Why does the bod that is near to its breaking Wake sweet a studies than the fully blown rose Why does the dream on the verge of awaking Stir deeper truthe than a deeper repose ? Why does the love that is broken with parting

WHY?

Lift itself higher by the fullness of pain? Why is the incomplete rapture of starting

tions for 1878 were 2,284,002,000 bushels, raised on 100,476,000 acres, while in 1874 fined—the life and animation of the the total crops were but 1,454,180,200 bushels; in 1875, 1,962,821,609; and in 1877, 2,173,934,646 bushels. The future increase in the farm production of this

sisted, popped the question on the spot nrged his suit eloquently, and was ac cepted. The lawyer, in revenge, tried to whip him, and that was how the stor

A correspondent writes that she thinks her health would be much better if she

#### What Every House Needs.

One of the worst faults of our very People do not like to think of death. faulty modern achitecture, as applied to It is an unpleasant subject; but it con-houses, is found in the fact that our stantly obtrades itself, and there has architects do not take into their plan the possibilities of sickness in the family. Now no house is properly con-structed that has not in it a room or Lat used inglise by the failness of pain? Why is the meaninglete reprine of marting Close on complete reprine of marting Close on complete memory attain? Why? For a boundless, insatisfied longing Lies deepset down in a warm human hear; Ever with this are the sympathies thronging. Ever by this do the heaven indiverse indiverse individual in the first place, have a Ever with our spring—ws can follow you wholly Outy as far as in instinces are sent: Summer's fact that is bladen and holy, We have not seen in-content. American Agriculture. The possibilities of American agricul-ture can best be appreciated by review-ing the facts that the arca or arable and shades, its rising sparks and glow-ing the facts that the arca or arable at procent under cultivation is estimated 1,500,000,000 sqnare miles, while the area? The possibilities of American agricul-ture can best be appreciated by review-ing the facts that the arca or arable at procent under cultivation is estimated to be 174,901,000 acres, or less than 275, OUCP at the second states are solution is estimated to be 174,901,000 acres, or less than 275, OUCP at the second states are solution is estimated to be 174,901,000 acres, or less than 275, OUCP at the second states are solution is estimated to be 174,901,000 acres, or less than 275, OUCP at the second states are solution is estimated to be 174,901,000 acres, or less than 275, OUCP at the second state are solution is estimated to be 174,901,000 acres, or less than 275, OUCP at the second state are solution is estimated to be 174,901,000 acres, or less than 275, OUCP at the second state are soluting and quieting than the in-

The can best be appreciated by review and shades, its rising sparks and glow-ing the facts that the area or arable lands in the United States exceeds 1,500,000,000 square miles, while the area at pretent under cultivation is estimated to be 174,901,000 acres, or less than 275, 000 square miles. It is probable that the next contsus will show a valuation of farms exceeding \$11,000,000,000, and an annual production of \$3,000,000,000. The fact that more than one-half of all our people, who are engaging in the ordinary pursuit of life, are directly employed in agriculture, is at once a sufficient evi-dence of its universal importance. In the year 1878 there were 51,008,000, creas in Indian corn, producing 1,371,000,-cores in Indian corn, producing 1,371,000,-in oats, giving 411,555,000 bushels; 1,790 °C0 in barley, showing a crop of 42,500,000 bushels, 1,621,000 in vye, with 25,800,000 bushels, 1,621,000 in rye, with 25,800,000 bushels, Thus the total cereal produc-tions for 1878 were 2,284,902,000 bushels; raised on 100 476,020 acres, while in 1874

In the north o. Holland the farms are

ner, because nature has provided a very hick coating of hair for them, and in unce of prevention is worth a pound of winter they are sheared.

# Soclety and Solitude.

did not get so lonesome, and asks if lone-someness is not the cause of a morbid condition bordering on disease? To

vious to that moment, and in prepara-tion for it, respiration becomes feeble, generally slow and short, often accom-plished by long inspirations, and short expirations, so that the blood supply is less and less oxygenated. At the same time the heart acts with corresponding debility, producing a slow, feeble and often irregular pulse. As this process goes on, the blood is not only driven to the head with diminished force and in less quantity, but what flows there is less quantity, but what flows there is loaded more and more with carbonic acid gas, a powerful anesthelic, the same as that derived from charcoal. Subject to its influence the nerve-centers lose consciousness and sensibility, ap-parent sleep creeps over the system; then comes stupor, and the end."-Neu York Express.

ciety. A horse and dog make very good riends indeed, and rarely give offense. A Good Teacher. nousand square miles. There is onc death there every six minutes, and one

which we answer, that main main that har seeks society and also solitude. A har monious change from one to the other is essential to the best health. Where there is too much society he is apt to wear out prematurely. It is not easy t arrange life so as to have just en sigh of each. If every hour brings a swarm of ompany, the result upon the moral each. If every hour brings a swarm of ompany, the result upon the moral ature is unfavorable. If, on the other isnd, man is too included from his ellow men, his social nature suffers, and he mental faculties are not properly developed. Lonesome people who live in the country should make friends of nature; animals, plants, and trees. These pecome to them, in a certain sense, so pecome to them, in a certain sense, so per the sense and dog make very good.
20 carats, that of every 24 parts, 20 are gold. 18 carats is the most common alloy used by jewelers, and keeps as well as pure gold. 12 carats is only half gold, and is a low alloy, which is apt to tarnish more easily, and lose its luster, requiring more frequent cleaning.
Consumption or coffee.
America is fast becoming, if she is not the sense is not people were good.

America is fast becoming, if she is not already, the greatest coffee consuming country on the globe. Coffee is no longer

Holland, contains one-tenth of both con

a luxury, but a necessity of the humble home as well as the abode of the rich A Good Teacher. The following sensible opinion comes to us shorn of its authorship. It is none the less worth a careful reading how-ever: "A truly good teacher is cheap at any price. So, too, if a good one be necessary in any school, he becomes equally necessary in every school. Hence two hundred and fifty thousand com-retent teachers are necessary to supply his country alone. To provide such fifticult task than to raise, equip, disci-pline and support an army of equal numbers. It is, moreover, a more im-portant undertaking, and necessarily in-volves a far greater expenditure of time, volves a far greater expenditure of time, labor and money, if it is to be well done. True teaching or educational power is not and cannot be a cheap commodity, because it is not only rare, but is a more d'ficult and higher order of work than any other continued to human hunder.

d'ficult and higher order of work than any other contined to human hands. The tiller of the soil, the artificer in wood and iron, or even the painter or sculptor, with all delicacy of conception and refinement of touch, have an easy tor who works upon the subtle forces of mind and spirit, seeking to mold his precious materials into the divine sym-metry, unity and beauty of a perfect character. If a high order of talent and skill be required in these lower perish-able forms of human workmanship, how much more should be exacted of those who labor upon imperishable material, and who are thus shaping the character of beings destined to a life that knows seither limitation or decay." London. London is spread over about 15 ven chousand square miles. There is onc
