. An orange hit him in the eye and O'Day and Oliver laughed and said, "Go it macaroni." The Italian slipped out from his belt a knife with a narrow blade ten inches long and springing forward plunged it into O'Day's breast. Oliver caught the Italian by the collar and disarmed him. O'Day sank to the ground saying: "I'm done for, Dave, go for the wife." At the Chambers street hospital his wound was pronounced fatal. The Italian struggled to get loose, and when policemen came threw himself on the ground and would not move. He was dragged to the stahe will prosecute the squire who married tion house.
