WHAT IS DYSPEPSIA?

Among the many symptoms of Dyspepsia or indigestion the most prominent are: Variable appetite; faint, gnawing feeling at pit of the stomach, with unsatisfied craving for food; heartburn, feeling of weight and wind in the stomach, bad breath bad taste in the nouth. low spirits. general prostration, headsche and constipation. There is no form of disease more prevalent than dyspepsis, and none so peculiar to the highliving and rapid-eating American people. Alchohol and tobacco produce Dyspepsia; also, bad air, rapid eating, etc. BURDOCK BLOOD BITTERS will cure the worst case, by regulating the bowels and toning up the digestive organs. Sold everywhere.

Analysis by Dr. A. Voelcker, F. R. S., Consulting Chemist Royal Agricultural Society, England, shows only a trace of nitrates in Blackwell's Bull Durham Tobacco. The soil of the Golden Beit of North Carolina, in which this tobacco is grown, don't supply nitrates to the leaf. That is the secret of its delicious mildness. Nothing so pure and luxurious for smoking. Don't forget the brand. None genuine without the trade-mark of the Bull. All dealers have it.
