South Main street. BRIDGE-BUILDING IN AMERICA.

Some Notable Examples of Engineering Skill in this Country.

from the New York Times.

"If there is anything in which the United States can justly claim precedence over all other countries it is for the simplicity, mechanical construction and boldness of design of their bridges." This remark was made to a Times' reporter, and with a good deal of pride, by the world in bridge building, and we in-Mr. Thomas C. Clarke, of the Union tend to stay there." Mr. Thomas C. Clarke, of the Union Bridge company, and one of the veteran bridge-builders of the company. "The Brooklyn bridge," he added, "has the largest span and is considered the largest bridge in the world. But we will soon be obliged to yield the palm of having the biggest bridge to another country. There is now building over the Firth of Forth, in Scotland, a bridge of two spans, each of which is as long as the Brooklyn each of which is as long as the Brooklyn bridge. This is the greatest bridge ever designed anywhere. We are up to nothing of the kind in America, and we haven't money enough for it."

"No," remarked a listener; "taking the way the estimated cost of average ing to furnish to each new congress a bridges increases after construction be-

about it, the bridges are greatly improved.

tirely of steel." the United States, whose salaries are "Steel is the coming material for all from \$8,000 per annum down to 9 cents. bridges, is it not?"
"Yes, for by and by the price of steel

"Yes, for by and by the price of steel ry in this capacity is the postmaster of New York, whose salary is \$8,000, the same as that of the postmaster general When I went into the business, in 1866, himself. The smallest salary appears to steel rails were worth \$1.75 in currency, or \$1.25 in gold per pound. Now they are 32 cents. A great deal of iron is used now, but it is giving way to steel, as wood is to iron. There are probably as wood is to iron. There are probably one, and perhaps in the neighborhood of now, and perhaps in the neighborhood of number of stamps cancelled in their officers. steel rails were worth \$1.75 in currency, be that paid to H. H. Forest, postmaster 90 now, and perhaps of wooden bridges. I am speak- cos. Formerly they paid according to ing now of railway bridges. The con- the number of stamps sold, but this systhe number of stamps sold, but this system was not found to be satisfactory, some of the postmasters making a business of selling stamps in order to get their percentages. Now they are paid by the number of stamps cancelled, receiving the cost of labor has very little to do with it. All the difficulties of manufacturing iron into steel have been over-All grades, according to quality, 15c to 80c per pound.

We also carry a full line of Men's, Ladies' and We also carry a full line of Men's Fine Boots at very diate effect of a protective tariff adds the diate effect of a protective tariff adds the United States, there are 2,000 according We also carry a full line of Men's, Ladies and children's fine Shoes and Men's Fine Boots at very low prices. Also a full line of Tinware and general merchandise. Call on us and be convinced that you can save money by dealing with us. Goods delivered free in any part of the city.

In the beginning, that gives the profits to the manufacturers and a great many go into the business. Then down come the prices, until the manufacturers for this sum. These are places are losing money. What then? Why, the manufacturers combine, as they have Railway Time Table.

Railway Time Table.

COUNCIL BLUFFS.

The following are the times of the arrival and departure of trains by central standard time, at the parture of trains by central standard time, at the parture of trains by central standard time, at the parture of trains leave transfer depot ton minuses later.

CHARGE TABLES TIME TABLE TO THE PROPRIED THE PROP

> whose salaries did not, last year, amount to the sum of \$1 each for the entire year, of those postmasters whose salaries were linger, and that their relations to each other should then be made known to the subject of a book. Now it is simply a railroad bridge, and not one traveler in ten even looks at it as he goes over it. It is very light, yet perfectly secure.
>

THE BRAZILIAN CAJU,

A Delicious Tropical Fruit with Peculiar Characteristics.

"I have often wondered," remarked 'a cinders and sparks. These drop on the wood, char in a little, and weaken the structure until an unusually heavy train or sudden jar causes a crash. There have been hundreds of accidents from this cause. So the wooden bridges must go. An iron bridge costs little more. The steel for the great Scotland cantilever, I may say, is being made right at the spot, works having been set up for that purpose."

"How about stone bridges?" was seed of Mr. Clarke.

"How about stone bridges?" was seed of Mr. Clarke.

"In this city. The caju grows wild and is cultivated in that country. The caju tree hardly rises to the dignity of a tree, but its branches are wide-spreading, and its leaves larger than those of the rubber tree, of a brilliant green color and oval shape, and shine as if they were varnished. The bloom is on the extremities of the sake here by Loonyville. Killed a man once at the same crossing. It's an analyze the same crossing. It's an analyze the same crossing. It's an analyze the same crossing.

taste an ordinary claret sweetened with sugar, and is a popular beverage among the poorer people. A peculiarity of the caju is its seed, which grows on the outside of the fruit, and hangs from its larger extremity. The seed is in size and appearance like a large kidney bean. The kernel is surrounded by a pulpy covering, which secretes a powerful fluid acid. Wherever this touches the flesh a painful blister will form at once, similar to that made by dropping particles of a marlor match on the hand. By roasting the kernels, however, this troublesome the kernels, however, this troublesome property of the seed is destroyed. The lar in some part of Brazil as peanuts are here, and taste very much like them. In roasting the kernels great care is exercised in preventing the smoke that rises from them from touching any part of the flesh, for wherever it touches a most irritating inflammation is the immediate result. If the smoke enters the ever it was a delegate from the south, and hard up for stuff to pay my hotel bill oasted kernels of caju seed ar as popu-

gins, such a bridge as that would swamp the whole country."

"This increased cost," was Mr. Clarke's reply, "is usually owing to the fact that builders' ideas expand as the work goes on, and although there is always a growl on, and although there is always a growl on the concers and employes of the government in all its branches, with the salary paid, state from which employed, etc. The first volume made its appearance some months since, early in the session. It contained the names of all persons in the contained the names of all persons in the employ of the various departments exeral prosperity in which you, as individually loss of the peace, which peace must come the general prosperity in which you, as individually loss of the peace of
