Thousands Hastened to their Graves

2

Relying on testimonials written in viv 1 glowing language of some miraculoucuras made by some largely puffed up doctor or patent medicine has hastened thousands to their graves; believing in their almost insane faith that the sam miracle will be performed on them, and that these testimonials make the cures. while the so called medicine is all thtime hastening them to their graves. W. have avoided publishing testimonials, a they do not make the cures, although w

THOUSANDS UPON THOUSANDS

of them, of the most wonderful cures voluntarily sent us. It is our medicin ... Hop Bitters, that makes the cures. It has never failed and never can. We will give reference to any one for any disease similiar to their own if desired, or will re fer to any neighbor, as there is not a neighborhood in the known world but cal show its cures by Hop Bitters.

A LOSING JOKE.

A losing Joks. A prominent physician of Pittsburg said to a lady patient who was complaining of her continued ill health, and of his inability to care her, jokingly said: "Try Hop Bitters!" The lady took it in earnest and used the Bit-ters, from which she obtained permanent health. She now laughs at the doctor for hi-joke, but he is not so well pleased with it, as it cost ham a good patient.

FEES OF DOCTORS.

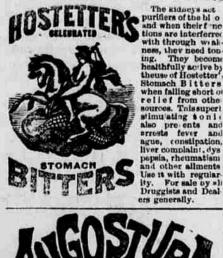

The fee of doctors is an item that very many persons are interested in. We be lieve the schedule for visits in \$3.00 which would tax a man confined to his bed for a year, and in need of a daily vis it, over \$1 000 a year for medical atten dance alone! And one single bottle of Hop bitters taken in time would save the \$1.000 and all the year's sickness.

A LADY'S WISH.

"Oh, how I do wish my skin was as cleau and soft as yours," said a lady to her friend. "You can easily make it so," answored the friend. "How?" inquired the first lady. "B, using Hop Bitters that makes pure, rich blood and blooming health. It did it for me as you

GIVEN UP BY THE DOCTORS. "Is it possible that Mr. Godfrey is up and at work, and cured by so simple a remedy?"

"I assure you it is true that he is en-tirely cured, and with nothing but Hop-Bitters, aud only ten days ago his doctors gave him up and said he must die, from Kidney and Liver troubles!"

PEPPERMINT DROPS.

"I'm getting fai," said the tramp when stealing lard. "Pray, Madam, why did you give your

en such a peculiar name as Macduff?" Because, sir, I wanted her to 'lay on !' A grave-digger buried a man named atton, and brought in the following bill o the widow: "To making one Buttonole, \$5.'

"When I die," said an editor to his better half, "I want to go where there are no more fires to make," She cheerally replied that she presumed he un-

loubtedly would. "Full many a rose is born to blush unseen, and waste its sweetness on the desert air; full many a pound of butter hat seems clean is but a hiding-place for yellow hair.

A little boy was asked if he could teh he length of a whale, and replied that he whales he caught at home sometimes seemed more than an hour long.

Alcohol will clean out the inside of an inkstand. It will also clean out the inside of a pocket-book quicker and more horoughly than anything else on record. Love rules the court, the camp, the rove, the earth below and heaven above, but it never sewed a gray patch in the seat of your husband's black trowsers. That isn't love-it's revenge.

William Augustus to sleepy room-mate "Come, John Henry, why don't you get up with the lark, as I do?" John Henry, grimly: "Been up with him all night. Smell'v my breath."

Before marriage a man is generally greeted by his sweetheart with "My dar-ling, is it you?" But after marriago she generally rushes to the door and shouts: "John Henry, wipe yonr boots !"

"What are you about?" angrily said a country editor to his wife, who was touching up her complexion before the mirror. "Only getting up my patent outside, dear. was the reply. There is nothing that so takes the

starch out of a young man, who has been wedded about a year, as to have to go to a store where there is a girl clerk that he used to keep company with, and en-quire for those large sized safety-pins.

A Boston paper says: "A butterfly was caught at the South End yesterday." It may be safe enough to catch a butterfly at the south end, but when you go to grasp a wasp, you want to catch it at the northeasterly end.

As two newly arrived Irishmen were walking up street in San Francisco, a pavement trap door opened suddenly, and a Chinese store-porter emerged. "Be gorra!" said one of them, "if the hay-theus haven't got a tunnel clane through from China, bad luck to thim!"

A country editor says it has agitated his curiosity to find out why a woman will spend six weeks putting scollops on the bottom of her dress, that nobody but nerself will ever get a glimpse of, and then run about the neighborhood in an old dirty wrapper without any belt, and every other button burst off.

An unknown but evidently married paragrapher says that when a woman combs her back hair into two ropes, holds one in her mouth until she winds he other on her tuck comb, and then finds that she has lost her last hair-pin, the feels that her sex need two mouths

memarks with.

Indian Trappers, Hudson Bay.

About the first of November, when the animals have got their winter coats, and fur is "in season," the Indian trapper lays out his trapping walk for the winter, along which he places a line of trapp from ten to fifteen miles ir length. from ten to fifteen miles ir length. Once or twice a week he makes the round of this walk, and gathers such 'urs as may be caught. Most of the finer furs are taken by means of the wooden lead-fall and steel-traps of various sizes, the larger fur-bearing animals being either shot, caught in snares, or killed by the poisoned bait. Toward the latter end of March the Indian trappers leave their hunting grounds, and make a journey to the forts with the produce of their winter's toil. Here they come, moving 'hrough the forest, a motley throng. The braves march in front, too proud and lazy to carry anything but their guns, and not always doing even that. After them come the squaws, bending under loads, driving dogs, or hauling hand-sleds laden with meat, furs, tanned deer-skins, and infants. The puppy dog and .newitable baby never fail in Indian lod, or pro-cession. The cheerful spectacle of the two packed together upon the bac. of a woman is not of infrequent occurence.

Miscellancons Recipes.

Vinegar Candy .- One cup of vinegar wo cups of white sugar and nuts. Boil the vinegar and sugar until it will break brittle when dropped in cold water. When done add the nuts. Pour in a buttered dish and cut before it hardens. Plum Cheese .- Boil plums in sufficient Plum Cherge.—Boil plums in sufficient water to prevent burning, then wash and strain : to every pound of pulp add hal a pound of clean brown sugar ; cook as you would jam, stirring to prevent burn-ing. It can be cut in slices and is a nice addition for lunch.

Fried Apples.-Don't fry them after the ork-they will taste too porky. Just trop a little lump of butter in the spider, heat it hot, and then pour in the dish of sliced apples, add half a teacup of boiling water, put on the cover, and let them ook until soft, without stirring them. Give the spider an occasional shake, then take off the cover and let them dry until they begin to brown.

Pudding for Lunch .- Three pints milk, Pudding for Lunch.—Three pints milk, boiling hot; six eggs; four even table-spoonfuls corn-starch; one half cup sugar; pinch of salt. Beat the starch, yolks and sugar well together, and add to the boiling milk. Let them boil up, stirring all the time, in a vessel set in boiling more Whon it thickens pour boiling water. When it thickens, pour into a dish and cover with the whites of the eggs, beaten to a stiff froth, and mixed with a cupful of powdered sugar. Brown in the oven; flavor with lemon or anything you choose. To be eaten

To Keep Milk from Turning.-In Erze-birge, in Saxony, where the cold water system is carried out in large dairies, an apparently effectual plan has been hit upon for preventing their milk "turning" in tempestuous weather. A thin iron wire chain is passed through the milk pans, the ends of which are kept con stantly in cold water. Dr. Fleischman, of Baden, testifies to the practicabilit. of this method, for, he observes, author ities on this subject maintain that milk is less sensitive to the electricity of the air than to the temperature that surrounds it more immediately. The fact that milk kept in enameled or tin vessels ε ess liable to turn sour in hot weather. caks well for this new theory.

An Awkward Messenger.

Once, when Mme. Rentz and her fenale minstrels were performing in San Francisco, a well-known Front street merchant-one of the front orchestraseat brigade, whose head was more clear than level—waited around the stage en-trance to the Standard Theatre after the performance, trying to conceal a handsome bouquet under his ulster.

For a long time he kept peering at the different specimens of Mme. Rentz's si-rens, as they put up their umbrellas and trotted away in the rain. After waiting patiently for about an hour, he approach-ed an individual with a red scarf and a shoughed bat who stead smoking a simp slouched hat, who stood smoking a cigar at the entrance, and said: "Can you tell me, sir, if Miss Chlorine has gone home yet?".

"Oh, yes, been gone half an hour," replied the slouch-hat party cheerfully. "Those flowers for her?"

"Well-er-um-yes." "I'll give 'em to her-see her later," said the obliging man. "Will you? That's very kind, surely."

"Oh, not at all," said the man, smelling -one to hold hair in, and one to make

woman is not of infrequent occurence.

Practical Religion.

The world demands a practical religion, religion that men can take into their usiness with them, a religion that keeps from evil" while following the plow, at vork in the harvest field, behind the coun ter, in the counting room, at home among riends, abroad among strangers, through he week, on Sunday, and in every relaion of life. People are becoming more lisgusted every day with a religion that in be put on or off at will, like an elegant arment too nice to be worn except Sunays or occasions when it is necessary to nake a good impression in order to sway a reater influence for the promotion of selfh interests. True religion does not conist in long faces and sentimental sighs, a Sunday help and a week hindrance; but t is a real practical delight, producing miles, not frowns, pleasure, not pain, a igher appreciation of life and its respon-ibilities, and not the impression that life s only a bore, and the more we appear wored by it the better christians we appear o the world. Not sentiment, sighs and vords, but faith, love and good works

ject for heaven.

Gold is a good conductor of electricit, has a higher fusing point than silver, re-quiring very nearly 2,300° Fah. to melt it, while it is not acted upon by mineral acids, such as nitric, which dissolves sil-ver. It is however attacked by any of the helenene such as fluorin chlorin the halogens, such as fluorin, chlorin, bromin and iodin, or the acids of any o. these elements. The most ready and

usual solvent is a mixture of nitric with two parts of hydrochloric acid, which by reason of its capacity to attack the king of metals, is called aqua regia, or royal water.

A SHORT SERMON .- The ascent of Jack A Short SERMON.—The ascent of Jack and Jill to fetch the water from its foun-tain head leads us to consider : 1. The attraction of the heights. 2. The up-ward impulse of the sense of want. 3. The profit of pursuit, 4. Misdirected efforts. 5. By this memorable catastro-phe are are led to consider—the penalphe, we are led to consider—the penal-ty of overloading. In conclusion, this authentic history indicates that no man rises or falls in the world by himsen. When Jack fell down, Jill care tum-bling after. Momentous usues hang on every step we take in life. The false step by which we fall is certain to involve some one else in our disaster. There-fore ought we to be ever mindful of our goings, that our footsteps may not slip,

The house in which John Knox, the Scotch Reformer, lived and died is yet "Oh, not at all," said the man, smearing the bouquet with the air of a connois-setur. "Anything else?" "Well-ahem !--yes. Just give her this pair of earrings." "Certainly. What name shall I say?" "Just say that 'Baby Mine'--she'll un-derstand--sends love, and says 2:30, at the same place to-morrow." standing in that part of Edinburgh known as the old town. Extending over

About Water.

No water that has stood in open vessels during the night should be used for drinking or cooking. By exposure to the air it has lost its "areation," and has ab-sorbed the dust-germs floating in the apartment. If convenience requires water to be kept in vessels for several hours before use, it should be covered, unless the vessels are tight. Wherever practical, all distributing reservoirs should be covered. Filtering always adds to the purity of water. Drinking water should not be taken from lakes or rivers on a low level. Surface water or water

woman is not of infrequent occurer.ce. Day after day the mongrel party journeys on, until the fort is reached. Then comes the trade. The trader separates the furs into lots, placing the standard valuation upon each. Then he adds the amounts together, and informs the trapper that bas got sixty or seventy "akins." Af e same time he hands his customer sixty or seventy little bits of wood, so that the latter may know, by returning these in payment for the goods for which he really barters his furs, just how fast his funds decrease. The first act of the Indian is to cancel the debt contracted for advances at the beginning of the sec. Do not drink between meals unless to quench thirst, as excess of water weakens the gastric juice and overworks the kidneys. Excessive potations, whether of water or other fluid, relax the stomach, impair its secretions, and paralyze its movements. By drinking a little at *e* time the injury is avoided.

for advances at the beginning of the sea-son; then he looks round upon the bales of cloth, blankets, etc., and after a long while concludes to have a small white capote for his toddling boy. 'The prio' is told him, and he hands back ten of Henry Smith did his California golo mining in a peculiar way. He was a watchman in the Government Mint. At the close of each day's work, the employees were thoroughly searched before going out of the building, and all of the his little pieces of wood, then looks about him for something else. Every-thing is carefully examined, and with each purchase there is a conte t over the precious metal on the premises was care-ily locked up. Then Smith went on grand for the night. In one of the rooms under his charge was a strong iron tank, in which granules of gold each purchase there is a contet i over the apparent inequality between the amount received an. that given. In the Indian's opini n, one skin shoud pay for one ar-ticle of merchandise, no matter what the value of the latter may be. And he in-sists, too, upon selecting the skin. The steelyard and weighing balances are his especial objects of dislike. Ile does not know what medicine that is. That his tea and sugar should be balanced against a bit of iron, conveys no idea of the relative values of peltries and mer-handise to him. He insists upon mak-ing the balance swing even between the trader's goods and his own furs, until ev light is thrown upon the cuestion steelyards and scales by the accept-

ew light is thrown upon the cuestion steelyards and scales by the accept-ance of his proposition. Then, when he finds his fine furs balanced against heavy blankets, he cauchades to abide by the old method of letting the white trader decide the weight in his own way; for it is clear that the steelyard is a very great medicine, which no brave can un-derstand. WHY IS IT THUS ?- A close observer says, when a man comes home late to dinner, after all the family have eaten, he finds that the viands designed for him have been kept warm. His wife sees to it that his wants are supplied, and sits down with him until he has satisfied the inner man But if the wife comes home from a shopping tour similarly late, she can just shift for herself, and get what solitary satisfaction she can out of cold totatoes and a bone that was once the center of a toothsome sirloin steak, but which then appears to be useful only as a bracelet.

them into tasteful flower-pots in the foi-lowing manner: With a can-opener cut eff any rough or projecting portions of the 'cover, leaving a narrow rim to pro-ject inward. With a pair of pliers, or a small hammer, bend this rim down. This gives firmness to the top of the can Punch three or four small holes in the bottom of the can. Then paint it with When he is ill he goes to the nearest fort, and is cared for and attended until he recovers. When he does his luty well he gets a present, and he never performs any labor without receiving fair compensation. Such humane treat ment strongly binds the Indian and half-breed to the Company.-Harpers
Maganne.
A clumsy foot may tread the right road. Also, may tread on your corn.

a hall great medicine, which no brave can understand.
When the trapper has spent all his little pieces of wood, and asks for further advances, he is allowed to draw any reasonable amount; for contrary to the rule in civilized life, a debt is seldom lost save by the death of the Indian. He may change his place of abode hundreds of miles, but he still has only a Company's post at which to trade. The Company's post at which to trade.
